Volume 13924

Proceedings of SPIE, 1605-7422, V. 13924

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2026: Physics of Medical Imaging*, edited by Ke Li, Shiva Abbaszadeh, Arundhuti Ganguly, Proc. of SPIE 13924, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

DETECTORS

- 13924 03 **System design options for a high-resolution conventional scintillator detector** [13924-1]
- 13924 04 **Unipolar charge sensing drift detector using amorphous selenium for large area x-ray imaging applications** [13924-2]
- 13924 05 **High-efficiency selenium-tellurium photodetector for direct-indirect dual layer detector** [13924-3]
- 13924 06 **Enhanced temporal and electrical stability of amorphous selenium photoconductor by an aluminum oxide thin-film hole-blocking layer** [13924-4]

VIRTUAL IMAGING TRIALS

- 13924 07 **Hybrid virtual imaging trials combining simulated microcalcifications with patient breast CT images** [13924-5]
- 13924 08 **Using a physics-based approach to standardize radiomics values: experimental validation in an anthropomorphic phantom on a clinical CT scanner using a range of dose levels and reconstruction kernels** [13924-6]
- 13924 09 **A generative model of lung CT conditioned on radiomics features** [13924-7]
- 13924 0A **Hallucination at low radiation dose: evaluation of two deep-learning reconstruction methods in high-resolution chest CT** [13924-8]

PCD-CT

- 13924 0C **Dual-contrast iodine-bismuth imaging with clinical photon-counting CT: optimization of virtual monoenergetic image pairs for enhanced visualizations and quantifications** [13924-10]
- 13924 0D **Projection-domain material decomposition for PCD CT with pixel-to-pixel variations** [13924-12]

- 13924 OE **Quantitative enhancement of spectral imaging in photon-counting CT via dynamic energy thresholding** [13924-13]
- 13924 OF **Impact of energy threshold placement on spectral imaging performance in multi-bin photon counting CT** [13924-11]

PHOTON COUNTING DETECTORS

- 13924 OH **Physics-guided pixel-wise correction for cross-bin pulse pileup effect in photon-counting CT** [13924-15]
- 13924 OI **Optimization of photon counting detector module arrangement to maximize CT image quality using measurement-based image synthesis model** [13924-16]
- 13924 OJ **An empirical model of scatter-induced SDNR degradation in triple-energy photon-counting x-ray imaging** [13924-17]
- 13924 OK **Dual-contrast imaging with photon-counting CT for arthrography** [13924-18]
- 13924 OL **Simulation and implementation of peak-finding ASIC for clinical photon-counting CT detector** [13924-19]

PHASE CONTRAST AND DARK FIELD IMAGING

- 13924 OM **High-resolution low-noise x-ray dark-field radiography for microscopic imaging** [13924-20]
- 13924 ON **Basis material Cramér–Rao lower bound: the theoretical utility of propagation-based phase contrast** [13924-21]
- 13924 OO **Comparison of speckle-based and single-mask x-ray phase contrast and dark-field imaging: a simulation and experimental study** [13924-22]
- 13924 OP **A Monte Carlo-based dark-field dataset for training deep learning models in x-ray phase-contrast imaging** [13924-23]
- 13924 OQ **Spectral x-ray phase-contrast imaging of microcalcifications via automatic-differentiation material decomposition (Physics of Medical Imaging Student Paper Award: Runner-Up, Robert F. Wagner All-Conference Best Student Paper Award: Finalist)** [13924-24]

X-RAY ACQUISITION SYSTEMS AND NUCLEAR MEDICINE

- 13924 OR **Tungsten microparticle streams enable simultaneous reflective and transmissive x-ray emission and high central image resolution** [13924-25]
- 13924 OS **Direct quantification of bone mineral density using a dual-energy multisource CBCT** [13924-26]

- 13924 0T **Design of multiple focal spots for high-resolution CT** [13924-27]
- 13924 0U **Ultra-low-dose in vivo imaging in stem cell-enabled brain tumor theranostics using an optimized CZT-microSPECT scanner** [13924-28]
- 13924 0V **Measurement of scatter and evaluation of grid performance for dual-layer flat-panel detector prototype** [13924-29]

IMAGE RECONSTRUCTION AND ALGORITHMIC DEVELOPMENTS

- 13924 0X **Stable diffusion posterior sampling via Bayesian denoising for generative sparse-view CT reconstruction** [13924-30]
- 13924 0Y **Continuous limited-angle dynamic cone-beam CT reconstruction with prior-driven unsupervised learning** [13924-31]
- 13924 0Z **Theoretical prediction of bias in model-based material decomposition** [13924-32]
- 13924 10 **Joint cone-beam CT reconstruction and rigid motion compensation using a differentiable projector** [13924-33]
- 13924 11 **Robustness of deep learning-based opportunistic quantitative assessment in low-dose CT** [13924-34]

PHANTOMS AND ANATOMICAL MODELS

- 13924 12 **Synthesis of respiratory motion in CT images using latent diffusion models** [13924-35]
- 13924 13 **Deep learning-enhanced virtual photon-counting micro-CT imaging platform for preclinical cancer studies** [13924-36]
- 13924 14 **Adding organ texture to boundary representation computational phantoms using analytical solid noise synthesis** [13924-37]
- 13924 16 **A patient-based phantom dataset for mammography and tomosynthesis simulations** [13924-39]

DUAL ENERGY CT AND ANGIOGRAPHY

- 13924 17 **Joint estimation of scatter distribution and material maps in volumetric dual-layer cone-beam CT** [13924-40]
- 13924 18 **Color CT, literally** [13924-41]

- 13924 19 **Intra-operative brain perfusion assessment for ischemic stroke using 2D digital subtraction angiography: first pilot clinical study** [13924-42]
- 13924 1A **Deep learning model for coronary artery calcium detection from single-shot dual-energy chest x-rays: a simulation study** [13924-43]
- 13924 1C **Anemia detection with virtual monoenergetic imaging in spectral CT: quantitative performance analysis and optimization** [13924-45]

BREAST IMAGING

- 13924 1D **Feasibility study for a novel concept of breast transmission tomography** [13924-46]
- 13924 1E **DBTMI database characterization and artifacts reduction: the first 100 clinical datasets** [13924-47]
- 13924 1F **First contrast-enhanced mammography unit integrated with a dual-layer flat-panel-detector (Physics of Medical Imaging Student Paper Award: 1st Place, Robert F. Wagner All-Conference Best Student Paper Award: Finalist)** [13924-48]
- 13924 1G **Quantum dot-based direct x-ray detector for mammography** [13924-49]
- 13924 1H **Toward explainable AI approaches for breast imaging: adapting foundation models to diverse populations** [13924-50]

IMAGE QUALITY ASSESSMENT AND OPTIMIZATION

- 13924 1I **Advancing deep learning denoising methods with self-supervised training and multi-channel image priors** [13924-51]
- 13924 1J **Evaluation of fluence reduction versus sparsity for diffusion posterior sampling reconstruction in low-dose CT** [13924-52]
- 13924 1K **Noise2Noise diffusion for thin-slice brain CT denoising without clean training data** [13924-53]
- 13924 1L **Using multiple scattering measurements of very high energy electrons for medical imaging** [13924-54]

AI/ML APPLIED TO IMAGING PHYSICS

- 13924 1N **AI-assisted six-dimensional CT imaging for joint instability assessment** [13924-56]
- 13924 1O **One-step material decomposition using spectral diffusion posterior sampling in sparse-view dual-layer CT** [13924-57]

- 13924 1P **End-to-end differentiable photon counting x-ray imaging with cross-domain learning: a demonstration for scatter correction** [13924-58]
- 13924 1Q **Adversarial surface refinement for enhanced morphology of dental crown prediction** [13924-59]
- 13924 1R **Diffusion posterior sampling for tomographic reconstruction with mixed resolution priors** [13924-60]

POSTER SESSION

- 13924 1T **Evaluating inter-institutional reproducibility of quantitative spectral results with clinical photon-counting CT: initial results using the same scanner, protocol, and phantom** [13924-62]
- 13924 1U **PET simulation of complex isotopes using SimSET** [13924-63]
- 13924 1V **Planar-slice CT reconstruction along parametric space curves** [13924-64]
- 13924 1W **Training cone-beam artifact reduction networks with only artifact-contaminated CBCT images** [13924-65]
- 13924 1X **REST-Net: triple-enhanced network for artifact-reduced interior computed tomography reconstruction** [13924-66]
- 13924 1Y **Investigation of x-ray shielding performance of polymer incorporate with BaSO₄: a simulation study** [13924-67]
- 13924 1Z **Image quality improvement in stationary digital tomosynthesis with the various numbers of focal spots using a deep convolutional GAN-based out-painting model** [13924-68]
- 13924 20 **SAVI: slope-aware sparse-view sinogram interpolation** [13924-69]
- 13924 21 **Polychromatic representation with implicit sinogram modeling for metal artifact reduction in cone beam CT (CBCT) imaging** [13924-70]
- 13924 22 **Dual-energy dark-field x-ray phase-contrast imaging with a single 2D grating for enhanced tissue subtraction** [13924-71]
- 13924 23 **Noise sensitivity analysis in measuring bone mineral densities based on dual-layer detectors** [13924-72]
- 13924 24 **A physics prior-informed deep learning method for scatter artifact correction in triple-source CT: simulation study** [13924-73]
- 13924 25 **Deep denoising in phase contrast breast computed tomography** [13924-74]

- 13924 26 **Using exponential data consistency conditions for attenuation map alignment of experimental torso phantom SPECT/CT data** [13924-75]
- 13924 27 **Experimental study on dual-energy cone-beam CT for proton therapy planning** [13924-76]
- 13924 28 **Data consistency conditions for displacement estimation in circular cone-beam CT** [13924-77]
- 13924 29 **A multi-stage deep learning framework for correcting combined metal and truncation artifacts in half-detector CBCT** [13924-78]
- 13924 2A **Design and fabrication of a high-performance microfocus x-ray tube using a structured CNT cathode** [13924-79]
- 13924 2B **An automatic image quality measurement method minimizing observer bias** [13924-80]
- 13924 2C **X-ray fluorescence imaging system with high energy resolution 2D array detector and multi-pinhole collimator** [13924-81]
- 13924 2D **A unified framework for sparse-view CT and super-resolution CT** [13924-82]
- 13924 2F **Statistical shape model for the breast under compression in the medio-lateral oblique view** [13924-84]
- 13924 2G **Pixel-wise reinforcement learning with frequency-selective filters for CT denoising and structural preservation** [13924-85]
- 13924 2H **Virtual monoenergetic imaging enabled bone density evaluation with reduced sensitivity to patient anatomy variations: a phantom study** [13924-86]
- 13924 2I **Association between body mass index, liver fat, and coronary artery calcium scoring in coronary computed tomography images** [13924-87]
- 13924 2J **CDDP: a coupled dual-domain diffusion prior framework for metal artifact reduction in dental CBCT** [13924-89]
- 13924 2K **Contrast enhancement and contrast-noise-ratio evaluations of iodine and gadolinium-based contrast agent using photon-counting detector CT: a phantom study** [13924-90]
- 13924 2L **Integrating conjugate data symmetry into score-based diffusion models for sparse-view and truncated multi-source CT** [13924-91]
- 13924 2M **Transfer learning from virtual clinical trials for breast cancer detection on limited clinical data** [13924-92]
- 13924 2N **Toward a robust lesion detection model in breast DCE-MRI: adapting foundation models to high-risk women** [13924-93]

- 13924 2O **Self-supervised CBCT denoising via non-local self-similarity with two-stage training and fine-tuning** [13924-94]
- 13924 2P **Frequency-based assessment of ACNR in triple-energy photon-counting x-ray imaging** [13924-96]
- 13924 2Q **Reducing radiation exposure in fluoroscopically-guided percutaneous vertebral augmentation: comparison between two generations of angiography systems** [13924-97]
- 13924 2R **A stable and cost-effective fabrication method for solid spectral CT phantoms with embedded iodine inserts** [13924-98]
- 13924 2S **Hybrid CT prototype with photon-counting and energy-integrating detectors: a comparative study of image quality** [13924-100]
- 13924 2T **DD-EMNet: dual-domain EM-unrolled network for sparse-view SPECT reconstruction** [13924-101]
- 13924 2V **MEGDiffusion: diffusing latent representations for physics-consistent MEG source localization** [13924-103]
- 13924 2W **Reconstruction of multiple basis images from reduced CT data** [13924-104]
- 13924 2Y **Precise dental CBCT: CT# correction with conditional DDPM and fast inference Unet** [13924-106]
- 13924 2Z **Fast simulation of correlated photon-counting measurements with the Anscombe transformation (Physics of Medical Imaging Cum Laude Poster Award)** [13924-107]
- 13924 31 **Iterative motion correction for dental CBCT with off-set geometry using ensemble segmentation** [13924-109]
- 13924 32 **ResUNet-based deep learning technique for Ram-Lak filter-free CBCT reconstruction** [13924-110]
- 13924 33 **Preliminary study of accurate CT image reconstruction from region-specific limited-angular-range data** [13924-111]
- 13924 35 **Deep learning diffusion models for Compton scatter tomography** [13924-113]
- 13924 36 **Assess SPECT system's pixel-wise tomographic resolution through analysis of projection probability density function** [13924-114]
- 13924 37 **Efficient attenuation estimator for silicon photon counting detector CT** [13924-115]
- 13924 38 **Identifying multiplexed nanoprobe for breast cancer heterogeneity characterization using benchtop x-ray fluorescence imaging: a Monte Carlo study** [13924-117]

- 13924 39 **Improving iodine quantification performance on a clinical photon-counting CT with noise-optimized virtual monoenergetic imaging** [13924-118]
- 13924 3A **Image-domain material decomposition for PCD CT with pixel-to-pixel variations** [13924-119]
- 13924 3B **Enabling region-based reconstruction from x-ray angiography images from one angle: eliminating cerebral arteries and veins (Physics of Medical Imaging Honorable Mention Poster Award)** [13924-120]
- 13924 3C **A mobile digital tomosynthesis system for bedside imaging** [13924-122]
- 13924 3D **Application of post-processing techniques for correction of nonphysical dual-energy CT fluence measurements** [13924-123]
- 13924 3E **Frequency-based comparison of kV-switching and photon-counting single-exposure dual-energy thoracic imaging** [13924-124]
- 13924 3F **Simulation study of synchronous readout in single-pixel and charge-summing modes for photon-counting CT** [13924-125]
- 13924 3G **Predicting abdominal deformation from the histotripsy acoustic coupling mechanism** [13924-126]
- 13924 3H **Using orthogonal x-ray projections for fast deep learning-based CBCT reconstruction for CBCT-guided gynecologic radiotherapy** [13924-127]
- 13924 3I **Dual energy cone beam computed tomography bleed detection in the angiography suite** [13924-128]
- 13924 3J **Predicting dental implant stability using a multisource CBCT** [13924-129]
- 13924 3K **Spectral detector physics combined with deep neural network for denoising and quantitative accuracy in iodine K-edge subtraction mammography with photon-counting detectors** [13924-130]
- 13924 3M **Static CT scatter correction: feasibility study with optimized Z-axis grids** [13924-132]
- 13924 3N **Radiomic signatures of breast cancer subtypes: a blueprint for digital phantom development** [13924-133]
- 13924 3O **Assessing the impact of CT reconstruction kernel on radiomic features extracted from normal and fibrotic tissue in patients with diffuse lung disease** [13924-134]
- 13924 3P **A realistic lesion insertion and reconstruction framework for task-based evaluations in clinical SPECT and PET imaging** [13924-135]
- 13924 3Q **Evaluation of mobility-lifetime product and surface quality effects in GaAs:Cr photon-counting detectors** [13924-136]

- 13924 3R **Breast density quantification with dual-energy x-ray phase-contrast imaging** [13924-137]
- 13924 3T **Towards improved control of breast density in simulated mammograms via Perlin noise parameterization** [13924-139]
- 13924 3U **Data-driven synthesis of spiculated breast phantoms: a user-interactive framework for modeling and clinic image integration** [13924-140]
- 13924 3V **Task-based multiscale attention net for deep learning-enhanced FBP-to-SART quality mapping with adversarial training for microcalcification detection in digital breast tomosynthesis** [13924-141]
- 13924 3W **Deep learning-based reconstruction for low-dose sparse-view digital breast tomosynthesis** [13924-142]
- 13924 3X **Design and development of a custom spectral domain OCT prototype** [13924-143]
- 13924 3Y **Feasibility study of high-frame-rate imaging with small pixel CMOS-based indirect x-ray detectors** [13924-144]
- 13924 40 **Radiomic texture features sensitive to breast density changes: a phantom study** [13924-146]
- 13924 41 **Evaluation of a high-fidelity forward projector for 2D computed tomography with flat detector geometry** [13924-147]
- 13924 42 **Performance evaluation of a photon-counting CT ASIC design with anti-charge sharing** [13924-148]
- 13924 43 **Subset stratification for predictive Alzheimer's models using Tau-PET SUVR** [13924-149]
- 13924 44 **A probabilistic Alzheimer's risk model based on Tau-PET SUVR for a patient subgroup** [13924-150]

DIGITAL POSTER SESSION

- 13924 45 **Implicit neural representation with plane attention for micro-CT super-resolution** [13924-88]
