

PROCEEDINGS OF SPIE

# ***International Conference on Smart Transportation and City Engineering (STCE 2025)***

**Weijie Wang**  
**Zhengang Feng**  
*Editors*

**7–9 November 2025**  
**Nanjing, China**

*Organized by*  
Nanjing Tech University (China)

*Sponsored by*  
College of Transportation Engineering of Nanjing Tech (China)  
Beijing University of Technology (China)  
Chang'an University (China)  
AEIC—Academic Exchange Information Centre (China)

*Published by*  
SPIE

**Volume 14120**

Proceedings of SPIE 0277-786X, V. 14120

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Smart Transportation and City Engineering (STCE 2025)*, edited by Weijie Wang, Zhengang Feng, Proc. of SPIE 14120, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## TRAFFIC MODELING AND PREDICTION

---

- 14120 02 **A study of the impact of built environment on the spatial heterogeneity of demand for subway passenger flows** [14120-13]
- 14120 03 **Taxi demand forecasting considering spatiotemporal heterogeneity in built environment by deep learning** [14120-6]
- 14120 04 **Subway passenger flow prediction based on GAT-LSTM-attention considering the graph construction of passenger flow difference** [14120-39]
- 14120 05 **A public transit passenger flow prediction method based on mode decomposition and deep learning under station classification** [14120-158]
- 14120 06 **Zero-shot urban flow generation via KG-guided spatiotemporal diffusion** [14120-21]
- 14120 07 **Enhancing pedestrian flow realism at crossings: a comfort zone projection-based social force model** [14120-30]
- 14120 08 **Investigating the impact of land use on urban traffic congestion via enhanced genetic algorithm optimized stacking ensemble learning: a case study in Xi'an** [14120-37]
- 14120 09 **An intelligent post-collision safety assessment model based on SHAP-attention mechanism** [14120-49]
- 14120 0A **End-to-end traffic flow prediction incorporating hidden variables and dynamic time series memory** [14120-40]
- 14120 0B **Correcting simulated traffic flows under sparse sensing: a radial basis function neural network model leveraging ETC gantry data** [14120-9]
- 14120 0C **HN-VCTM: a variable-length cell transmission model for highway traffic flow inference under sparse sensing using toll data** [14120-12]
- 14120 0D **A spatiotemporal IoT-driven model for urban traffic congestion prediction in smart cities** [14120-76]
- 14120 0E **Research on crowd evacuation guidance based on bat algorithm-guided social force model** [14120-161]
- 14120 0F **Prediction model of ground settlement based on GRU and improved self-attention mechanism: application research in rectangular pipe jacking tunnel construction** [14120-162]

- 14120 OG **Research on predicting the severity of traffic accidents with unbalanced crash data in urban scenarios** [14120-111]
- 14120 OH **Resilience identification of critical sections in urban road network during road occupation construction** [14120-41]
- 14120 OI **Study on stability prediction of collapsible cave slopes based on data augmentation and ensemble learning** [14120-42]
- 14120 OJ **Simulation-based evaluation of intelligent vehicle guidance strategies at highway toll stations with multiple toll collection modes** [14120-138]
- 14120 OK **Heterogeneity analysis of car-following behavior using two-stage unsupervised learning method** [14120-154]
- 14120 OL **Multiscenario highway lane-change intention prediction: a physics-informed AI framework for three-class classification** [14120-103]
- 14120 OM **Classification of traffic accident severity from surveillance videos** [14120-102]
- 14120 ON **Traffic operation mechanism in the impact zone of intermittent bus lanes based on image recognition and trajectory sensing** [14120-156]
- 14120 OO **Lane-changing risk quantification and prediction integrating driving intention and traffic conflict** [14120-16]
- 14120 OP **Analysis of lane-changing primitives in highway merging areas based on nonparametric Bayesian models** [14120-7]
- 14120 OQ **Prediction of traffic flow with uncertain time series** [14120-99]
- 14120 OR **A two-stage evolutionary game analysis of sustainable aviation fuel promotion under dynamic incentive mechanisms** [14120-152]
- 14120 OS **Traffic flow forecasting method based on multiscale wavelet decomposition and enhanced time-frequency modeling** [14120-32]
- 14120 OT **Structural time-variant reliability analysis by single-loop active learning Kriging** [14120-55]
- 14120 OU **A bike-sharing demand prediction model integrating user heterogeneity and spatiotemporal characteristics** [14120-29]
- 14120 OV **Multivariate time-series prediction of pavement performance evolution using extended long short-term memory with uncertainty quantification** [14120-131]
- 14120 OW **Regional railway development disparities in China based on deep embedded clustering and RBF network** [14120-19]

- 14120 0X **Calculation model for capacity of self-organized roundabouts for mixed traffic flow in Chinese cities** [14120-136]
- 14120 0Y **Analysis of urban rail transit traffic flow based on SARIMA and LSTM models** [14120-63]
- 14120 0Z **Metro station passenger flow prediction based on time-partitioned modeling and ensemble learning** [14120-134]
- 14120 10 **Short-term traffic flow forecasting considering operational characteristic differences** [14120-25]
- 14120 11 **Forecasting the demand for bicycle-metro integration incorporating spatiotemporal characteristics** [14120-75]
- 14120 12 **Microseismic monitoring and tool replacement of shield tunnels in strong karst development areas** [14120-91]
- 14120 13 **Research on machine learning-based road traffic condition classification and prediction** [14120-139]
- 14120 14 **FFGN: a Fourier graph network for spatiotemporal forecasting** [14120-89]
- 14120 15 **Dual-branch GCN for short-term traffic forecasting** [14120-20]
- 14120 16 **Estimating the effect of congestion on traffic safety risks: a double machine learning causal inference approach** [14120-137]
- 14120 17 **Clustering analysis of congestion patterns based on traffic congestion index: evidence in Hangzhou, China** [14120-50]
- 14120 18 **Combined model with SE attention mechanism to predict photovoltaic power generation in highway area** [14120-59]

#### TRAFFIC CONTROL AND OPTIMIZATION

---

- 14120 19 **Hybrid vehicle distribution optimization considering time-dependent road network** [14120-67]
- 14120 1A **Autonomous vehicle control method under pedestrian risk constraints on road segment** [14120-130]
- 14120 1B **Intelligent travel recommendation system based on MOON algorithm** [14120-3]
- 14120 1C **Deep reinforcement learning for CAV control in signalized intersections: a DDPG approach** [14120-54]
- 14120 1D **Optimization of tourist bus routes using the NSGA-II algorithm** [14120-18]

- 14120 1E **Research on the adaptability evaluation model of urban traffic road networks for connected and automated vehicles** [14120-51]
- 14120 1F **Research on the accessibility optimization of urban agglomeration based on multiobjective bilevel optimization model** [14120-143]
- 14120 1G **Preemptive deceleration strategy for autonomous vehicles in exit ramp proximity areas of urban expressways: an incomplete-information static game approach** [14120-141]
- 14120 1H **Adaptive large neighborhood search for airport baggage transportation and worker allocation** [14120-56]
- 14120 1I **Cellular automaton model for mixed traffic flow considering lane change duration** [14120-90]
- 14120 1J **Study on collaborative optimization of bus priority signal considering conflicts between social vehicles turning right in the bus lane on the roadside** [14120-92]
- 14120 1K **A double-cycle coordinated control framework for expressway ramp-arterial coordination** [14120-33]
- 14120 1L **Research on intelligent bus station vehicle throughput capacity enhancement via enhanced genetic algorithm** [14120-113]
- 14120 1M **Optimization of multivehicle demand-responsive transit routing for low-carbon commuting** [14120-119]
- 14120 1N **Optimization of bus-subway network resilience based on dynamic passenger flow prediction and potential station failure identification** [14120-79]
- 14120 1O **An improved genetic algorithm for joint optimization of bus network and frequency in small cities** [14120-64]
- 14120 1P **Accessibility evaluation and optimization of urban parks in Yanta district, Xi'an: from a child-friendly perspective** [14120-106]
- 14120 1Q **Research on dynamic management and control for bus lane with dynamic intermittent priority in connected environment** [14120-2]
- 14120 1R **Research on multiobjective scheduling optimization of port berths based on DWM-MOEA** [14120-17]
- 14120 1S **Real-time self-organizing signal control method based on area detection** [14120-86]
- 14120 1T **Grid-based location optimization for UAV vertiports in urban logistics networks** [14120-105]
- 14120 1U **Road optimization and impact assessment method based on network flow model** [14120-126]
- 14120 1V **Scheduling strategies for energy efficiency in tunnel lighting** [14120-47]

- 14120 1W **Cooperative control method of urban expressway considering environmental benefits**  
[14120-120]
- 14120 1X **Simulation and efficiency comparison analysis on traffic reconstruction of Qujiang Avenue Roundabout** [14120-14]
- 14120 1Y **Enhancing multi-intersection coordination with dynamic role allocation in reinforcement learning** [14120-27]
- 14120 1Z **Research on the index of smart public transport services based on big data** [14120-66]
- 14120 20 **DQN-based autonomous lane change method for vehicles in highway merge zones**  
[14120-65]
- 14120 21 **PER-dueling DQN algorithm: a lane-level variable speed limit control method for expressway bottleneck area** [14120-123]
- 14120 22 **DDQN integrating SENet for VSL control of urban expressway mixed traffic flow** [14120-115]
- 14120 23 **Study on traffic signal coordination and optimization of urban arterials for emission reduction targets** [14120-117]
- 14120 24 **Analysis of the impact of highway lane-changing behavior on CO<sub>2</sub> emissions based on NGSIM** [14120-60]
- 14120 25 **Research on resilience-based road network restoration rescheduling considering secondary disasters** [14120-62]
- 14120 26 **Research on vehicle platoon keeping based on double deep Q-network** [14120-78]
- 14120 27 **Analysis of the impact of highway following behavior based on NGSIM on CO<sub>2</sub> emissions**  
[14120-45]
- 14120 28 **Research on vehicle transportation path planning of fresh agricultural products producing area based on multistrategy improved Grey Wolf Optimization algorithm** [14120-95]
- 14120 29 **Decision-making game model for urban road network control under oversaturated conditions** [14120-58]
- 14120 2A **Multiagent port-shipping collaborative scheduling based on critical path optimization: a case-inspired study** [14120-87]
- 14120 2B **A multiobjective evaluation of the China–Europe freight train for sustainable multimodal logistics using an AVL-tree-enhanced A\* algorithm** [14120-5]
- 14120 2C **Optimization of crew rescheduling in urban rail transit under emergency conditions**  
[14120-135]

- 14120 2D **Research on potential conflict resolution for CAV at unsignalized intersections in human-machine mixed driving environments** [14120-150]

---

**URBAN ENGINEERING AND SENSING TECHNOLOGY**

---

- 14120 2E **Research on urban functional zoning using mobile phone signalling data** [14120-36]
- 14120 2F **An efficient vehicle trajectory extraction method based on YOLO and improved DeepSORT algorithm** [14120-157]
- 14120 2G **Analysis of taxi passenger travel characteristics combining POI and passenger hotspots** [14120-88]
- 14120 2H **Research on the information threshold of guidance signs in urban dynamic traffic environment based on TOPSIS and curvature analysis** [14120-4]
- 14120 2I **Research on highway hard shoulder running method based on YOLOv10s+SE attention mechanism** [14120-74]
- 14120 2J **Helmet-wearing detection algorithm for two-wheelers based on improved YOLOv8** [14120-61]
- 14120 2K **Vision-based lane detection using UAV aerial imagery** [14120-43]
- 14120 2L **Research on the operational strategy of intelligent connected electric light-duty trucks at urban signalized intersections** [14120-151]
- 14120 2M **CAV control strategy based on integrating deep learning and Kalman filter in cyberattack scenarios** [14120-53]
- 14120 2N **Study on drivers' visual and physiological characteristics after fire accidents in operational highway tunnels** [14120-153]
- 14120 2O **Research on driver behavior characteristics and visual characteristics in multifrequency switching scenarios of tunnel groups** [14120-35]
- 14120 2P **Green infrastructure integration in smart city planning and development** [14120-144]
- 14120 2Q **Alarm optimization model based on ST-GCN: taking Chuanfang community as an example** [14120-149]
- 14120 2R **An integrated analytical framework for assessing public transport equity using multidimensional accessibility metrics and spatial visualization** [14120-93]
- 14120 2S **Research on the impact of foggy weather on the optical perception system of intelligent driving** [14120-38]
- 14120 2T **Research on BIM-based design strategies for healthy campus environment: a case study of the relocation project of Wulijie Middle School in Jiangxia District, Wuhan** [14120-133]

- 14120 2U **Urban renewal in high-density urban areas from the perspective of crowd psychological health** [14120-8]
- 14120 2V **A method and system for simulated driving of high-speed EMU with modular data configuration** [14120-26]
- 14120 2W **A digital twin and IoT-enabled framework for smart landscape systems in sustainable city engineering** [14120-22]
- 14120 2X **CVAE-statistical hybrid framework for household and population synthesis under severe sample scarcity** [14120-107]
- 14120 2Y **Research and application of municipal pipeline relocation technology based on BIM+GIS** [14120-159]
- 14120 2Z **Research on a digital management platform for highway assets based on multidimensional visualization** [14120-155]
- 14120 30 **Recognition of lane change intention based on driver's mental workload** [14120-11]
- 14120 31 **A study on road accessibility based on space syntax: a case study of the inner area of Xi'an Ming Dynasty city wall** [14120-82]
- 14120 32 **Road environment semantic segmentation based on enhanced U-Net network for camera and LiDAR fusion** [14120-121]
- 14120 33 **Efficient sharing technology for railway model-data integrated services across the full lifecycle** [14120-142]
- 14120 34 **An effectiveness evaluation on the implementation of waterway transport standards employing the grey-AHP approach** [14120-97]
- 14120 35 **International transport risk analysis of China–Europe railway express based on FTA-BN model** [14120-96]
- 14120 36 **An end-to-end UAV-based framework for automated pavement distress detection and condition assessment** [14120-129]
- 14120 37 **4WIS tracking and synchronization control based on a novel ATDMPC method** [14120-52]
- 14120 38 **Practical application and efficiency analysis of multisensor fusion technology in structural health monitoring of bridges** [14120-85]
- 14120 39 **Vision transformer-based incident detection algorithm for freeway service areas** [14120-83]
- 14120 3A **Lightweight YOLO-based framework for oriented vehicle detection in UAV imagery** [14120-104]
- 14120 3B **A CiteSpace-based analysis of research progress on the 15-minute city region** [14120-145]

- 14120 3C **Road traffic sign recognition based on multiresolution attention mechanism network**  
[14120-125]
- 14120 3D **Application of 3D laser scanning and BIM technology in the repair of historical buildings**  
[14120-124]
- 14120 3E **MPC-based strategy for UAV slung-load systems: evaluation of energy consumption per unit projected distance** [14120-44]
- 14120 3F **Research on construction and optimal scheduling strategy of machine learning-driven energy consumption prediction model for HVAC systems in office buildings** [14120-28]
- 14120 3G **Performance evaluation of Internet of Vehicles: roadside unit communication network**  
[14120-94]
- 14120 3H **Research on multimodal sensor collaborative detection based on dynamic weight fusion**  
[14120-48]
- 14120 3I **Design of a driving behavior recognition system for road transport vehicles based on deep temporal feature learning and density-based clustering** [14120-72]
- 14120 3J **Virtual reality-based optimization for urban public space environmental design** [14120-160]
