

PROCEEDINGS OF SPIE

***Fifth International Conference on  
Optics, Computer Applications,  
and Materials Science  
(CMSD-V 2025)***

**Ramazon Tolibjon Abdullozoda  
Arthur Gibadullin**  
*Editors*

**22–24 December 2025  
Dushanbe, Tajikistan**

*Organized by*  
Tajik Technical University named after Academician M.S. Osimi (Tajikistan)

*Published by*  
SPIE

**Volume 14135**

Proceedings of SPIE 0277-786X, V. 14135

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Optics, Computer Applications, and Materials Science (CMSD-V 2025)*, edited by Ramazon Tolibjon Abdullozoda, Arthur Gibadullin, Proc. of SPIE 14135, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## OPTICS AND MATERIALS SCIENCE

---

- 14135 02 **Spindle bearings fault diagnosis in manufacturing equipment using a one-dimensional convolutional neural network** [14135-5]
- 14135 03 **Mechanochemical Diels-Alder reactions of benz(a)anthracene with tetracyanoethylene and 4-phenyl-1,2,4-triazoline-3,5-dione under impact force and shear stress** [14135-8]
- 14135 04 **Selection of derivatization conditions for the determination of bisphenols by gas chromatographic determination with mass spectrometric detection** [14135-19]
- 14135 05 **Enhancing the operational reliability of unmanned aerial vehicles in northern conditions** [14135-28]
- 14135 06 **Application of an enhanced RANSAC method for accurate weld seam point cloud** [14135-56]
- 14135 07 **Cubic B-spline-based trajectory planning for robotic welding of curved surfaces** [14135-63]

---

## INFORMATION TECHNOLOGY

---

- 14135 08 **An approach to digital processing of interference patterns to enhance their informative value** [14135-2]
- 14135 09 **Evaluation of the algorithm and method qualitys for portrait photographs colorization** [14135-3]
- 14135 0A **Comparative analysis of models for extracting key legal entities from court decisions** [14135-4]
- 14135 0B **Software implementation of molecular clock and deoxyribonucleic acid sequencing methods** [14135-6]
- 14135 0C **Optimizing task scheduling with a genetic algorithm in Python** [14135-7]
- 14135 0D **Design and evaluation of an artificial intelligence-based digital twin for industrial manufacturing optimization** [14135-9]
- 14135 0E **Application of machine learning models for predictive maintenance in industrial production systems** [14135-10]

- 14135 OF **Models and architectures for communication between patients and adaptive smart medical wards** [14135-11]
- 14135 OG **Enhancing industrial cybersecurity efficiency through the integration of neural networks and ai-based threat detection technologies** [14135-12]
- 14135 OH **Applied use of Wolfram Mathematica and Python software for computer modeling of functional food recipes** [14135-13]
- 14135 OI **Modeling and analysis of a quantized median filtering method for digital image denoising** [14135-14]
- 14135 OJ **Advance in robot navigation over rough terrain using multimodal LiDAR and camera data** [14135-16]
- 14135 OK **Complex structure of geometric system and method of geometric modeling** [14135-17]
- 14135 OL **Algorithm for recognizing geometric objects in video images using the Haar Cascade method** [14135-18]
- 14135 OM **Improving morphological image processing based on fuzzy set theory** [14135-20]
- 14135 ON **Using vision-language models for semantic search of a graphical user interface fragment on request** [14135-21]
- 14135 OO **Methodology of morphological analysis of intelligent systems at the stage of their design** [14135-22]
- 14135 OP **The use of 3D simulation for development of functional control elements for aviation simulators and semi-physical modeling complexes** [14135-23]
- 14135 OQ **On the uniqueness and duplication of bus routes in the urban transport infrastructure** [14135-24]
- 14135 OR **Algorithms for the synthesis of adaptive control of multidimensional dynamic objects based on the input and output parameters of systems** [14135-30]
- 14135 OS **Algorithms for the synthesis of the optimum observer for stationary linear systems with delay** [14135-35]
- 14135 OT **Intelligent question-answering system for business documentation based on large language model and retrieval-augmented generation technology** [14135-36]
- 14135 OU **Modeling cryptographic authentication approaches for automated trusted access management in cyberphysical systems** [14135-37]
- 14135 OV **Gas-analyzing sensor for detecting leaks of rocket fuel components** [14135-38]
- 14135 OW **Improving the accuracy of auto service simulation models through three-level vehicle arrival generation** [14135-40]

- 14135 0X **A model for integrating customer and contractor information systems for data exchange during digitization of design documentation [14135-41]**
- 14135 0Y **A blockchain-based precision subsidy authentication model for students using an improved practical byzantine fault tolerance consensus algorithm [14135-43]**
- 14135 0Z **A digital framework for monitoring the effectiveness of higher education programs [14135-44]**
- 14135 10 **Formal model and algorithm for transaction integrity control in distributed financial information systems [14135-45]**
- 14135 11 **A hybrid neuro-fuzzy-evolutionary framework for multivariate time series forecasting: convergence analysis and error bounds [14135-46]**
- 14135 12 **Event-driven detail enhancement of low-light images via frequency-domain fusion [14135-50]**
- 14135 13 **Physically based rendering-enhanced real-scene 3D modeling framework for complex curved urban buildings [14135-51]**
- 14135 14 **Lightweight CNN with Mixup and CutMix data augmentation for Alzheimer's disease magnetic resonance imaging classification [14135-55]**
- 14135 15 **Reinforcement learning-based framework for optimizing task allocation and service migration in edge-cloud systems [14135-57]**
- 14135 16 **Modeling and hardware realization of optogenetically modulated neuronal networks integrating Hodgkin-Huxley and Channelrhodopsin-2 models [14135-58]**
- 14135 17 **Adversarial imitation learning based on a high sample efficiency framework [14135-59]**
- 14135 18 **Surface reconstruction of 3D point clouds based on greedy projection triangulation [14135-60]**
- 14135 19 **Design and implementation of an enhanced interval geometric encoding volume-based stereo matching network [14135-61]**
- 14135 1A **Upper confidence bound for efficient exploration in deep reinforcement learning [14135-62]**

## **MATHEMATICAL MODELING**

---

- 14135 1B **Mathematical optimization framework for plant species selection in ecological restoration of the Aral Sea region** [14135-15]
- 14135 1C **A mathematical model of potato cutting with comb knives** [14135-26]
- 14135 1D **Mathematical modeling of ambiguity domains in the aerodynamic pendulum model** [14135-34]
- 14135 1E **Mathematical analogy of the propagation of mechanical motion in a robotic structure through the model of the equation of thermal conductivity** [14135-49]
