SPIE

Volume 14169

Proceedings of SPIE 0277-786X, V. 14169

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventh Asia Digital Image Processing Conference (ADIP 2025)*, edited by Jungpil Shin, Proc. of SPIE 14169, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DIGITAL IMAGE DETECTION MODEL AND OPTIMIZATION ALGORITHM

- 14169 02 **AI-driven bolt tapping inspection: diagnosing looseness via Fourier-transformed vibration analysis with deep learning** [14169-5]
- 14169 03 **Road area detection using movable cameras on expressways** [14169-1]
- 14169 04 **Vision-based automatic estimation of smoke opacity levels** [14169-7]
- 14169 05 **RDSNet: lightweight object detection model based on reparameterizable dilated large kernel convolution and channel shuffle convolution** [14169-19]
- 14169 06 **Optimizing YOLOv5 through systematic data augmentation** [14169-14]
- 14169 07 **YOLOv5 image-based detection of durian patch canker diseases** [14169-22]
- 14169 08 **3D MRI-based Alzheimer's disease detection using modified 3D ResNet framework** [14169-2]
- 14169 09 **Improvement of blood cell detection using GAN-augmented synthetic images** [14169-21]
- 14169 0A **ClearSight: a hierarchical dual-architecture framework for forensic-quality restoration of surveillance footage degraded by rain and glare** [14169-16]
- 14169 0B **Automated disease detection in Omani fruit trees** [14169-17]

AI-BASED INTELLIGENT IMAGE ANALYSIS AND COMPUTER VISION

- 14169 0C **Bi-energy curve equalization for enhancement of images** [14169-3]
- 14169 0D **Fine-grained fitness virtual try-on based on multiparser and variational autoencoder** [14169-4]
- 14169 0E **Dynamic target measurement method based on positive and negative gray codes and phase shift misalignment correction** [14169-6]
- 14169 0F **Region-controllable color transfer using ModFlows and SAM2** [14169-8]
- 14169 0G **AuroraLeaf: utilizing artificial intelligence for digital heritage preservation and ethnobotanical identification** [14169-11]

- 14169 OH **A sparse view high fidelity 3D reconstruction method for dental crowns** [14169-13]
- 14169 OI **Comprehensive evaluation framework for the robustness of visual recognition models**
[14169-10]
- 14169 OJ **The end-to-end gaze following method in UAV-360 images** [14169-12]
- 14169 OK **Benchmarking vision–language models for handwritten drug name recognition** [14169-15]
- 14169 OL **Extraction of global image feature and object feature using pre-trained transformer models for unsupervised fine-grained image retrieval** [14169-23]
- 14169 OM **Exploring the application of AI image generation in agricultural product brand promotion: a case study of Hami melon** [14169-18]
