# Content

Foreword 1

## AI and digitalization – Impact on the future of gears

---

Powered by AI – Leading the future of drive technology 3  
J. Reimann, J. Zundel, T. Sadek, Flender GmbH, Bocholt

## AI/ML-accelerated gear durability analysis within gear design optimization

---

AI/ML-accelerated gear durability analysis within gear design optimization 7  
M. Vivet, D. Park, A. Scheuer, Siemens Digital Industries Software, Leuven, Belgium

## Condition monitoring using AI

---

Early Detection of Critical Operating Conditions in Journal Bearings of Gearboxes Using Acoustic Emission and Machine Learning 25  
F. Wirsing, A. Saleh, G. Jacobs, D. Bosse, F. König, B. Lehmann, B. Klinghart, Institut für Maschinenelemente und Systementwicklung, RWTH Aachen University, Schinkelstraße 10, 52062 Aachen

Condition Monitoring and Remaining Useful Lifetime Prediction of a Worm Gear based on Simulative, Lazy Learning, and Deep Learning Methods 45  
F. Heiland, J. Schilling, R. Kollert, M. Götz, A. Keller, D. Katava, P. Rettenmeier, M. Werschler, IMS Gear SE & Co. KGaA, Donaueschingen

## Tooth root carrying capacity

---

Tooth root strength of different quenched and tempered steels for induction-hardened planetary pinions in wind turbine gearboxes 59  
S. Hendricks<sup>1,2</sup>, C. Westphal<sup>1,2</sup>, M. Davidovic<sup>1,2</sup>, T. Bergs<sup>2,3</sup>,  
<sup>1</sup>Laboratory for Machine Tools and Production Engineering (WZL) of RWTH Aachen University, Aachen, Germany;  
<sup>2</sup>Manufacturing Technology Institute MTI of RWTH Aachen University, Aachen, Germany;  
<sup>3</sup>Fraunhofer-Institute for Production Technology IPT, Aachen, Germany

## 7 Planetary gears: NVH

---

- Noise Reduction of two-stage Planetary Gear Set based on Multi-body Dynamics and Modal Acoustic Transfer Vector Simulations 71  
D. J. Min, H. Yoo, Hyundai Mobis, Yongin-si, Republic of Korea

## 7 Advancements in tooth root strength

---

- Size influence on tooth root strength based on testing and simulation 87  
J. Meis, N. Lukaschik, Flender GmbH, Bocholt

## 7 Gear analysis & simulation

---

- Virtual Optimization of Gearbox Oiling – How Reliable are the Results? 105  
M. Reichl, K. Schierl, AVL Deutschland GmbH, München

- Detailed and efficient transient simulations of wave gears 115  
H. Grillenberger, H. Golbach, M. Kittsteiner, V. Makhavikou, Schaeffler Technologies AG & Co KG, Herzogenaurach, Germany; L. Ronchiato, R. G. Parker, Redpoint Vibration, Reno, NV, USA

## 7 Advancements in NVH Simulation

---

- Efficient simulation procedure for NVH evaluation of bevel gear sets 123  
F. Rudolph, J. Kunert, SEW-EURODRIVE GmbH & Co KG, Bruchsal

- Frequency Response Analysis of Drivetrains based on an Iterative Approach for Efficient Prediction of System Responses 133  
S. Ebrahimi, S. Beermann, KISSsoft AG., Bubikon, Switzerland; A. Möstl, KUMERA Antriebstechnik GmbH, Graz, Austria

- Holistic and statistical approach to the impact of manufacturing deviations on the transmission error, structural vibrations and the acoustic behavior of gearboxes 147  
D. Tazir, FVA-GmbH, Frankfurt; D. Werner, AVL Deutschland GmbH, München; B. Abert, FVA-GmbH, München

## 7 Efficiency and friction

---

### **A New Approach to Friction Calculation of Internal Gears** 167

C. Paschold, T. Lohner, K. Stahl, Technical University of Munich, School of Engineering and Design, Department of Mechanical Engineering, Gear Research Center (FZG), Garching, Germany

### **Proposal of Low Friction Loss Gear Surface Based on Correlation Map between Surface Roughness and Friction Coefficient** 175

Y. Shishihara, Y. Otaki, H. Maki, JTEKT Corporation, Osaka, Japan; A. Hase, Saitama Institute of Technology, Saitama, Japan

### **Quantitative Analysis of Churning in Dip-Lubricated Gearboxes Through Computer Vision Techniques** 189

B. Cardozo, R. Rego, R. Metzger, Aeronautics Institute of Technology, São José dos Campos, Brazil

## 7 Damage detection

---

### **Electric Impedance-Based Detection of Surface Deviations in Helical Gear Meshes** 207

M. Hausmann, E. Kirchner, Fachgebiet für Produktentwicklung und Maschinenelemente, TU Darmstadt, Germany

### **Gear Damage Detection in Planetary Gearboxes** 233

L. Merkle, L. Binanzer, M. Dazer, University of Stuttgart, Institute of Machine Components, Stuttgart, Germany

## 7 Tooth flank load capacity

---

### **Micropitting behavior of spur gears in eDrives with a holistic thermal management** 239

M. Yilmaz, B. Heine, F. Zerulli, J. König, D. Fuchs, ZF Friedrichshafen AG, Friedrichshafen, Germany

## 7 Gear failure prediction using AI

---

**Pitting Damage 2D-Position Detection System on Gear Surface using Deep Learning** 249

C. Zhu, S. Yin, E. Tanaka, Waseda University, Kita-kyusyu, Japan;  
K. Osawa, Kyushu University, Fukuoka, Japan;  
M. Nakasako, National Institute of Technology, Kure College, Hiroshima, Japan;  
K. Ikejo, Hiroshima University, Hiroshima, Japan

## 7 Worm gears: Lubrication and friction

---

**Meshing performance investigations on a novel pointcontact worm face gear drive based on curve meshing theory – Conference Proceedings** 263

C. Dou, Y. Chen, J. Gao, W. Luo, B. Chen, State Key Laboratory of Mechanical Transmission for Advanced Equipment, Chongqing University, Chongqing, China

## 7 Lubrication

---

**Consideration on Lubrication of High-Speed Rotating Gear (Second Report) Case Study of Efficient Tooth Surface Lubrication Method** 275

M. Ohno, K. Suzuki, T. Hara, K. Sakai, K. Sakai, J. Yamada,  
UNIVANCE CORPORATION, Washizu, Kosai-city, Shizuoka-Pref., Japan

**Metallocene Polyalphaolefin (PAO) base stock technology reduces friction, heat generation and increases efficiency in industrial gear applications** 283

S. Meinhardt, ExxonMobil Chemical Central Europe GmbH, Cologne, Germany;  
L. Bunting, ExxonMobil Oil Corp., Houston, USA; M. Fedotov, ExxonMobil, Prague, Czech Republic; E Geist, ESSO Deutschland GmbH, Hamburg, Germany

## 7 NVH

---

**Microgeometry optimization of an E-Drive Unit using system level multibody simulation for best NVH performance while mitigating the impact of manufacturing errors** 287

J. Verhoogen, D. Park, Siemens Industry Software, Leuven, Belgium;  
H. Xu, H.Y.I. Du, B. Li, General Motors, Warren, Michigan, USA

<b>Advancing Electric Powertrain NVH Design Through Transmission Error Correlation</b>	<b>303</b>
S. Magne, Valeo Power Division, Redditch, United Kingdom; X. Hauvette, Valeo Power Division, Amiens, France; B. Ravichandran, B. Charles, Valeo Power Division, Chennai, India	

## 7 Planetary Gears: Design

---

<b>Automation of high power density gearbox design encompassing layshaft and planetary gear train layouts across a wide range of operating conditions</b>	<b>319</b>
D. Park, A. Rezayat, Siemens Digital Industries Software, Leuven; Y. Gwon, Hyundai Motor Company, Gyeonggi-do; S. Popescu, Siemens Digital Industries Software, Brasov	

<b>Automated Transmission Design – Product Development Process for Industrial Transmissions!</b>	<b>335</b>
M. Heider, Renk GmbH, Augsburg; Dr.-Ing. M. Fromberger, Renk GmbH, Augsburg; B. Eng. R. Hafner, Renk GmbH, Augsburg	

## 7 Numerical simulation

---

<b>A study on the crack propagation in the tooth root and its consequences on the tooth root fracture lifetime</b>	<b>345</b>
L. Valsecchi, L. Bonaiti, Politecnico di Milano; S. Sartori, U. Mariani, Leonardo Elicotteri; C. Gorla, Politecnico di Milano	

<b>Simulative evaluation of heat transfer and surface temperature distribution of an industrial gear unit</b>	<b>361</b>
C. Kunik, C. Nau, T. Goldschmidt, SEW-EURODRIVE GmbH & Co KG, Bruchsal, Germany	

<b>Research on the Dynamic Characteristics of High-speed Thin-rimmed Gear Transmission Considering the Elastohydrodynamic Lubrication Contact</b>	<b>381</b>
J. Zheng, D. Qin, C. Liu, State Key Laboratory of Mechanical Transmission for Advanced Equipment, Chongqing University, Chongqing, China; J. Zhang, China North Vehicle Research Institute, Beijing, China	

## 7 Dynamic simulation

---

Research on vibration characteristics of gear systems with surface waviness based on LTCA method 391  
Wang, Li, Chongqing University, Chongqing

Nonlinear Dynamic Analysis of Herringbone Gears Under Time-Varying Backlash and Double-Sided Meshing Impact: A Theoretical and Experimental Study 407  
F.F. Liu, G. Liu, L. Liu, Northwestern Polytechnical University, Xi'an, P.R.China

## 7 Gear design: Special applications

---

World's most powerful gearbox with 47 MNm output torque Model-based design of a multi-motor drive and compensation of the effects of low natural frequencies and gear backlash 423  
F. Renger, T. Stöckl, RENK Test System GmbH, Augsburg, Germany

Research on the Loading Rate Dependence of Hysteresis in Small-Size Reducers 433  
G. Zuo, H. Cheng, Z. Shi, D. Cao, Beijing University of Technology, Beijing, China

## 7 Poster Exhibition

---

Investigation and rating of tribological effects on heat dissipation for electric vehicle gearbox 447  
B. Karba, Bursa Uludag University, Bursa, Valeo Power Division, Bursa/TURKEY;  
H. Cavus, U. Ciloglu, E. F. Yildirim, Bursa Uludag University, Bursa/TURKEY

## 7 Advancement in gear material

---

Gear Boxes for Food and Beverage Applications with sintered lubricant bound gears – A ready to go into Production Gear Box 467  
S. Vonderschmidt, R. Vonderschmidt, GEORGII KOBOLD GmbH & Co KG, Horb am Neckar, Germany

The Effect of Surface Instability on Rolling Contact Fatigue 479  
G. M.O. Gomes, N. Souza, R. Rego, Aeronautics Institute of Technology, São José dos Campos Brazil

## 7 Crossed axis gear & differential bevel gears

---

### Potentials of Enveloping Crossed Helical Gears 495

A. L. Kapelevich, AKGears, LLC, Shoreview, Minnesota, USA; Y. I. Safris, Alphaenco, Golden Valley, Minnesota, USA; J. Thomas, ZG Hypoid GmbH, Aschheim, Germany; C. Gosselin, Ph.D., P. Eng., Involute Simulation Softwares, Quebec, P. Quebec, Canada; W. Wagner, IMM, Dresden University of Technology, Dresden, Germany

### Tooth contact analysis on differential bevel gears in an elastic environment 509

F. Mieth, FVA GmbH, Frankfurt, Germany

## 7 Efficiency improvements

---

### A modified Back-to-Back geared Test-Rig for the study of splash and jet lubrication 523

L. Bonaiti, L. Valsecchi, C. Gorla, Politecnico di Milano, Dipartimento di Meccanica, Milano, Italy; S. Sartori, L. Alari, P. Pisani, U. Mariani, Leonardo S.p.A., Helicopter Division, Cascina Costa (VA), Italy

### Approach to determine quantitatively correct loadindependent power losses inside turbo gearboxes by flow simulation

### Combined meshless and mesh-based flow simulations 535

P. Neuenfeldt, J. Dorffer, A. Steurer, SADEN GmbH, Karlsruhe, Germany; P. Leoni, AP2L GmbH

### Gearbox efficiency of eDrives: theoretical influence of the lubricant viscosity, gear loss factor and tooth flank roughness on gearbox power losses 545

M. Yilmaz, M. Ayar, E. Ipek, I. Memet, B. Schwarz, F. Zerulli, J. König, ZF Friedrichshafen AG, Friedrichshafen, Deutschland/Germany

## 7 Poster Exhibition

---

### Diagnosing the Defects of the Gears of the Transmission Using Vibration Analysis and Validating it by the Graphs of the HÖFLER Gear Testing Machine 555

A. Mangouri, M. Akbari, S. Atazadeh, T.P.T. Co, Tabriz, Iran

<b>Transmission error prediction of gear pair considering constant and variable errors before the assembly line</b>	<b>571</b>
H. Cavus, B. Karba, Bursa Uludag University, Bursa/Turkey	
<b>A new automated highly efficient technology to accurately simulate gearbox lubrication and predict the load independent power losses</b>	<b>587</b>
F. Concli, University of Bozen-Bolzano, Bolzano, Italy	
<b>Introduction and investigation of a secondary profile angle on Hirth-Serrations</b>	<b>599</b>
T. Glaser, J.M. Voith SE & Co. KG, Heidenheim, Germany	
<b>Tooth form of a face spline based on a sine function</b>	<b>609</b>
T. Glaser, J.M. Voith SE & Co. KG, Heidenheim, Germany	
<b>Normal Method for Tooth Surface Generation of Helical Gear</b>	<b>615</b>
L. Jing <sup>a,b</sup> , X. Zihua <sup>b</sup>	
<sup>a</sup> Shanghai Bevelin Drives Technology Company, Shanghai, China	
<sup>b</sup> College of sciences, Shanghai University, shanghai, China	
<b>Error analysis for an improved dynamic model of the herringbone gear transmission system with manufacturing and assembly errors</b>	<b>619</b>
Y. Du, B. Yan, L. Liu, H. Zhang, G. Liu, Shaanxi Engineering Laboratory for Transmissions and Controls, Northwestern Polytechnical University, Xi'an, P.R. China	
<b>Modulation frequency identification of herringbone gear transmission system based on EEMD signal decomposition and Hilbert transform envelope demodulation: Theoretical and experimental investigation</b>	<b>633</b>
H. Zhang, R. Dai, Y. Du, G. Liu, Shaanxi Engineering Laboratory for Transmissions and Controls, Northwestern Polytechnical University, Xi'an, P.R. China; J. Gong, School of Mechanical Engineering, Xi'an Shiyou University, Xi'an, China	
<b>Development of split gear solution for a hybrid propulsion system in marine application</b>	<b>647</b>
T. Letzner, B. Scheffler, J. Reger, B. Somschor, ARRK Engineering GmbH, Munich, Germany	
<b>Improving the Efficiency of a Wind Turbine Gearbox with Modern CFD Methods</b>	<b>655</b>
M. Cardaun, M. Gebhardt, NGC Transmission Europe GmbH, Duisburg, Germany	

<b>Gear design optimization for a high-power density Electric Drive Unit Planetary architecture with three fixed-axis planetary gears</b>	<b>667</b>
M. Salica, S. Lazzaro, L. Galliano, M. Tessitore, FPT Industrial, Turin, Italy	
<b>Development of fatigue life prediction model for bearing with combined ball and roller-shaped rolling elements</b>	<b>671</b>
D. Kwon, D. Moon, B. Kim, Y. Park, Seoul National University, Seoul, South Korea	
<b>Effects of Different Manufacturing Processes on Tooth Root Stress Evaluated by a 3D-FE Method</b>	<b>679</b>
H. Cermak, KISSsoft AG – A Gleason Company, Bubikon, Switzerland; M. Trübswetter, Gleason Cutting Tools GmbH, München, germany	
<b>Estimation of Stiffness and Damping Coefficients in Two-Stage Helical Gearbox using Genetic Algorithm and Vibration Measurements</b>	<b>687</b>
D. Moon, B. Kim, D. Kwon, D. Im, Y. Park, Department of Biosystems Engineering, Seoul National University, Seoul, Republic of Korea; D. J. Min, Hyundai Mobis, Virtual Simulation Team, Gyeonggi-do, Republic of Korea	
<b>Efficient simulation strategy for predicting wear evolution in spur gears</b>	<b>695</b>
M. García, M. Escalero, Ikerlan SCoop, Arrasate, Spain; A. Fernández del Rincón, University of Cantabria, Santander, Spain	
<b>Plastic gears with non-constant curvature of the flank line Endurance and load testing: Wear, acoustic and optical evaluation</b>	<b>701</b>
C. Niedermeier, A. Wagner, Ostbayerische Technische Hochschule (OTH) Regensburg; E. Kirchner, Technische Universität Darmstadt, Germany	
<b>Experimental study on the temperature of POM gear at different load conditions</b>	<b>717</b>
D. Xin, Z. Shi, P. Zhang, Beijing University of Technology, Beijing, PRC/ Shenzhen Zhaowei Machinery & Electronics Co., Ltd, Shenzhen, PRC, China	
<b>Fatigue characterization of POM-C gears on an electrical closed loop test rigs</b>	<b>729</b>
L. Pagliari, A. Dian, F. Concli, Faculty of Engineering, Free University of Bozen-Bolzano, Bolzano, Italy; R. Longato, Longato Riccardo Srls, Rovigo, Italy	

## 7 Design methods

---

**An Improved Method for the Prediction of Contact Stress Failure Mode in Polymer Gears Using Finite Element Methods** 737

M. Weiss, S. Gill, C. Cholmeley, J. Elmquist, Victrex Manufacturing Limited, Thornton Cleveleys, UK

**Relationships between design, process trimming and acoustic properties exemplified by a worm gear** 755

G. Mauerlechner, B.Eng, Weißer + Gießhaber GmbH, Mönchweiler

**Novel methods for the prediction of tooth temperature and contact ratio under load** 769

T. Matsumura, K. Mioki, M. Kada, T. Fujita, Polyplastics Co., Ltd., Fuji-city, Japan; A. Pogačnik, Bauhar d.o.o., Bled, Slovenia

## 7 Testing

---

**Different Aspects of Testing Polymer Gears and Their Influence on the Load-Carrying Capacity** 785

S. Reitschuster, L. Wang, T. Tobie, K. Stahl, Gear Research Center (FZG), Technical University of Munich (TUM), Germany

## 7 Digital Design

---

**Low Cost, high performance & improved sustainability using the example of a small planetary gearbox** 795

T. Braun, G. Fuchs, IMS Gear SE & Co. KGaA, Donaueschingen, Germany

**Design and Fabrication of Soft Gears with a Stereolithography 3D Printer** 807

K. Osawa, T. Kido, Asst. D.S.V. Bandara, J. Arata, Kyushu University, Fukuoka, Japan; K. Ikejo, Hiroshima University, Higashi-hiroshima, Japan; A. Ueda, Amtec Inc., Osaka, Japan; E. Tanaka, Waseda University, Kita-kyushu, Japan

**Towards the use of ML/DL models for accelerated design of plastic gears and optimized material selection** 815

B. Černe, R. Kalister, D. Zorko, RD Motion d. o. o., Ljubljana, Slovenia

## 7 Material

---

**Consideration of strain rate dependency of plastics in gear design and materials testing**

**A discussion on the significance of gear testing methods**

833

J. Hausmann, Leibniz-Institut für Verbundwerkstoffe, Kaiserslautern, Germany;  
W. Kassem, SEW-Eurodrive GmbH & Co KG, Bruchsal, Germany;  
S. Schmidt, Leibniz-Institut für Verbundwerkstoffe, Kaiserslautern, Germany;  
O. Koch, RPTU University of Kaiserslautern-Landau, Germany

**Advances in Polyacetal Materials for Gears Fatigue prediction with comparative and simulative approachess**

847

P. Leuerer, Delrin Deutschland GmbH, Eschborn Germany;  
R. Ratnagiri, DELRIN USA LLC, Wilmington DE USA;  
A. Lovekar, Delrin Delrin India, Private Limited, Pune, India

## 7 Tribosystem

---

**Wear Resistant PFAS-free Material with High Heat-resistant Polyamide PA9T**

867

M. Saikusa, T. Shigematsu, Kuraray CO., LTD., Tokyo, Japan

## 7 Wear

---

**System for automated gear wear measurement**

879

N. Osolnik, M. Kalin, Laboratory of tribology and interface nanotechnology (TiNT), Faculty of mechanical engineering, University of Ljubljana, Slovenia

**Predicting abrasive wear of reinforced thermoplastic spur gears**

889

B. van Wissen, L. Pastukhov, R. Megens, A. Hasanovic, Envalior Research and Technology, Geleen, Netherlands

**Analysis of wear emissions in high-performance bio-based epoxy GFRP laminated composite gears**

901

A. Durjava, Faculty of Mechanical Engineering University of Ljubljana, Slovenia

## 7 Geometry

---

**Consideration of the Challenges and Possibilities of Flank Form Modifications on Plastic Gears** 913

M. Koop, C. Wirth, MAHLE ZG Transmissions, Eching, Germany;  
C. Kötz, E. Tründelberg, MAHLE ZG Transmissions, Dresden, Germany

**Optimisation of the tooth root fillet of plastic gears** 927

Ha. Dennig, S. Düzel, R. Eberlein, S. Winterberg, Zurich University of Applied Sciences, Winterthur, Switzerland

## 7 Finite element methods

---

**Viscoelastic material model for a multiphysics simulation of short fibre reinforced plastic gears** 945

V. Schröder, O. Koch, RPTU University of Kaiserslautern-Landau, Germany

**Finite Elemente Analysis for microgeometry optimization of spur gears for noise- and fatigue improvement** 959

T. Trietz, H. Schneider, A. Horst, J. He, Minebea-Mitsumi Tech Center Europe (MTCE GmbH), BLDC-Dept., Villingen-Schwenningen, Germany

**An Automated Process to create Finite Element Meshes of Gearwheels out of Scanned Measurement Data for the Simulation of Gears** 969

E. Stoppel, M. Dold, M. Cvartin, IMS Gear SE & Co. KGaA, Donaueschingen, Germany

## 7 Challenges in e-mobility: NVH and roughness

---

**Robust product design and process parameters with engineering AI Practical example of NVH/acoustics in e-transmission** 979

F. Thurner, P. Stirnweiß, Contech Software & Engineering GmbH, Fürstenfeldbruck, Germany

**Quiet BEV Gears: Innovative Material and Design Solutionn** 987

P. Jonnalagadda, P. Kauffmann, P. de Oliveira Löhner, Johnson Electric, Aachen, Germany

**Optimizing Gear Microgeometry for E-Mobility: Metrological Requirements and the Need for Revised Specifications** 999

B. Brodmann, OptoSurf GmbH, Ettlingen, Germany; M. Wand, Mahr GmbH, Göttingen, Germany

## 7 Process integrated quality inspection

---

**Analysis of the influencing variables for tool condition monitoring during gear hobbing** 1013

S. Hendricks<sup>1,2</sup>, M. Davidovic<sup>1,2</sup>, T. Bergs<sup>1,3</sup>,

<sup>1</sup>Manufacturing Technology Institute MTI of RWTH Aachen University, Aachen, Germany;

<sup>2</sup>Laboratory for Machine Tools and Production Engineering (WZL) of RWTH Aachen University, Aachen, Germany;

<sup>3</sup>Fraunhofer-Institute for Production Technology IPT, Aachen, Germany

## 7 Improved gear performance: Material and quality inspection

---

**Relevance of case-hardening depth on gear performance, challenges on manufacturing and evaluation of big gears** 1033

A. Okariz, A. Fernández, Gearbox by Gamesa (Siemens Gamesa), Zamudio, Spain

**Combining Photogrammetric Methods with TCA for Enhanced Quality Assurance of Gearboxes** 1045

C. van Oss, M. Hardner\*, S. Holtzhausen, S. Schumann, B. Schlecht,

IMM - Institute of Machine Elements and Machine Design, IPF – Institute of

Photogrammetry and Remote Sensing, Technische Universität Dresden, Germany

## 7 Special machining

---

**New Rolling Machine for Large Gear Applications Conference Proceedings** 1059

M. Milbrandt, M. Lahl, U. Hellfritsch, T. Clausmeyer, V. Kräusel, M. Dix,

Fraunhofer IWU, Chemnitz, Germany

## 7 Additive manufacturing: Improved operational behavior

---

**Fatigue Performance Characterization of Dievar® Gear Teeth Manufactured by Laser-Powder Directed Energy Deposition** 1077

A. Isaacson, M. E. Wagner, C. Wassel, The Pennsylvania State University, Gear Research Institute, State College, PA, USA;

D. Montoya-Zapata, M. Azpaleta, Etxetar, Elgoibar, Gipuzkoa, Spain

## **High-Damping Lightweight Binder Jetting Gear Design** 1097

G.Guimarães, M. Fernandes, R. Rego, A. Faria, Aeronautics Institute of Technology, Praça Marechal Eduardo Gomes, 50, 12228-900 São José dos Campos, Brazil;  
L. Klee, E. Breuer, C. Westphal, T. Bergs, RWTH Aachen University, Aachen, Germany

## **New processes for cutting of bevel and face gears**

---

### **Cutting method using a scraping-cutter for involute conjugate gears including face gears** 1113

N. Maeda, Ogasawara Precision Laboratory LTD, Japan;  
S. Kurokawa, Kyushu University, Japan

### **Feed Rate Improvement for Face-Milled Bevel Gears on a CNC Bevel Gear-Cutting Machine** 1123

Y. Shih, B. Sheen, B. Lee, National Taiwan University of Science and Technology, Taipei, Taiwan; Y. Lee, National United University, Miaoli, Taiwan;  
K. Chen, J. Hsu, Z. Fong, National Chung Cheng University, Chia-Yi, Taiwan

## **Micro geometry of gears**

---

### **A manufacturable higher-order tooth flank modification for enhanced bevel gear performance** 1139

E. Grabovic, A. Artoni, M. Gabiccini, Università di Pisa, Pisa, Italy

## **Material quality and heat treatment**

---

### **Form-irregularity of crater-expression of Debye-ring at Xray diffraction measurement for checking gear steel quality** 1151

A. Kubo, RIAS (Research Institute for Applied Sciences);  
M. Nagae, RIAS Kyoto, Japan

### **Eliminating Manufacturing Steps by Alloying** 1167

E. Löthman, P. Ölund, Ovako Sweden AB, Hofors, Sweden;  
C. Gallo, Ovako GmbH, Erkrath, Germany

### **Numerical prediction of hardness and residual stress in induction hardened 42CrMo4 steel gears** 1179

U. Segurajauregi, A. Goñi, M. Areitioaurtena, M.J. Cabello, Ikerlan Technology Research, Arrasate-Mondragon, Spain;  
J.A. Esnaola, Mondragon Unibertsitatea, Arrasate-Mondragon, Spain

## 7 Additional Paper

---

**Influences and special features of the determination of characteristic values of plastic gears using grease according to VDI 2736: What is really happening during testing of onetime grease lubricated plastic gears!**

L. Klimentew, W. Schmidt, Oechsler AG, Ansbach

853
