

PROCEEDINGS OF SPIE

***International Conference  
on Imaging Processing for  
Medical-Oriented Recognition  
(IPOR 2025)***

**Por Lip Yee  
Thippa Reddy Gadekallu**  
*Editors*

**27–29 November 2025  
Kuala Lumpur, Malaysia**

*Organized by*  
University of Malaya (Malaysia)

*Sponsored by*  
AEIC—Academic Exchange Information Centre (China)

*Published by*  
SPIE

**Volume 14160**

Proceedings of SPIE 0277-786X, V. 14160

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Imaging Processing for Medical-Oriented Recognition (IPOR 2025)*, edited by Por Lip Yee, Thippa Reddy Gadekallu, Proc. of SPIE 14160, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## MEDICAL IMAGE ANALYSIS AND SEGMENTATION

---

- 14160 02 **ResAttProtoNet: a meta-learning-based attention fusion network for few-shot strabismus detection** [14160-5]
- 14160 03 **Attention-enhanced deep learning framework for coronary CPR image plaque analysis** [14160-29]
- 14160 04 **Magnetic resonance spectroscopy quantification based on variable baseline and cascaded optimization** [14160-4]
- 14160 05 **Adaptive 2D entropy maximization via intensity-based multiscale thresholding with right-pixel exclusion** [14160-8]
- 14160 06 **MDCA-UNet and M-Tr-ERFFA-UNet: advanced U-Net architectures with multi-scale attention and transformer for brain tumor MRI segmentation** [14160-39]
- 14160 07 **MSAM-UNet: a multiscale and dual cross-attention Mamba network for COVID-19 CT lesion segmentation** [14160-17]
- 14160 08 **An improved Traffic Jam Optimizer for deep learning hyperparameter optimization in breast cancer classification** [14160-35]
- 14160 09 **A multi-label chest x-ray image classification method based on contrastive learning and data augmentation** [14160-38]
- 14160 0A **Enhanced YOLOv8n-seg is used for the research on spinal segment segmentation based on machine vision within the surgical visual field** [14160-16]
- 14160 0B **Lightweight diffusion fusion with multiscale cross-attention for multimodal medical image classification in Alzheimer's disease** [14160-25]
- 14160 0C **Superpixel-regularized Swin Transformer for vessel segmentation in pancreatic cancer histological images** [14160-19]
- 14160 0D **Multimodal MRI fusion using machine learning for early diagnosis of Alzheimer's disease** [14160-32]
- 14160 0E **V-KAN UNet: a multi-scale medical image segmentation model based on tokenized knowledge perception and fusion attention** [14160-41]
- 14160 0F **A feature extraction-based approach for acupoint identification using temperature and electrical impedance signals** [14160-43]

- 14160 OG **ThyroidGAN: adaptive gating and regional weighting for unsupervised staining translation in thyroid pathology images** [14160-40]
- 14160 OH **Research on automatic grading of motor dysfunction in stroke patients based on MRI images** [14160-7]
- 14160 OI **MSCA-UNet: multiscale cross-axis U-Net with dual normalization for whole heart segmentation** [14160-20]

---

#### MEDICAL IMAGING AND CLINICAL APPLICATIONS

---

- 14160 OJ **Research advances in photodynamic therapy for port-wine stains** [14160-36]
- 14160 OK **Measurement and detection method for metrological parameters of angiography high-pressure injection equipment** [14160-12]
- 14160 OL **A blood glucose monitoring and prediction system based on light source compensation** [14160-10]
- 14160 OM **Trends in research 3D freehand ultrasound reconstruction** [14160-30]
- 14160 ON **A prediction model for pulmonary ventilation function based on multisource CT image features** [14160-24]
- 14160 OO **The reproductive system protein ZP3 is a potent and novel target for cancer immunotherapy** [14160-18]
- 14160 OP **Design of a portable human physiological signal monitoring station** [14160-11]
- 14160 OQ **Design and validation of a multifunctional EEG** [14160-37]
- 14160 OR **BiLGA-DTI: bidirectional global-local attention-based drug-target interaction prediction model** [14160-26]
- 14160 OS **The value of spectral CT parameters in differentiating acute and chronic pulmonary embolism** [14160-6]
- 14160 OT **ECG signal acquisition and analysis system based on ADS1298 and ESP32-S3** [14160-23]
- 14160 OU **Computer-aided analysis of the efficacy of chronic kidney disease treatment based on spleen-kidney correlation theory and corresponding acupuncture method** [14160-31]
- 14160 OV **A literature visualisation analysis of traditional Chinese medicine policies using CiteSpace** [14160-9]
- 14160 OW **Sparse graph embedding neural network based on self-attention mechanism for major depressive disorders classification** [14160-1]

- 14160 0X **Upper computer development for bio-impedance and electrochemical impedance measurement using AD5941 chip** [14160-22]
- 14160 0Y **Bio-impedance and electrochemical impedance measurement with AD5941** [14160-21]
- 14160 0Z **Engineering high-affinity ociperlimab mutants through structure-based antibody optimization** [14160-13]
