

PROCEEDINGS OF SPIE

***Fifth International Conference
on Testing Technology and
Automation Engineering
(TTAE 2025)***

Libor Pekař
Editor

14–16 November 2025
Changsha, China

Organized by
South China University of Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 14127

Proceedings of SPIE 0277-786X, V. 14127

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Testing Technology and Automation Engineering (TTAE 2025)*, edited by Libor Pekař, Proc. of SPIE 14127, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

ADVANCED SENSING AND MEASUREMENT

- 14127 02 **Bullying action detection and recognition algorithm based on millimeter-wave radar**
[14127-69]
- 14127 03 **Research on detection devices for wearable blood pressure monitoring equipment**
[14127-33]
- 14127 04 **Design of an intelligent surface subsidence monitoring system incorporating biometric techniques** [14127-8]
- 14127 05 **A self-powered ultraviolet photoelectric sensor with highly selective response based on β -Ga₂O₃/anatase TiO₂ heterostructures** [14127-38]
- 14127 06 **Generation and calibration techniques for high-precision narrow-pulse signals** [14127-100]
- 14127 07 **Research progress of scanning tunneling microscopy under extreme conditions** [14127-93]
- 14127 08 **Rapid non-destructive testing of weld defects on certain load-bearing platforms using ACFM technology** [14127-34]
- 14127 09 **Research on surface topography of CNC machining based on non-metallic materials**
[14127-96]
- 14127 0A **Ultrathin flexible electrodes with conformal contact for high-fidelity bioelectric signal monitoring** [14127-11]
- 14127 0B **A study on the axial compression of steel tube concrete based on 3D full-field strain measurement and contact measurement** [14127-27]
- 14127 0C **A coaxial long-short-focus camera-based vision tracking and localization system for high-precision measurement** [14127-15]
- 14127 0D **High-current measurement technology matched with highly sensitive weakly magnetic sensors** [14127-56]
- 14127 0E **Smart embedded NIR platform for rapid on-site milk composition analysis** [14127-65]
- 14127 0F **Perovskite-based phototransistor sensor for highly sensitive detection of c-reactive protein**
[14127-3]
- 14127 0G **Simulation and parameter study of spun nozzles** [14127-4]

- 14127 OH **Research on magnetic detection technology for oil and gas pipeline damage** [14127-72]
- 14127 OI **Development and testing of a digital drive system for a vibrating tube densimeter with dual parallel straight measuring tubes** [14127-16]
- 14127 OJ **A laser-based wireless system for automatic height-difference measurement of embedded anchor plates in GIS foundations** [14127-98]
- 14127 OK **Robust thickness measurement of SiC epilayers with unknown doping via infrared interference** [14127-7]
- 14127 OL **Modeling and distribution characteristics of spatial induced magnetic fields in lithium-ion batteries under normal operating conditions** [14127-25]
- 14127 OM **Investigation of acoustic leak imaging method for detecting multiple gas leakage points** [14127-67]
- 14127 ON **Online detection method and experimental study of SF₆ decomposition products based on colorimetric reaction** [14127-81]
- 14127 OO **Precision analysis of angle sensor demodulation circuit for flight control electronic equipment** [14127-82]
- 14127 OP **Research on common-aperture technology in multimode composite seeker** [14127-89]
- 14127 OQ **Analysis of an arc discharge fault induced by a manufacturing defect in a 110kV main transformer HV bushing** [14127-88]
- 14127 OR **Analysis on the influence of insulating oil combustion characteristics on the safety performance of UHVDC converter transformers** [14127-94]
- 14127 OS **An equivalent accelerated detection method for ionic migration in ceramic materials** [14127-91]
- 14127 OT **Combined ultrasonic and ultra-high frequency inspection method for internal defects in GIS** [14127-83]
- 14127 OU **Wireless multiparameter monitoring system for specialized combustion furnace operating conditions based on a layered protocol stack** [14127-74]

INTELLIGENT AUTOMATION AND CONTROL

- 14127 OV **Research on high-voltage cable fault location technology for renewable energy stations considering the impact of cable accessories** [14127-79]
- 14127 OW **An IMU-based anomaly detection mechanism for tower structures and model evaluation** [14127-22]

- 14127 0X **Development of a UWB-based geofencing system for safety monitoring in power engineering** [14127-99]
- 14127 0Y **DQN-based adaptive control method for lightning protection tilt angles of 10kV overhead ground wire and side phase conductors** [14127-60]
- 14127 0Z **Submarine cable insulation aging condition monitoring and dynamic threshold alarm algorithm based on Bayesian optimization** [14127-48]
- 14127 10 **Intelligent O&M-based monitoring and prognostics approach for submarine cable systems** [14127-24]
- 14127 11 **Low-voltage distribution network line power flow calculation method based on improved LSSVM prediction model** [14127-47]
- 14127 12 **DQN optimization method for maximum power point tracking control of three-core cable energy harvesting devices** [14127-51]
- 14127 13 **Optimized peak-valley differential scheduling strategy for distribution networks considering EV and 5G base station energy storage** [14127-62]
- 14127 14 **AI-powered multistage grid planning optimization method for medium-voltage distribution networks based on AHA algorithm** [14127-43]
- 14127 15 **Research on constant flow pneumatic control methods for automatic cigarette conveying production lines** [14127-58]
- 14127 16 **Dynamic allocation algorithm of virtualized resources in power dispatch center based on digital twin technology** [14127-39]
- 14127 17 **Grid situation awareness based on random matrix theory under extreme scenarios** [14127-49]
- 14127 18 **Real-time monitoring and intelligent alarm method for cable fires based on artificial intelligence** [14127-42]
- 14127 19 **An improved VSG pre-synchronization model based on virtual impedance** [14127-19]
- 14127 1A **Autonomous target detection and tracking based on dynamic trajectory correction** [14127-54]
- 14127 1B **Research on an automotive LED headlight adaptive control method based on nonlinear compensation** [14127-87]
- 14127 1C **Intelligent suspension control using DDPG in 14-DOF vehicle dynamics framework** [14127-64]

SIGNAL PROCESSING AND MACHINE INTELLIGENCE

- 14127 1D **Research on maximum depth measurement algorithm of road surface contaminants based on clustering and sliding window** [14127-37]
- 14127 1E **Research on a road rut detection technology with UAV-mounted lidar based on point cloud data preprocessing** [14127-52]
- 14127 1F **Research on real-time estimation method for radar angle measurement error based on multiradar intersection** [14127-71]
- 14127 1G **Subpixel-level edge detection method for linear array CCD images based on 2D Otsu algorithm and ellipse fitting** [14127-68]
- 14127 1H **AI detection method for substation transformer temperature anomaly defects based on infrared image semantic segmentation** [14127-63]
- 14127 1I **Digital twin-driven chain information aggregation algorithm for power grid emergency events** [14127-50]
- 14127 1J **Pipeline instrument signal processing and feature extraction based on VMD kernel principal component analysis** [14127-10]
- 14127 1K **A frequent item set-based method for text consistency anomaly pattern recognition in transmission information** [14127-53]
- 14127 1L **A 3D irregular defect opening profile recognition method based on magnetic field distortion** [14127-46]
- 14127 1M **Baseline for lightweight defect detection of industrial fabrics: frequency domain enhancement and synthetic defect generation** [14127-102]
- 14127 1N **Objective prediction of leather mechanical tactile properties based on structured light 3D reconstruction and deep learning** [14127-57]
- 14127 1O **Bearing fault diagnosis method based on VMD-STFT feature fusion and VGGSE-BIGRUGAM dual-stream network** [14127-14]
- 14127 1P **Design of visual inspection unit for bottom gluing defects of BIW based on machine learning** [14127-18]
- 14127 1Q **A lightweight L-YOLO-based method for small-scale damage detection in aero-engines** [14127-28]
- 14127 1R **Enhancing YOLOv8n for UAV object detection with multichannel coding** [14127-80]
- 14127 1S **Ship detection in optical remote sensing images based on DAT-YOLOv11** [14127-77]
- 14127 1T **3D reconstruction of cigarette end face topography and study of key quality defects** [14127-12]

- 14127 1U **An automated appearance defect detection and removal system for varistors based on YOLO** [14127-90]
- 14127 1V **Edge-ready dual-path segmentation for multiclass apple leaf diseases** [14127-61]
