Content

Power Trains: Electric Drives and Alternative Fuels

B100-fuel in AG applications on STAGE-V basis –
Time for a renaissance of “Biodiesel” in the AG-sector? 1
F. Wohlfahrt, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel;
J. Ettl, Technologie- und Förderzentrum, Straubing

Telehandler Hybrid | Fuel Flex
Proto development and working prototype 11
M. Tondo, V. Martina, G. Santarcangelo, P. Pellizzari, S. Fiorati, M. Gerbi,
CNH Italia Spa

A Fuel Cell Tractor in Practice – Lessons Learned with Fendt HELIOS
Field Experiences with a Hydrogen supplied Tractor 19
W. Breu, AGCO GmbH, Marktoberdorf

Electric axle driveline prototype system for tractors 25
S. Willems, J. Ziegler, R. Himmelsbach, ZF Friedrichshafen AG, Friedrichshafen;
M. Dankesreiter, M. Haas, ZF Friedrichshafen AG, Passau

Tractors, Self-Propelled Agricultural Machinery

Improving user ergonomics in tractors with alternative steering
input methods 33
V. Ernst, P. Wendel, S. Böttinger, University of Hohenheim,
Institute of Agricultural Engineering, Stuttgart

Forage Harvester Development within the Deere Dairy & Livestock
Production System 43
G Schörry, M. Dold, K. Stuhlsatz, J. Martin, John Deere, Zweibrücken

Seeds of Innovation
Equipping Next-Gen Agricultural Engineers with Techno-Agricultural Skills 51
J. Schöning, C. Westerkamp, Osnabrück University of Applied Sciences

Harvesting Technologies and Efficiency

The Potential of Remote Sensing and NIRS for Protein-Based Precision
Harvesting in Organic Wheat 59
A. Prasun, F. Beneke, Georg-August-Universität Göttingen, Göttingen

Harvest Optimization for Efficient and High-Quality Vegetable Harvest 67
S. Havermans, Oxbo, Roosendaal; J. Klein-Holkenborg, T. Bresilla, A. Leunissen, S. Boersma, Wageningen University & Research, Wageningen, The Netherlands

Optimal Closed-Loop Control for active Discharge Chute Stabilization in self-propelled Forage Harvesters 73
J. Penner, S. Schiewer, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany

Smart Harvest Chain
AI-Yield Forecasting in the connected grassland harvesting process 81
M. Eichlseder, PÖTTINGER Landtechnik GmbH, Grieskirchen, Austria

Work Quality Analysis and Precision Agriculture

UAV spreaders for slug pellets
Comparison with ground-based spreaders 89
M. Sax, T. Anken, Agroscope, Digital Production Research Group, Ettenhausen
S. L. B. König, Federal Food Safety and Veterinary Office, Toxicology of Plant Protection Products, Bern, Switzerland

Effect of the measured outlet angle on the spreading pattern of a centrifugal spreader 97
G. M. Sharipov, A. Heiß, M. Karampoiki, D. S. Paraforos, Hochschule Geisenheim University, Department of Agricultural Engineering, Geisenheim;
M. Ströbel-Fröschle, F. Rahe, AMAZONEN-WERKE H. DREYER SE & Co. KG, Hasbergen

Impact of Fertilizer Distribution Accuracy on Quality Parameters in Grain Production 103
S. Fock, C. Struve, John Deere, Kaiserslautern;
Y. Reckleben, University of Applied Science, Kiel

Sensors & Sensor Simulation

Why now is the time to think about imaging radar to complement or replace optical perception sensors
Take your off-highway automation and autonomy to the next level with imaging radar 111
M. Weigel, Baumer Electric AG, Frauenfeld, Switzerland; D. Bien Le, Baumer Innovation GmbH, Stockach, Germany; D. Ritzmann, Baumer Electric AG, Frauenfeld, Switzerland

Concept and Implementation of a real-time capable LIDAR Simulation in the Agricultural Domain 117
N. Rüddenklau, M. Götte, T. Leßmann, dSPACE GmbH, Paderborn, Germany

Optimizing Real-Time LiDAR Simulation with Reflectivity Measurements for Deep Learning Semantic Segmentation in Autonomous Light Tillage 125
M. Felske, J. Redenius, M.Sc., CLAAS E-Systems GmbH, Dissen a.T.W.;
P. Rosenberger, Persival GmbH, Ober-Ramstadt;
N. Rüddenklau, dSPACE GmbH, Paderborn

UAS-based lane mapping for autonomous mobile robots in precision horticulture 133
T. Schütte[1], D. Klöser[2], V. Dworak[2], C. Weltzien[1,2]
[1] Technische Universität Berlin, Fachgebiet Agromechatronik, Berlin, Germany;
[2] Leibniz-Institut für Agrartechnik und Bioökonomie e.V. (ATB); Technik im Pflanzenbau, Potsdam, Germany

Artificial Intelligence and Digital Simulations

AI-Powered Full Vehicle System Simulations reduces Physical Testing Structural Simulation Acceleration and Digital Twin Development in Agricultural Machinery 141
G. Gullo, CNH, Modena, Italy; M. Bromberger, Altair Engineering GmbH, Boeblingen

Computer Vision and AI-enabled Edge Feedback and Visualization Solution for optimal Furrow Quality and Seeding Efficiency 147
S. Rai, R.H. Cheppally, A. Sharda, Kansas State University, Manhattan, Kansas, USA;
R. Sleichter, John Deere, Des Moines, Iowa, USA

Towards Reliable Deep Learning Models for Plant Species Identification in Diverse Real-World Scenarios 155
D. H. Basavegowda, S. Liu, M. M.-C. Höhne, C. Weltzien, ATB, Potsdam, Germany

Testing: Test Environments & Applikations

Environment for Testing Agricultural Robots in the Field with Ground Truth 3D Object Tracking 161
D. Barrelmeyer, J. Jose, University of Applied Sciences Osnabrück;
S. Stiene, University of Applied Sciences Osnabrück and German Research Center for Artificial Intelligence (DFKI)

Advancements in Virtual Validation and Safety Certification for Autonomous Agricultural Machinery 169
P. Antonino, J. Jung, P. Biswas, S. Schwenk, D. Mahajan, Fraunhofer IESE;
R. Weires, N. Dybro, A. Foessel, Balanced Engineering

A Tool Set for Development and Testing of Perception Systems in Agriculture 175
J. C. Krause, N. Iqbal, M. Niemeyer, M. Atzmueller, DFKI GmbH;
S. Röttgermann, A. Tauber, LEMKEN GmbH & Co. KG;
J. Herbers, Maschinenfabrik Bernard Krone GmbH & Co. KG;
H. Hollmeier, T. Boße, S. Schirk, R. Hilker, S. Stiene, Hochschule Osnabrück

Standardized Testing of Sensor-Based Object Detection for Autonomous Agricultural Machinery 183
G. Happich, University of Applied Sciences Kempten;
N. Hummel, VDMA e.V., Frankfurt a.M.;
M. Komesker, C. Meltebrink, University of Applied Sciences Osnabrueck;
M. Felske, CLAAS E-Systems GmbH, Dissen a.T.W.

Innovative Applikations

Ensuring desired work quality and efficiency by automation of chopping drum condition monitoring 191
D. Neitemeier, C. Cord-Kruse, M. Klein-Helmkamp, G. Eggenhaus,
CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany
G. Wehner, CLAAS Saulgau GmbH, Saulgau, Germany

Boosting productivity on large square balers
The pickup slip clutch and its control 201
R. Gryson, M. Abbinante, A. Roshanbin, G. Mortier, F. Ramuenke, K. Nona,
CNH, Zedelgem

Integrating Farming Practices into Vertically Mounted Agrivoltaic Systems: Planning and Operational Challenges 213
K. Wild, University of Applied Sciences Dresden;
J. K. Schueller, Ph.D., University of Florida, Gainesville, USA

Power Train Efficiency and Economy

Enhancing Track System Efficiency for the Future of Electrified Agricultural Vehicles
Methodology to Quantify and Reduce Energy Losses in Track Systems 221
Y. Sauvageau, P.-Y. Pepin, Soucy, Drummondville

Optimizing Tractor Traction Performance Using Altair EDEM 3D Simulations of Tyre Contact Area and Rolling Resistance 227
L. Srinivasan, S. Biradar, Concept Engineering & Analysis, Tractor Performance Simulation CoE, Farm Division Product Development (FDPD), Mahindra Group; P. Avilala, Global Technical Team (EDEM), Altair Engineering India

The CO2 Reduction Potential Exemplified by a Hydraulic Drive System for Self-Propelled Harvesting Machines 233
C. Biemann, B. Fischer, H. N. Kossen, A. Heilig, GRIMME Landmaschinenfabrik GmbH & Co. KG, Damme (Germany)

Enhancing Tractor Efficiency with Very High Flexion Tyres
Impact of Tyre Technology on Tractor Efficiency, Traction Performance and Cost-Effectiveness in Field Operations 241
M. Mattetti, L. Angelucci, M. Varani, University of Bologna, Bologna, Italy; F. Pinet, V. Martin, Manufacture Française des Pneumatiques Michelin, Clermont-Ferrand, France; A. Vertua, CNH, Modena, Italy

Technology for Combine Harvesters

Enhancing Harvest Automation with Advanced Header View System
To assist in the operation of modern and complex combine harvesters a header view system is presented to improve driving comfort and increase performance 247
M. Poulsen, D. Hermann, K. Düring Jensen, AGCO Innovation Center Randers

Alternative particle simulation methods for combine residue management
An open source-based DOE pipeline for HPC computation on CPU utilizing Bullet Physics SDK and semi analytic particle trajectories 255
M. P. J. Schaller, AGCO A/S, Innovation Center Randers, Denmark

New approach for weed seed separation and devitalisation in combine harvesters for increased field hygiene and less weeds 267
S. Pantke, Th. Herlitzius, TU Dresden, Dresden;
F. Löckle, R. Zürn, Zürn Harvesting GmbH & Co. KG, Ravenstein-Merchingen;
A. Schmidt, M. Gaßan, EXAgT GmbH Büro für präzise Agronomie, Jahnatal OT Zschochau

Corn Header Automation for Combine Harvesters
Optimal Setting Control to Real-Time Condition Changes 279
J. Martin, K. Linde, R. K. S. Niranjan, E. Walker, A. Leenknegt, D. Jongmans,
B. Missotten, CNH Industrial, New Holland, PA USA; Zedelgem, Belgium

Design of Agricultural Machinery, Simulation Techniques

Seeding new standards for precision and efficiency
Improved profitability in arable farming thanks to optimized seed distribution with virtual prototypes made possible by DEM and CFD technology 289
J. Bruns, AMAZONEN-WERKE H. DREYER SE & Co. KG, Hasbergen;
M. Schierle; Altair Engineering GmbH, Hannover

Coupled CFD-DEM simulation of agricultural spraying processes 295
J. Willmaring, F. Gerdes, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Braunschweig; J. K. Wegener, Institute for Application Techniques in Plant Protection, Julius Kühn-Institut, Braunschweig

From a bet to success - How to develop & validate a high new content main frame concept first time right.
Virtual Iteration (VI) as a key technology for frontloading by fatigue simulation 303
J. Nöring, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany

Cultivation and Seeding

Automated Tillage for Disturbance-Free Operation: Enhancing Work Quality and Process Stability in Precision Agriculture 311
D. Albrecht, M. Meer, S. Röttgermann, LEMKEN GmbH & Co. KG, Alpen, Germany

Autonomous Field Robots for Soil-Smart Farming: Innovations, Challenges and Industry Pathways
What should we measure? 321
K. Grahmann, Leibniz Centre for Agricultural Landscape research (ZALF), Müncheberg; L. Rohlmann, L. Thielemann, A. Roy, Prof. C. Weltzien

Automation in Air Seeder Technology 327
C. Gotzen, LEMKEN GmbH & Co. KG, Alpen

Laboratory test for friction reduction in plowing by air lubrication 337
J. Wendling, H. Bernhardt, Technical University of Munich, Freising

Optimisation of Agricultural Applications

Enhancing Harvest Operations through Interoperable Vehicle Platooning for Unloading
Towards Standardized Communication and Collaborative Control in Mixed-Fleet Environments 347
K. Bundschuh, C. Koegel, T. Nothdurft, AGCO GmbH, Marktoberdorf; D. Titkemeier, K. Angas, J. Witte, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel

Operational time requirements of autonomous field robots in soil tillage and sowing 355
I. Mühlbachler, Josephinum Research, Wieselburg;
F. Handler, HBLFA Francisco Josephinum, Wieselburg

Generic Off-Road Automation System (GOAS) for Agricultural Vehicles: Simulation-Driven Development
Simulation-Driven Development for Autonomous Agricultural Vehicles 363
D. Brunner, S. Perla-Steinhuber, B. Knauder, AVL List GmbH, Steyr, Austria

Sensor-Based Multi-Modal Anomaly Detection for Small Autonomous Agricultural Robots 371
S. Gruber, M. Gansberger, University of Applied Sciences Wiener Neustadt – Campus Francisco Josephinum, Wieselburg, Austria;
H. Steinkellner, U. C. Biçici, P. Riegler-Nurscher, Josephinum Research, Wieselburg, Austria

Automation of Agricultural Processes

Crop growth estimation in Austria with a sequential Monte Carlo algorithm and open data
Outline of the evaluation framework and validation with field trial data 377
A. Ettlinger, S. Geyer, P. Prankl, HBLFA Francisco Josephinum, Wieselburg, Austria

Path planning for field robots on sloping farmland
Runoff and erosion mitigation by cross-slope cultivation and in-field agri-environmental measures 387
M. Melzer, Leibniz Centre for Agricultural Landscape Research (ZALF), Müncheberg; S. A. Pauli, AGCO GmbH, Marktoberdorf; S. Kopfinger, Bavarian State Research Centre for Agriculture (LfL), Ruhstorf a. d. Rott

Decision support tool for economical evaluation of highly automated agricultural machinery within a specific farm environment 393
T. Herlitzius, M. Hengst, T. Füldner, TU Dresden; W. Aumer, OTH Regensburg

Synthetic Data and AI based Quality Assessment

A flexible framework for low-cost rapid generation of high-quality synthetic datasets for agricultural environments 401
F. Slezák, A. T. Christiansen, A. H. Højrup, Aalborg University, Aalborg, AGCO A/S, Randers, Denmark; M. S. Laursen, K. D. Jensen, AGCO A/S, Randers, Denmark; T. B. Moeslund, Aalborg University, Aalborg, Denmark

Using Synthetic Data and Artificial Intelligence for Optimizing Tillage Process Quality Measurement 413
S. Schulpius, M. Graf, T. Stirnkorb, AGCO GmbH, Marktoberdorf, Germany; L. Frerichs, Technische Universität Braunschweig, Braunschweig; M. Geimer, Karlsruhe Institute of Technology, Karlsruhe

Real-time Monitoring and Controlling of Kernel Processing Quality on Forage Harvesterst 421
M. Born, K.S. Chandrasekar, M. Abbinante, G. Mortier, T. Leblicq, CNH Industrial, Zedelgem, Belgium

Estimating corn silage processing score in real-time with machine learning and computer vision 427
A. Christensen, A. Dieksand, K. Jensen, AGCO A/S – Innovation Center Randers, Denmark

Laser and Weed Control

Development and Evaluation of an Innovative Laser Precise Intra-Row Weed Control in Seeded Vegetable Crops as Part of the JaetRobi Project 437

A. Jalali[1], K. Koch[1], T. Schütte[2], S. Schröder[2], D. Klöser[1], V. Tessaro[1,3], V. Dworak[1], C. Weltzien[1,2,3]

[1] Department of Agromechatronics, Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB), Potsdam

[2] Technische Universität Berlin, Fachgebiet Agromechatronik, Berlin,

[3] Joint Lab Artificial Intelligence & Data Science, Osnabrück University, Coppenrath Innovation Centre, Osnabrück

A Feedback Control Architecture for Low-Cost Lasers and Improved Operational Efficiency in Laser Weed Control 445

D. Suhr, V. Tessaro, K. Koch, A. Jalali, V. Dworak, Leibniz Institute for Agricultural Engineering and Bioeconomy, Potsdam;
S. Schröder, T. Schütte, FG Agromechatronik, Technische Universität, Berlin;
C. Weltzien, FG Agromechatronik, Technische Universität, Berlin, Leibniz Institute for Agricultural Engineering and Bioeconomy, Potsdam

Requirements for Plant specific Interventions in Row Crop Fields and Development of the BonnBot 451

A. Ahmadi, DynamoBot GmbH & University of Bonn, Germany;
O. Schmittmann, University of Bonn, Germany

Robotics and Automation

Electromechanical Drawbar
A practical, flexible, economical and efficient way for transporting agricultural robots 469

M. Markgraf, H. Fichtl, Fraunhofer IVI, Dresden

Robotic modular platform for vineyard and orchard operations
Design, development and validation 479

F. Lisurici, L. Medici, N. Lenzini, D. Moser, G. Pullano, Dr. L. Ferrari, CNH Industrial Italia, Modena, Italy;
P. Rodriguez, L. Le Brech, Q. Milloy, CNH Industrial France, Coex, France

Next-Generation Agricultural Robotics: Building Scalable Autonomy Through Modular Software Architectures 485
M. Volk, Maschinenfabrik Bernard KRONE GmbH & Co. KG, Spelle;
M. Petrov, Apex.AI GmbH, Munich;
D. Schoofs, Electronic Engineering, LEMKEN GmbH & Co. KG, Alpen

Safety for Autonomous Vehicles

Cybersecurity Standards for Agricultural Machinery
How can Secure Farming Benefit from Automotive Security Best Practices? 507
D. Bajaj, A. Sridhar, P. Prabhakaran, Vector Consulting Services GmbH, Stuttgart

Radar-Enhanced Geofencing to Ensure Safe Field Boundaries in Partially GNSS-Degraded Agricultural Environments
A Sensor Fusion Safety Architecture for Autonomous Agricultural Machinery 513
R. Esquivel, C. Metz, E. Zamora, T. Ertbølle Madsen, AgriRobot, Kgs. Lyngby, Denmark

Why robust AI combined with Multi-Modal Sensor Fusion is the path to safe and highly available autonomy in agriculture
Combining an explainable safety layer with a universal foundation model 519
S. Matz, driveblocks GmbH, Munich

Holistic Review of Safe Environment Perception Development to Achieve Autonomy in Agriculture 525
M. Komesker, C. Meltebrink, University of Applied Sciences Osnabrueck, Osnabrueck

Communication and Interoperability in Agriculture

High Speed ISOBUS: Standardizing Communication and Diagnostics for Next-Generation Machinery 533
B. Böhlen, Daten- und Systemtechnik GmbH, Aachen;
B. Klöpper (MBA), KRONE Business Center DigITal GmbH & Co. KG, Spelle

Agricultural Interoperability Network
Enrolling A Data Space & Common Connector 541
S. Stesny, AGCO GmbH, Marktoberdorf

The Roadmap on Autonomy in Ag 545
A. Grever, Maschinenfabrik Bernard Krone GmbH & Co. KG, Spelle, Germany;
R. Abel, CNH, Sioux Falls, SD, USA

Simulation Techniques

Interactive combine harvester simulator for early customer co-development and operator training 553
J. Hagert, T. Herlitzius, Institute of Natural Materials Technology, Chair of Agricultural Systems Technology, Technische Universität Dresden, Germany;
H. Jähne, A. Shchennikov, Hydrive Engineering GmbH, Freital, Germany;
K. Düring Jensen, Annika Dieksand, AGCO A/S - Innovation Center Randers, Denmark

An investigation of the lateral compression behaviour of wheat straw for the development of a DEM simulation model 563
F. Appich, M. Eckey, A. Sterr, S. Böttinger, University of Hohenheim, Institute of Agricultural Engineering, Stuttgart;
A. Bürger, A. Diekamp, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel

Simulation-Based Evaluation of Tractors with Alternative Energy Carriers in Different Agricultural Contexts 571
L. Reuter, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, TU Braunschweig
