

PROCEEDINGS OF SPIE

***Third International Conference on  
Optics, Materials Science, and  
Computing in Condensed-Matter  
Physics (OMCCP-2025)***

**Anvar Zakhidov  
Vasilios N. Katsikis  
Suklyun Hong**  
*Editors*

**16–18 December 2025  
Bukhara, Uzbekistan**

*Organized by*  
Bukhara State Technical University (Uzbekistan)

*Sponsored by*  
Innovation Scientific Consulting Center (Uzbekistan)  
Shakarim University (Kazakhstan)

*Published by*  
SPIE

**Volume 14126**

Proceedings of SPIE 0277-786X, V. 14126

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on Optics, Materials Science, and Computing in Condensed-Matter Physics (OMCCP-2025)*, edited by Anvar Zakhidov, Vasilios N. Katsikis, Suklyun Hong, Proc. of SPIE 14126, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICS AND PHOTONICS IN CONDENSED MATTER

---

- 14126 02 **The use of fiber optic technologies in measuring low pressure in space life support systems** [14126-2]
- 14126 03 **Femtosecond laser amplification in MgO:LiTaO<sub>3</sub> crystals with modulated nonlinear characteristic** [14126-6]
- 14126 04 **The effect of thermal treatment on the absorption spectra of background impurity (oxygen and carbon) atoms in p-Si<B,Pt> structures** [14126-11]
- 14126 05 **Spectroscopic study of carotenoids contained in apricot juice** [14126-8]
- 14126 06 **Photoluminescence in lithium fluoride crystals exposed to 5MeV electrons at low temperatures** [14126-15]
- 14126 07 **Gas-laser cutting of carbon steel of U8G grade for gin saws** [14126-17]
- 14126 08 **Chemical analysis of steel slag by laser-induced decomposition spectroscopy analysis** [14126-19]
- 14126 09 **Eddy current method for studying the electrical conductivity of semiconductor materials** [14126-24]
- 14126 0A **Development of a method for calculating the gas-optically transparent liquid interfacial surface area based on a 2D image** [14126-46]
- 14126 0B **MO-LSRTDE for simulation-driven inverse design of visible-band thin-film antireflection coatings via transfer-matrix modeling** [14126-55]
- 14126 0C **A dual-beam photometer invariant to cuvette window contamination** [14126-49]

---

## MATERIALS SCIENCE: DESIGN, CHARACTERIZATION, AND APPLICATIONS

---

- 14126 0D **Data-driven insights into oxidation and phase stability behavior of refractory high-entropy alloys** [14126-37]
- 14126 0E **Thermal evolution of impurity-induced energy levels in platinum-doped silicon** [14126-4]

- 14126 OF **One-dimensional micromagnetic domain structures and their physical nature in ferromagnetic crystals** [14126-7]
- 14126 OG **Physical and technological properties of fine-grained low-alloy steel 09G2S** [14126-16]
- 14126 OH **Microstructural characterization of 110G13L (Hadfield) steel by optical microscopy: matrix features, segregation contrast, and discontinuities** [14126-20]
- 14126 OI **Structural, tribological, and corrosion properties of Cr<sub>3</sub>C<sub>2</sub>-NiCr coatings obtained by the HVOF technique** [14126-44]
- 14126 OJ **Physicochemical and histological foundations of soy whey-based fermentation in processing karakul skins** [14126-26]
- 14126 OK **Physical and technological properties of carbon steels using gas welding** [14126-27]
- 14126 OL **Industrial waste-derived geopolymer materials with curing-controlled microstructure and strength development** [14126-31]
- 14126 OM **Innovative method for studying the production of porcelain stone from local raw materials** [14126-34]
- 14126 ON **Data-driven multiobjective optimization of oxidation resistance and phase stability in refractory high-entropy alloys** [14126-36]
- 14126 OO **Improvement of tricot seams of various materials by modernization of sewing machine and polymer composite** [14126-3]
- 14126 OP **Mathematical modeling and numerical calculation of the thermal conductivity process of a sample during electrolytic-plasma hardening** [14126-42]

---

#### COMPUTATIONAL AND THEORETICAL APPROACHES

- 14126 OQ **Development of a neural network for controlling the chlorination process of recycled dichloroethane using a virtual analyzer** [14126-5]
- 14126 OR **Ionospheric concentration prediction model based on distribution images using ConvLSTM neural network in radio navigation** [14126-23]
- 14126 OS **AI-driven optimal control modeling for yield enhancement using nonlinear diffusion dynamics** [14126-28]
- 14126 OT **Mathematical foundations and algorithms for group decision systems** [14126-59]
- 14126 OU **Optimization of Bi-LSTM neural network parameters for named entity recognition in text data** [14126-32]
- 14126 OV **Analytical modeling of viscoelastic rotor dynamics with eccentricity and high-speed vibration effects** [14126-33]

- 14126 0W **Algorithm for fuzzy controlling the bioreactor block process of bacterial oxidation**  
[14126-41]
- 14126 0X **Modeling and machine learning for analyzing and predicting learning activities in robotics education** [14126-43]
- 14126 0Y **The occurrence of the phenomenon of elastic return during the unsteady flow of an elastic-viscous liquid in a flat channel** [14126-47]
- 14126 0Z **Security challenges and best practices in open-source software development** [14126-60]
- 14126 10 **Prediction of optimal thermal insulation thickness using an artificial neural network**  
[14126-52]
- 14126 11 **Machine-learning-based assessment of heating and cooling degree days for predicting building energy demand** [14126-62]
- 14126 12 **Real-time traffic forecasting and adaptive signal control with Python, Kafka, and ML**  
[14126-61]
- 14126 13 **Information properties of symmetric and nonsymmetric models** [14126-54]
- 14126 14 **Applying hybrid modeling and optimization techniques for teaching projection drawing with graphic programs** [14126-53]
- 14126 15 **AI-based Bellman optimization model for intelligent decision-making in agricultural systems** [14126-29]

---

#### DEVICES AND TECHNOLOGIES

- 14126 16 **Modeling and optimization of a disc-type digging mechanism for potato harvesters**  
[14126-68]
- 14126 17 **Research on methods to improve the accuracy of measuring the natrium cyanide concentration during the cyanization process** [14126-45]
- 14126 18 **Synthesis of the state observers of linear plants with elastic properties** [14126-48]
- 14126 19 **Visualization of the distribution of a physical quantity on a deformed interfacial surface**  
[14126-51]
- 14126 1A **Analysis of ADMET biological activity indicators of 1-(2-thienoyl)-3,3,3-trifluoroacetone acylhydrazones** [14126-56]
- 14126 1B **Parameters and operating modes of a device for cleaning the hull of pistachio nuts**  
[14126-57]

- 14126 1C **Performance assessment and excitation modeling of induction motors operated as standalone generators** [14126-64]
- 14126 1D **Use of innovative devices with alternative energy sources for the disposal of weeds** [14126-74]
- 14126 1E **Design and testing of an ejector-based device for continuous *Trichogramma* distribution in crop protection** [14126-65]
- 14126 1F **Design and kinematic analysis of a gear-lever differential transmission for roller processing machines** [14126-67]
- 14126 1G **A meter of electrical conductivity and magnetic field characteristics using an eddy current sensor** [14126-10]
- 14126 1H **Modeling and performance analysis of linear asynchronous drives for high-precision test bench systems** [14126-72]
- 14126 1I **Justification of the optimal parameters of a spherical disc working tool for the cultivation of sloping forest areas** [14126-58]

---

#### INTERDISCIPLINARY TOPICS AND EMERGING TRENDS

- 14126 1J **Change of values of maximum stresses in the cylindrical shell of the vessel housing in the presence of a dent** [14126-1]
- 14126 1K **Determination of the thermodynamic state of composite grinding wheels and the machined surface of rails during the grinding process** [14126-9]
- 14126 1L **Analytical assessment of the size of the zone of residual interblock movements** [14126-12]
- 14126 1M **Features of tool wear in the technological process of grinding railway rails** [14126-13]
- 14126 1N **Influence of technological residual stresses on the fatigue strength of machine parts** [14126-14]
- 14126 1O **Design of biodegradable chains and grease lubricants from mineral and vegetable oils** [14126-18]
- 14126 1P **Scientific basis for the restoration of the accuracy of the main surfaces of the gyrating shaft of cone crushers** [14126-21]
- 14126 1Q **Development of a screw conveyor with an improved design and methods for increasing its operational performance** [14126-22]
- 14126 1R **Structure of the elements of the discrete phase model of soil cutting by a three-sided excavator tooth** [14126-25]
- 14126 1S **Function of steel wire rope in an anchoring system** [14126-30]

- 14126 1T **Analysis of physical processes of passive particle transport and deposition in the atmosphere for the development of smart dust swarm technologies** [14126-35]
- 14126 1U **Prevention of tank cylindrical shell transition to limit state in case of edge displacement and corrosion wear** [14126-40]
- 14126 1V **Aerodynamic performance and design optimization of a dual-tier vertical-axis wind rotor** [14126-50]
- 14126 1W **Experimental analysis of tractor tire load and pressure effects on soil compaction** [14126-66]

---

#### APPLICATIONS AND INDUSTRIAL PERSPECTIVES

---

- 14126 1X **Determining the optimal insulation thickness for external walls and assessing its cost-effectiveness** [14126-38]
- 14126 1Y **Calculating the optimal thickness of polystyrene-based thermal insulation for the Kashkadarya region** [14126-39]
- 14126 1Z **Prediction of optimal tilt angle for photovoltaic systems using machine learning techniques** [14126-63]
- 14126 20 **Thermal analysis and performance modeling of radiation-based food drying in combined solar dryers** [14126-71]
- 14126 21 **Optimizing thermal insulation thickness for building walls in Uzbekistan's climatic zones** [14126-69]
- 14126 22 **Modeling of building heat loss and environmental assessment** [14126-70]
- 14126 23 **Python-based analysis of optimal wall insulation and emissions in different climate zones** [14126-73]
- 14126 24 **Optimization of life cycle costs of external wall insulation for the climatic conditions of Bukhara and Jizzakh** [14126-76]
- 14126 25 **Numerical modeling of optimum insulation location based on time lag and decrement factor in wall systems** [14126-78]
- 14126 26 **Software development for an industrial takeaway order management system** [14126-79]
- 14126 27 **Modelling the environmental assessment of optimal insulation thickness in building envelopes** [14126-81]
- 14126 28 **Numerical modelling of optimal thermal insulation thickness considering energy and environmental performance** [14126-82]

- 14126 29 **Thermodynamic and electrochemical analysis of petrol-hydrogen blends for emission reduction in Otto engines** [14126-77]
- 14126 2A **Installation angle of the straightening section relative to the horizon** [14126-75]
- 14126 2B **Modelling solar radiation on tilted surfaces and determination of the optimum tilt angle** [14126-83]
- 14126 2C **Monitoring of train traffic safety using unmanned aerial vehicles and low-orbit satellite constellations** [14126-80]
