Volume 13925

Proceedings of SPIE, 1605-7422, V. 13925

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2026: Image Processing*, edited by Jhimli Mitra, Yu Gan, Proc. of SPIE 13925, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

ISSN: 2410-9045 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

VISION LANGUAGE AND FOUNDATION MODEL

- 13925 03 **EEG-to-fMRI knowledge distillation empowers few-shot resting-state fMRI vigilance detection** [13925-1]
- 13925 04 **SynthFM-Few: few-shot adaptation of synthetic medical image segmentation foundation models with real medical images** [13925-2]
- 13925 05 **12-month disease-free survival prediction in diffuse large B-cell lymphoma: a multimodal transfer learning innovation** [13925-4]

BRAIN

- 13925 06 **Personalized white matter bundle segmentation for early childhood** [13925-5]
- 13925 07 **Unsupervised anomaly detection in brain FDG PET with deep generative models: an experimental analysis of model variability and mitigation strategies** [13925-6]
- 13925 08 **Phenotype discovery of traumatic brain injury segmentations from heterogeneous multi-site data** [13925-7]
- 13925 09 **Fully differentiable dMRI streamline propagation in PyTorch** [13925-8]
- 13925 0A **Characterizing continuous and discrete hybrid latent spaces for structural connectomes** [13925-9]

IMAGE PROCESSING AND IMAGE-GUIDED PROCEDURES: JOINT SESSION WITH CONFERENCES 13925 AND 13927

- 13925 0B **Monocular absolute depth estimation from endoscopy via domain-invariant feature learning and latent consistency** [13925-10]
- 13925 0C **Detecting transitions in endoscopic videos using LSTMs** [13925-11]
- 13925 0D **From body surface to bones: bone segmentation using depth images** [13925-12]

IMAGE SYNTHESIS AND GENERATIVE MODELS

- 13925 OE **Tortuosity controllable retinal fundus image generation using diffusion model** [13925-13]
- 13925 OF **Mamba-MoE: enhanced multimodal medical image synthesis with pixel transition loss** [13925-14]
- 13925 OG **Optical coherence tomography harmonization via dual diffusion implicit bridges** [13925-15]
- 13925 OH **Modeling a shared reality of tractography through varied structural imaging** [13925-16]
- 13925 OI **A diffusion-model-based two-stage framework for unpaired PET image enhancement** [13925-17]

SEGMENTATION

- 13925 OJ **Towards robust head-and-neck vessel segmentation with topological-aware losses in CT angiography** [13925-18]
- 13925 OK **Gaze-nnUNet: gaze-guided clinician-in-the-loop platform for image segmentation in nuclear medicine** [13925-19]
- 13925 OL **KR-SAMNet: a knowledge-retentive SAM-CNN hybrid for task-transferable prostate segmentation** [13925-67]
- 13925 OM **Correcting fat-shift from MR images with Bayesian modeling to improve segmentation of extra-cerebral tissues** [13925-21]
- 13925 ON **Efficient labeling: Is prompt-based annotation a viable alternative to manual labeling in endoscopy video segmentation?** [13925-22]

CARDIOVASCULAR IMAGING

- 13925 OO **Dual-phase cross-modal contrastive learning for CMR-guided ECG representations for cardiovascular disease assessment** [13925-23]
- 13925 OP **Aortic valve landmarking and morphometry with U-Net and Monte Carlo simulation** [13925-24]
- 13925 OQ **Neural implicit 3D cardiac shape reconstruction from sparse CT angiography slices mimicking 2D transthoracic echocardiography views** [13925-25]
- 13925 OR **Fighting MRI anisotropy: learning multiple cardiac shapes from a single implicit neural representation** [13925-26]
- 13925 OS **Carotid artery segmentation from 3D ultrasound images using contextual YOLO and adaptive prompted SAM 2** [13925-27]

DEEP-DIVE

- 13925 0T **VAMOS-OCTA: vessel-aware multi-axis orthogonal supervision for inpainting motion-corrupted OCT angiography volumes (Medical Image Processing Student Paper Award - 1st Place)** [13925-28]
- 13925 0U **Impact of reconstruction kernel variability on segmentation consistency in low-dose thoracic CT** [13925-29]
- 13925 0V **A clinical knowledge-guided attention framework for gait-based adult spinal deformity diagnosis** [13925-30]

IMAGE RECONSTRUCTION AND ENHANCEMENT

- 13925 0W **Text controllable PET image denoising** [13925-31]
- 13925 0X **Dual-domain artifact disentanglement for metal artifact reduction in CT images** [13925-32]
- 13925 0Y **DETERMINATOR: determinant gradient field estimation for accurate b-value correction in diffusion MRI** [13925-33]
- 13925 0Z **Forward and back projectors for gradient-based rigid motion estimation in x-ray imaging (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13925-34]
- 13925 10 **A unified deep-learning framework for contrast-phase-specific virtual monochromatic imaging** [13925-35]

TRANSFORMERS

- 13925 11 **Insertion network for image sequence correspondence building** [13925-38]
- 13925 12 **Comparative analysis of model performance for real time surgical tool detection with computer vision** [13925-36]
- 13925 13 **Segmentation of thigh muscle groups in volumetric fat- and water-suppressed MRI by a hierarchical transformer model** [13925-37]
- 13925 14 **Self-supervised ultrasound-video segmentation with feature prediction and 3D localised loss** [13925-39]
- 13925 15 **Multi-PhaseMorph: multi-scale unsupervised registration enabling joint alignment of multi-phase CT imaging of the abdomen (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13925-40]

POSTER SESSION

- 13925 16 **Weakly-supervised Mamba-based mastoidectomy shape prediction for cochlear implant surgery using 3D T-distribution loss** [13925-20]
- 13925 17 **Synthesis of late gadolinium enhancement images and segmentations via implicit neural representations for cardiac scar quantification** [13925-41]
- 13925 18 **Reconstruction-based salient CNN** [13925-42]
- 13925 19 **PS-STU-Net: a patient-specific scalable model for personalized lung CBCT segmentation** [13925-43]
- 13925 1B **Grounding DINOsur: voice-guided tool and anatomy segmentation of cholecystectomy endoscopic images** [13925-45]
- 13925 1C **Simultaneous dual-view mammogram synthesis using denoising diffusion probabilistic models** [13925-46]
- 13925 1D **Frequency-aware inter-branch fusion network for texture-preserving denoising in low-dose CT** [13925-47]
- 13925 1E **A hybrid CNN and ML framework for multi-modal classification of movement disorders using MRI and brain structural features** [13925-48]
- 13925 1F **Leveraging deep learning for enhanced 3D confocal imaging of circulating hybrid cells** [13925-49]
- 13925 1G **Topology-aware DDPM inpainting of evolving MS lesions in paired brain MRI** [13925-50]
- 13925 1H **3D cGAN-based deformation-aware synthesis of prostate TRUS from MR imaging** [13925-51]
- 13925 1I **RibPull: implicit occupancy fields and medial axis extraction for CT ribcage scans** [13925-52]
- 13925 1J **Harmonizing 2D and fat-saturated 3D FLAIR with contour-preserving transfer** [13925-53]
- 13925 1K **OT-Fusion: cortex-conditioned fusion of matched PET and MRI images using optimal transport** [13925-54]
- 13925 1L **Stage-aware segmentation of ischemic stroke lesions: evaluating the impact of treatment phase on model performance** [13925-55]
- 13925 1M **Differentiable endpoint connectivity loss (DECL) for topological connectivity in 2D retinal vessel segmentation** [13925-56]
- 13925 1N **PDSC: a dynamic stopping criterion for active learning in medical image segmentation: a multi-dataset evaluation (Medical Image Processing Cum Laude Poster Award)** [13925-57]

- 13925 1O **Det2Prompt: leveraging detection-based prompts for partially labeled medical image segmentation** [13925-58]
- 13925 1P **Automatic 3D segmentation of kidney ablation zones from CT images using 3D-vision-transformer-based deep learning** [13925-59]
- 13925 1Q **Fast, open-source 2D/3D radiographic image registration using Grangeat's relation** [13925-60]
- 13925 1R **Multimodal active learning with vision-language models** [13925-61]
- 13925 1S **KLO-Net: a dynamic K-NN attention U-Net with CSP encoder for efficient prostate gland segmentation from MRI** [13925-62]
- 13925 1T **Generalization of muscle segmentation models for 3D fat fraction quantification with different Dixon MRI protocols** [13925-63]
- 13925 1U **Reducing annotation effort in muscle MRI segmentation through cross-anatomy learning** [13925-64]
- 13925 1V **Cross-field MRI synthesis using flow matching in multiple sclerosis imaging** [13925-65]
- 13925 1W **PySERA: open-source, IBSI-compliant Python library for automated, scalable, and reproducible radiomics: demonstration of added predictive power** [13925-66]
- 13925 1X **Morphological marker analysis for fibroblast differentiation using foundational segmentation models** [13925-68]
- 13925 1Y **Exploring the use of deep convolutional neural networks to estimate lesion size for computer-aided melanoma detection** [13925-69]
- 13925 1Z **Balancing act: addressing guidance asymmetry in dual-conditional classifier-free diffusion model** [13925-70]
- 13925 20 **Assessment of virtual monochromatic imaging and material decomposition in spectral CT via Monte-Carlo simulations based on a multi-energy phantom** [13925-71]
- 13925 21 **Myocardium segmentation from magnitude and phase-sensitive inversion recovery cardiac MRI using a cross-attention U-Net** [13925-72]
- 13925 22 **MAGnet: synthesis of CT images from MRI data with guided segmentation masks** [13925-73]
- 13925 23 **Intraoperative quantification of hypervascularity during genicular artery embolization (Image Processing Student Paper Award - Runner-Up)** [13925-74]
- 13925 24 **Implications of clinical image quality for interpretation of change in AI breast cancer detection model scores** [13925-75]
- 13925 25 **An integrated multi-modal pipeline for surgical instrument size estimation and classification** [13925-77]

- 13925 26 **U-KAN-Seg: improving universal text-driven CT image segmentation with Kolmogorov-Arnold networks** [13925-78]
- 13925 27 **Federated learning for optic nerve axon segmentation in mice** [13925-79]
- 13925 28 **Cross-neighbor-information-based pseudo-label for better semi-scribble-supervised medical image segmentation** [13925-80]
- 13925 29 **A simple technique for low-to-full dose CT emulation** [13925-81]
- 13925 2B **Deep learning for low-dose computed tomography CAD system** [13925-83]
- 13925 2C **When experts disagree: characterizing imperfect segmentations from multiple annotators when ground truth is unavailable** [13925-84]
- 13925 2D **Multimodal synthesis of MRI and tabular data with diffusion in a joint latent space via cross-attention** [13925-85]
- 13925 2E **Sparse-view CT reconstruction for low-dose CT screening using a pulsed x-ray source and projection-domain view completion** [13925-86]
- 13925 2F **From geometry to intensity: a coarse-to-fine pipeline for unsupervised 3D ultrasound stitching** [13925-87]
- 13925 2G **Topology-aware spectral graph matching for lesion tracking in theranostic SPECT imaging** [13925-88]
- 13925 2H **A benchmark study of methods for surgical instrument segmentation in central airway endoscopy (Medical Image Processing Honorable Mention Poster Award)** [13925-89]
- 13925 2I **Efficient brain extraction of MRI scans with mild to moderate neuropathology** [13925-90]
- 13925 2J **Lightweight semi-supervised coarse-to-fine landmark matching in chest CT using a Siamese network** [13925-91]
- 13925 2K **Clinical validation of perfusion imaging with pulmonary function test data using Voronoi-based discretization** [13925-92]
- 13925 2L **Early detection and differential diagnosis of ovarian cancerous tumors in computed tomography (CT) scans using an nnU-Net-based classifier** [13925-93]
- 13925 2M **Quantitative PET/CT measures from consensus and union of threshold and AI-based segmentation for outcome prediction in limited-stage follicular lymphoma** [13925-94]
- 13925 2N **A two-stage post-hoc video event detection strategy on low-quality surgical videos** [13925-95]

DIGITAL POSTER SESSION

13925 2O **Improving longitudinal geographic atrophy lesion segmentation with deep learning and multi-modal imaging** [13925-3]

13925 2P **Denoising diffusions in latent space for retinal layer segmentation** [13925-76]
