Inhalt/Content

Electric drives

The electric drive platform SELECT	1
C. Sasse, M. Berger, ZF Friedrichshafen AG, Schweinfurt	
Disconnect Systems in Battery Electric Vehicles	11
M. Kessler, GKN Driveline International GmbH, Lohmar, Germany; T. Messner, GKN Driveline Bruneck AG, Bruneck, Italy	
AVL High Efficiency EDU	23
C. Schmidt, Inigo Garcia de Madinabeitia Merino, N. De Kerpel, AVL List GmbH, Graz, Austria	
TREMEC 500hp EDU	39
J. Bally, TREMEC, Zedelgem, Belgium	

Development of drive concepts

BorgWarner's Next Generation Electric Drive Unit Development Based on Multiphysics Numerical Analysis	49
E. Bourniche, P. David, A. Bossi, A. Leblay, BorgWarner, Hautcharage (LU); A.Mateski, J. Deussen, M. Ishihara, BorgWarner, Auburn Hills, MI, USA	
Multi-System-Integration Trend in modern Drivetrain Design	65
W. Vallant, P. Schatz, AVL List GmbH, Graz, Austria; K. Berberich, M. Deiml, AVL Software and Functions GmbH, Regensburg	
Holistic, Multi-criteria Synthesis and Optimization of Electric Drive Units	75
C. Reus, S. Rinderknecht, Technical University of Darmstadt; P. Strobl, K. Stahl, Gear Research Center (FZG), Department of Mechanical Engineering, School of Engineering and Design, Technical University of Munich	

Customer, market, sustainability

Path to ZERO	91
N. Magnusson, Ovako Group, Sweden; C. Gallo, Ovako GmbH; S. Czezor, Ovako GmbH	
Potential for the sustainability of traction drives through recycling of active materials	107
J. Lanzer, Mercedes-Benz AG, Stuttgart	

7 Thermal management

- Optimizing eMotor Thermal System in Early Design Phase** 117
D. Fulton, BorgWarner Inc., Indiana, USA
- Battery Performance Benefits through Immersive Thermal Management** 129
V. Null, F. Zhang, Shell Global Solutions Germany GmbH, Hamburg
- Designing Predictive Battery Heating Systems for an Electric Vehicle
by utilizing Cloud Data** 149
R. Schilling Johnson Volkswagen AG, Wolfsburg;
M. Henke, University of Braunschweig

7 Battery

- Sustainable batteries: From scalable module design for new cell
chemistries to intelligent BMS and the optimal series product** 163
D. Wollschlaeger, hofer powertrain GmbH, Nürtingen

7 Inverter

- Ultimate EV efficiency with D³GaN – next level automotive
inverter solutions** 175
D. Liesabeths, W. Ness, H. Winter, W. Wondrak, VisIC Technologies Austria GmbH,
Vienna, Austria;
M. Deiml, AVL
- Intelligent Control of Traction Inverters through Deep Reinforcement
Learning for Lifetime and Efficiency Optimization** 185
J. Yu, A. Enzmann, T. Orlik, P. Alagarsamy, A. Avakian, N. Tashakor,
Volkswagen AG, Baunatal;
O. Wallscheid, University of Siegen
- AI-Assisted Surrogate Models for Multi-Objective Inverter Optimization** 197
B. Esser, D. Patani, K. Shri, B. Arndt, A. Avakian, N. Tashako, Volkswagen AG;
Jens Friebe, University of Kassel

7 Hybrid transmissions

- 8G-eDCT – Intelligent hybridization for the MMA architecture** 211
A. Harsch, R. Ditton, J. Becker, Mercedes-Benz AG, Stuttgart
- DE4LoRa – Optimized Range Extended Four-Speed Two-Drive-Powertrain** 227
A. Kappes, S. Rinderknecht, Technical University of Darmstadt
- The next-gen two-speed Dedicated Hybrid Transmission for B- and C-class vehicles** 249
M. Lutz, hofer powertrain GmbH, Nürtingen

7 Digitalisation & AI

- Optimization of the Drivetrain Design of modular wheel-hub driven Vehicles for Fleets in Urban Areas** 259
T. Peichl, S. Rinderknecht, Technical University of Darmstadt
- Utilizing Unsupervised Learning for the Detection of Current Sensor Faults in Electric Vehicle Drivetrains** 275
J. Sautter, A. C. Kulzer, Institute of Automotive Engineering (IFS), University of Stuttgart, Stuttgart;
P. Wagner, Robert Bosch GmbH, Schwieberdingen
- Agile Electric Powertrain Development by AI-Based Design Optimization** 291
D. Lechleitner, M. Hofstetter, Graz University of Technology Graz, Austria

7 Simulation & Testing

- End-to-End – Virtual Release for Powertrain-Components and Systems** 307
René Honcak, ZF Friedrichshafen AG, Munich
- Advantages of combining simulation and testing in vibration analysis using the example of an E-Drive** 317
J. Latsch, H. Fritsch, K. Sitting, M. Breitling, H. Decker, D. Schuster, Volkswagen AG, Baunatal;
R. K. Schulz, University of Kassel, Kassel

The MOVERLab Environment as a Test Bench Demonstrator	329
D. Fischer, K. Schmidlin, L. Freyer, K. Wolter, K. Bause, IPEK – Institute of Product Engineering at Karlsruhe Institute of Technology (KIT), Karlsruhe	

Thermography for condition monitoring of electric machines	345
S. Schamberger, H.-C. Reuss, M. Jaksch, FKFS - Research Institut for Automotive Engineering and Powertrain Systems, Stuttgart	

7 Gear manufacturing

Global Sensitivity Analysis of Transmission Manufacturing Tolerances for Electric Vehicles	359
F. Oberneder, T. Papadopoulos, P. Strobl, M. Otto, K. Stahl, Gear Research Center (FZG), Department of Mechanical Engineering, School of Engineering and Design, Technical University of Munich	

Superfinished tooth flank surfaces – potential evaluation of efficiency advantages	379
A. Mann, C. Westphal, C. Brecher, Laboratory for Machine Tools and Production Engineering WZL, RWTH Aachen University	

Geometry calculation and design of forged differential bevel gears	401
F. Mieth, FVA GmbH, Frankfurt	

7 Lubricants

Pushing the Viscosity Boundaries of Electric Vehicle (EV) Lubrication – How Low Can You Go?	419
M. Jones, A. Eastwood, M. Gahagan, Lubrizol Limited, Derbyshire, UK	

Identifying Key Formulation Levers for next-gen high-efficiency Axle oils	439
L. Leonhardt, Petronas Lubricants Deutschland GmbH, Heilbronn	

Transmission components

Braking Innovation: Research Approaches in the Context of Wet Vehicle Brakes 451

K. Völkel, Friedrich-Alexander-Universität Erlangen-Nürnberg;
L. Pointner-Gabriel, P. Strobl, K. Stahl, Gear Research Center (FZG),
Department of Mechanical Engineering, School of Engineering and Design,
Technical University of Munich

Development of an Asymmetric Limited Slip Differential (LSD) for Enhanced Vehicle Performance and Compatibility with Electric Vehicles 461

Y. Kawai, N. Uchida, K. Yamazaki, GKN Driveline Japan Limited, Tochigi-city, Japan;
T. Sugiyama, T. Oikawa, E. Cho, GKN Driveline Japan Limited, Tochigi-city, Japan;
A. Mair, GKN Driveline Bruneck AG, Bruneck, Italy

E-machine

Exploring the Potentials of Virtual (Pre-)Development in Software Applications: From Thermal 1D Simulation to a Neural Network-Based E-Machine Temperature Model 469

N. Wiese, P.-O. Gronwald, Volkswagen AG, Wolfsburg

How to Design the Optimal Bearing Concept for Rotor and Input Shafts of an Electric Powertrain? 491

S. Schweins, SKF GmbH, Schweinfurt

Advancements in electric powertrain technologies: A focus on stator and winding technologies. 495

A. M. Silva, Continental Engineering Services – Porto, Portugal;
A. Mrozek, A. Brauser, N. Cheeseman, Continental Engineering Services –
Lichfield, UK

Market, customer, regulations, environment, sustainability

Driveshaft Design for Sustainability 507

A. Berger, O. Eryilmaz, C. Lindlahr, S. Worrall, GKN Automotive GmbH, Lohmar

Minimizing Scope 3 Emissions by Electric Powertrain Design Optimization 523

D. Lechleitner, M. Hofstetter, M. Hirz, Graz University of Technology, Graz, Austria

7 Inverter

Multi-level Inverter for Traction Drive application from BorgWarner 537
A. Apelsmeier, BorgWarner, Nuremberg; J. Deussen, A. Mayer,
BorgWarner, Auburn Hills, USA

3D EMC Simulation of Power Electronics for E-Drives 553
F. Petrossow, S. Agca, N. Tashakor, B. Arndt, Volkswagen AG, Baunatal

7 NVH

**Acoustics of the electric drivetrain:
Optimized design as an enabler for active sound design** 561
M. Zinner, ARRK Engineering, Munich; A. Rotteveel, MdynamiX AG, Munich

The key to superior NVH 577
M. Franck, FEV Europe GmbH, Aachen

From the test bench to the virtual twin: NVH-appropriate controller design 595
M. Janousek, D. Werner, AVL Deutschland GmbH, Munich;
M. Schrottner, AVL List GmbH, Graz, Austria

7 Poster Exhibition

**Deep reinforcement learning for the automated synthesis
and optimization of new electric powertrain topologies** 609
Y. Teng, J. van Kampen, T. Hofman, Eindhoven University of Technology

Innovations for e-mobility 611
M. Ziffling, Zeller + Gmelin GmbH & Co. KG, Eilingen/Fils

**From concept to implementation: the role of rapid control prototyping
in the development of electric machines** 613
A. Fiedler, dSPACE GmbH, Paderborn

**Modularization of Drivetrains: Adaptability for Technological Innovations,
Dynamic Customer Needs, and Changing Market Conditions
for Maximizing Usability in Different Usage Phases** 615
R. Fehrenbacher, K. Bause, IPEK – Institute of Product Engineering at
Karlsruhe Institute of Technology (KIT), Karlsruhe

Structural Assessment of Printed Circuit Board Assemblies Under Consideration of Static-, Vibrational and Thermal Loads Based on Finite Element Methods	617
W. Hinterberger, Engineering Center Steyr GmbH & Co. KG, St. Valentin, Austria	
Steering on the cyber-physical test bench in the context of automated driving	619
D. Fischer, Y. Weber, J. Freyer, K. Bause, T. Düser, IPEK – Institute of Product Engineering at Karlsruhe Institute of Technology (KIT), Karlsruhe	
Lubricants in the Powertrain – Challenges, Concepts and Innovations	621
J. Wald, M. Strunk, C. Spaeth, TUNAP GmbH & Co. KG, Wolfratshausen	
Automation potential in digital powertrain design for electric commercial vehicles using Matlab Simulink	623
M. Siegel, L. Anderl, M. Wagensoner, HAW Landshut, Landshut	
The Application of the Digital Twin in Small-Batch Production Development	629
L. Anderl, M. Siegel, M. Wagensoner, HAW Landshut, Landshut	
Pushing the Boundaries at 48V with Multi Phase Drives: High Traction Power of 80kW and the Application of Ferrite Magnets and Aluminium Windings	637
S. Rossner, MOLABO GmbH, Ottobrunn
