SPIE

Volume 14133

Proceedings of SPIE 0277-786X, V. 14133

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Algorithms, Network, and Communication Technology (ICANCT 2025)*, edited by Yang Yue, Proc. of SPIE 14133, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTELLIGENT ALGORITHMS AND DATA ANALYSIS

- 14133 02 **Adaptive parameter selection and dynamic entanglement mapping for quantum-enhanced probabilistic modeling** [14133-5]
- 14133 03 **Quantum computing simulation acceleration and error mitigation method and system based on tensor network topology optimization** [14133-6]
- 14133 04 **The design and implementation of a geographical indication push system based on big data** [14133-10]
- 14133 05 **Development of odour irritant combustible gas detectors and discussion on measurement methods** [14133-15]
- 14133 06 **Log anomaly detection with multidimensional features and decision-level fusion** [14133-22]
- 14133 07 **Digital government performance evaluation model based on the analytic hierarchy process** [14133-23]
- 14133 08 **Robust supply chain network design under disruption risks using stochastic programming** [14133-25]
- 14133 09 **Fourier analysis of the multivariate variational quantum algorithms** [14133-27]
- 14133 0A **Design of an automatic assembly mechanism** [14133-32]
- 14133 0B **Research on the element structure and pattern differentiation of generative artificial intelligence empowers green communication systems** [14133-36]
- 14133 0C **High-frequency enhanced spatio-temporal information compensation video coding network** [14133-39]
- 14133 0D **Research on intelligent evaluation model of innovation and entrepreneurship projects based on big data analysis** [14133-41]
- 14133 0E **Underwater image enhancement via switchable attention and transformer-enhanced multiscale disentanglement** [14133-44]
- 14133 0F **Suspension cable climbing robot with power outage protection functionality** [14133-45]
- 14133 0G **Autonomous research of drone swarms for collaborative search algorithm design** [14133-47]

- 14133 OH **STM32-based image recognition intelligent logistics vehicle system** [14133-48]
- 14133 OI **Research on information system project schedule management based on earned value analysis** [14133-53]
- 14133 OJ **Classification method of complex equipment quality state based on clustering algorithm** [14133-59]

COMMUNICATION ENGINEERING AND SIGNAL PROCESSING

- 14133 OK **Research on novel optical transparent antenna** [14133-4]
- 14133 OL **Application of 5G slicing technology in low-latency video surveillance systems** [14133-12]
- 14133 OM **Research on the construction method of data resource system based on ontology theory** [14133-28]
- 14133 ON **AI-driven supply-demand optimization model for pricing strategies in green communication networks** [14133-31]
- 14133 OO **Research on the application of AHP-Fuzzy algorithm in the intelligent service quality evaluation of Wuhan Atour S Hotel** [14133-34]
- 14133 OP **Research on path of adaptive privacy protection system based on UCAP-PF** [14133-37]
- 14133 OQ **In-depth application of digital certificate authentication based on SM2 algorithm in tobacco industrial logistics IoT devices** [14133-38]
- 14133 OR **Statistical study on the carbon emission driving mechanisms in 30 Chinese provinces: an analysis based on the Malmquist-LMDI-STIRPAT model** [14133-55]
- 14133 OS **Theoretical characteristics research of fiber-Bragg gratings** [14133-57]

INTELLIGENT PERCEPTION AND NETWORK COLLABORATION TECHNOLOGY

- 14133 OT **Integrating federated learning and blockchain for trustworthy task allocation in air-ground heterogeneous robotic systems with adaptive coordination** [14133-19]
- 14133 OU **Research on control strategy for photovoltaic and energy storage DC microgrid based on hierarchical and modular control** [14133-40]
- 14133 OV **Research on refined meteorological risk warning model of geohazards in Ningxia using improved causal convolution** [14133-43]

- 14133 0W **Research on efficient training of transformer model based on sparse matrix optimization** [14133-50]
- 14133 0X **Research on methods of lightweight digital twin modeling and collaborative optimization for industrial internet** [14133-56]
- 14133 0Y **Temperature drift compensation for precision eddy current displacement sensors based on TinyML** [14133-58]

INFORMATION SYSTEMS AND INTELLIGENT DECISION-MAKING

- 14133 0Z **A dual perspective intelligent code management system based on data-driven model** [14133-3]
- 14133 10 **Design of intelligent agricultural management system based on STM32** [14133-8]
- 14133 11 **Arayvideo: text-to-video diffusion models with a transformer architecture** [14133-16]
- 14133 12 **Outlier detection for batteries based on improved isolation forest algorithm** [14133-17]
- 14133 13 **File signature engraving and BPB key parameter verification-based research and implementation of an EXFAT digital forensics system** [14133-18]
- 14133 14 **Trajectory tracking control for autonomous underwater vehicle maintenance based on improved ant colony optimization and model predictive control** [14133-21]
- 14133 15 **Mining drill motor power head based on optimized ant colony algorithm feature recognition method** [14133-24]
- 14133 16 **A formal logic for verifiable and explainable AI decision-making** [14133-26]
- 14133 17 **Optimization of quantum neuron based on repeat-until-success circuit** [14133-29]
- 14133 18 **A hierarchical installation-trajectory co-optimization method for cost-efficient acquisition of partial discharge ultrasonic signals** [14133-33]
- 14133 19 **Research on zero trust security architecture and continuous authentication mechanism for cloud platform networks** [14133-35]
- 14133 1A **Rent prediction based on multiple linear regression model** [14133-46]
- 14133 1B **The application of mathematical and algorithmic pathways in optimizing professional cluster evaluation system** [14133-51]

- 14133 1C **Intelligent cane fall detection method combining multilevel threshold and interactive confirmation mechanism** [14133-52]
- 14133 1D **Research on cross-operating system and cross-CPU compatible technologies for application software** [14133-54]

FAULT DIAGNOSIS AND TARGET DETECTION

- 14133 1E **Finite element analysis of sealing plug in oil inlet shaft** [14133-2]
- 14133 1F **Intelligent fault diagnosis for home appliances using acoustic-vibration feature fusion and sparse representation** [14133-7]
- 14133 1G **A rotating machinery fault sound source localization method based on adaptive modal decomposition and beam-forming** [14133-9]
- 14133 1H **High-reliability and low-latency strategies in 5G network slicing** [14133-11]
- 14133 1I **Multi-object detection and tracking in deep space background** [14133-13]
- 14133 1J **Identification of environmental impacts on GNSS observations based on intrinsic decomposition model** [14133-14]
- 14133 1K **Assessment of lateral collision risks in integrated airspace routes based on human-factor reliability** [14133-20]
- 14133 1L **Study on the characteristics of cloud base height detected by spaceborne lidar** [14133-30]
