**Volume 13927**

Proceedings of SPIE, 1605-7422, V. 13927

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2026: Image-Guided Procedures, Robotic Interventions, and Modeling*, edited by Maryam E. Rettmann, Pierre Jannin, Proc. of SPIE 13927, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

ix *Conference Committee*

---

## SPINAL/ORTHOPEDIC PROCEDURES

---

- 13927 02 **Towards characterization of semi-autonomous robotic partial sacrectomy using an ultrasonic osteotome (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13927-1]
- 13927 03 **Electromagnetic tracking integration for percutaneous spinal tumour vertebroplasty** [13927-2]
- 13927 04 **Towards curved sacroiliac joint fixation using a steerable drilling robot and flexible sacroiliac screws** [13927-3]
- 13927 05 **Tracking anatomy and surgical devices in pediatric SCFE using a stationary C-arm with a rotating X-ray source** [13927-4]

---

## NAVIGATION/VIDEO APPLICATIONS

---

- 13927 06 **Assisted bronchoscopy for lung cancer management: comparison of a custom system to a historical cohort** [13927-5]
- 13927 07 **Endoscope tracking in surgical navigation: preliminary comparison of da Vinci Xi kinematics and optical tracking** [13927-6]
- 13927 08 **Design and evaluation of an optical encoder coupler for laparoscope rotation tracking in image-guided surgery** [13927-7]
- 13927 09 **Depth anything in medical images: a comparative study** [13927-8]
- 13927 0A **Absolute depth and pose estimation of surgical tools using monocular microscopy in cochlear implantation** [13927-9]

---

## IMAGE PROCESSING AND IMAGE-GUIDED PROCEDURES: JOINT SESSION WITH CONFERENCES 13925 AND 13927

---

- 13927 0B **EndoRDE: robust self-supervised monocular depth estimation with pseudo guidance for colonoscopic videos** [13927-10]
- 13927 0C **Quantifying biases in vision-based surface tactile sensing gastrointestinal cancer datasets using data valuation** [13927-11]

---

#### IMAGING/ANALYSIS FOR GUIDANCE

---

- 13927 OE **EchoPCBM: adaptively fitting PCBM architectures for echocardiographic diagnosis and explainability** [13927-13]
- 13927 OF **Feasibility of automatic registration of multiperspective three-dimensional ultrasound images in gynecological brachytherapy** [13927-14]
- 13927 OG **Rapid force sensing during prostate cancer interventions using optical frequency domain reflectometry (OFDR) fiber optic sensors** [13927-15]
- 13927 OH **Annotation is (almost) indispensable: the limitations of unpaired domain translation and semi-supervised approaches to ultrasound simplification** [13927-53]

---

#### SEGMENTATION/IMAGE-BASED MODELS

---

- 13927 OJ **Automatic cerebrovascular segmentation and 3D-2D registration for image-guided endovascular interventions** [13927-18]
- 13927 OK **Automatic viewing angles prediction for endovascular treatment in intracranial aneurysm (Image-Guided Procedures and Robotic Interventions Early-Career Investigator Award)** [13927-19]
- 13927 OL **Motion-guided scar detection from static left atrial MRI via deformable registration to a healthy atlas** [13927-20]
- 13927 OM **A 3D neural network with adaptive loss and residual connections for intracochlear potential mapping and electro-anatomical model optimization** [13927-21]

---

#### IMAGE-GUIDED PROCEDURES AND IMAGING INFORMATICS: JOINT SESSION WITH CONFERENCES 13927 AND 13930

---

- 13927 ON **Surgical process modeling of emerging technologies for CT-guided liver tumor ablation** [13927-22]
- 13927 OO **Evaluation of deep learning-based surface reconstruction and tracking of surgical scenes for minimally invasive intervention** [13927-23]
- 13927 OP **Robotic stereo-camera system with SAM 2 for multiview surface reconstruction of anatomical structures in surgery** [13927-24]

---

#### SURGICAL GUIDANCE

---

- 13927 OQ **Integrating transcervical ultrasound with transoral robotic surgery for head and neck cancer (Invited Paper)** [13927-25]
- 13927 OR **A framework for beacon-based intraoperative deep margin localization in transoral surgery** [13927-26]

- 13927 OS **Toward a surgical clip-based registration approach for aligning pathology data to tumor bed using mixed reality** [13927-27]
- 13927 OT **SFM-based augmented reality for shoulder arthroscopy** [13927-28]
- 13927 OU **Development and validation of a reflectance-based approach for oxygen saturation estimation using high-speed hyperspectral imaging** [13927-29]

---

#### **INTERVENTIONAL RADIOLOGY/IMAGE-GUIDED INTERVENTIONS**

---

- 13927 OV **Extended field-of-view artery imaging with a multiturn reverse helical acquisition: an animal cadaver study** [13927-30]
- 13927 OW **Enabling real-time volumetric imaging in interventional radiology suites via a deep learning framework robust to C-arm tilt** [13927-31]
- 13927 OX **In vitro measurements of vascular occlusion during transcatheter arterial embolization** [13927-32]
- 13927 OY **Synthesizing decomposed tumor images to enhance tumor contrast in x-ray-guided radiotherapy and interventions using patient-specific flow matching model** [13927-33]
- 13927 OZ **Synthetic data-driven AI for pacemaker removal in X-ray angiograms** [13927-34]
- 13927 IO **Simulation-based framework for guidewire detection and tracking in fluoroscopy: from synthetic sequences to clinical generalization** [13927-35]

---

#### **THERAPEUTIC ASSESSMENT AND PREDICTION**

---

- 13927 I1 **Pathology-guided contrastive pretraining enriches preoperative CT representations for prognosis (Image-Guided Procedures and Robotic Interventions Student Paper Award)** [13927-36]
- 13927 I2 **Combining optimal biomarkers and deep learning for multimodal presurgical prediction of incisional hernia** [13927-37]
- 13927 I3 **Deep learning-based ablation margin assessment in thermal ablation of colorectal liver metastasis: preliminary results of an automatic segmentation workflow** [13927-38]
- 13927 I4 **Computational imaging markers for pancreas cancer therapeutic response via image registration strain biomechanics** [13927-39]

---

#### **THURSDAY MORNING KEYNOTES**

---

- 13927 I5 **Listening to the sound of light to guide surgeries and interventions (Keynote Paper)** [13927-504]

---

## SURGICAL TRAINING AND SKILL ASSESSMENT

---

- 13927 16 **Resection-aware neural network prediction of soft tissue deformation for surgical simulation** [13927-40]
- 13927 17 **Validating RGB-D object detection for skill assessment in central venous catheterization using expert benchmarks** [13927-41]
- 13927 18 **Evaluating markerless deep-learning-based 6D pose tracking of ultrasound probes for medical simulation** [13927-42]
- 13927 19 **Evaluating vibrotactile feedback for electromagnetic surgical navigation** [13927-73]
- 13927 1A **Designing patient-specific virtual phantoms for pediatric patients with congenital heart disease** [13927-44]
- 13927 1B **Procedural blood vessel generation for surgical training of twin-to-twin transfusion syndrome** [13927-45]

---

## POSTER SESSION

---

- 13927 1C **Hyperspectral imaging of human prostate tissue with automatic segmentation and histologic validation** [13927-16]
- 13927 1D **Registration of clinical MRI volumes to low-cost manikin heads for neuronavigation training** [13927-43]
- 13927 1E **RS-SAM: a surgical instrument segmentation method based on a gated feature refinement module (Image-Guided Procedures and Robotic Interventions Cum Laude Poster Award)** [13927-46]
- 13927 1F **Multimodal foundation model for 3D genito-pelvic structure segmentation in image-guided radiotherapy (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13927-47]
- 13927 1G **Interactive lung tumor segmentation using denoising diffusion models** [13927-48]
- 13927 1H **Cardiac cycle-aware segmentation of the left ventricle in echocardiography videos** [13927-49]
- 13927 1J **Deep learning-based automatic urethral segmentation in 3D ultrasound images for prostate brachytherapy (Image-Guided Procedures and Robotic Interventions Honorable Mention Poster Award)** [13927-52]
- 13927 1K **Comparing B-spline and uniGradICON-AI foundational deformable image registration methods: evaluating the tradeoff between accuracy and speed** [13927-54]
- 13927 1L **F-DiffMorph: a 3D foundation model for unsupervised medical image diffeomorphic registration** [13927-55]

- 13927 1M **Towards application of large language models (LLM) to coordinate space transforms and registration** [13927-56]
- 13927 1N **Bi-branch sequential picking strategy for efficiently processing long sequences in surgical phase recognition** [13927-57]
- 13927 1O **Detecting reconstruction-unfriendly surgical scenes using a few supporting frames to improve reconstruction-friendly frame selection for 3D reconstruction** [13927-58]
- 13927 1P **Q-Former-based vision-language alignment for multimodal understanding of endoscopic surgery scenes** [13927-59]
- 13927 1Q **Patient-specific simulation of microwave ablation in breast cancer integrating imaging data, breast density, and power delivery protocols** [13927-60]
- 13927 1R **Learning-based estimation of the unloaded state for biomechanical models of the breast** [13927-61]
- 13927 1S **Regional lung kinematics in an ovine model of acute respiratory distress syndrome under different ventilation strategies** [13927-62]
- 13927 1T **Intrinsic tolerance in C-arm imaging: how extrinsic reoptimization preserves 3D reconstruction accuracy** [13927-63]
- 13927 1U **Dual-energy cone-beam CT using two orthogonal projection views in image-guided radiotherapy** [13927-64]
- 13927 1V **FusionDRR: dual-pathway feature fusion for end-to-end differentiable digitally reconstructed radiograph generation** [13927-65]
- 13927 1W **Pedicle screw pairing and registration for screw pose estimation from dual C-arm images using CAD models** [13927-66]
- 13927 1X **Diffusing the gap: enhancing simulated vision-based surface tactile images of gastric cancer tumors with generative models** [13927-67]
- 13927 1Y **Influence of illumination variation of vision-based surface tactile sensors on AI classification of advanced gastric cancer tumors** [13927-68]
- 13927 1Z **Needle tracking in laparoscopic surgery videos by using a transformer-based approach on weak annotations** [13927-69]
- 13927 20 **LED-based hyperspectral endoscopic imaging: optical simulation-guided illumination optimization** [13927-70]
- 13927 21 **Real-time optimal viewpoint control for image-guided surgery using learning-based active perception** [13927-71]
- 13927 22 **Motion compensation-based compression of data streams recorded from interventional device tracking** [13927-72]

- 13927 24 **Synchrotron radiation phase-contrast imaging enables finite element modeling of the cochlea** [13927-75]
- 13927 25 **Augmented reality in cochlear implantation surgery** [13927-76]
- 13927 26 **Real-time prediction of optimal surgical tool pose for cochlear implant insertion (Image-Guided Procedures and Robotic Interventions Honorable Mention Poster Award)** [13927-77]
- 13927 27 **Monocular marker-free patient-to-image intraoperative registration for cochlear implant surgery** [13927-78]
- 13927 28 **Does sensor calibration matter for surgical skill assessment?** [13927-79]
- 13927 29 **Interpretation of model prediction using SHAP coefficients for spine surgery simulations based on finite element modeling and machine learning (Image-Guided Procedures and Robotic Interventions Honorable Mention Poster Award)** [13927-80]
- 13927 2A **Conductive-thread sensing for open inguinal hernia repair: a low-cost interactive phantom** [13927-81]
- 13927 2B **Multimodal anthropomorphic kidney phantom with refillable collective system** [13927-82]
- 13927 2C **Design and evaluation of a deformable multi-organ abdominal phantom for multimodality imaging applications** [13927-83]
- 13927 2D **CAVASS-DL: an enhanced computer-assisted visualization and analysis software system by integrating deep-learning segmentation models** [13927-84]
- 13927 2E **PyTK-SNAP: a Python-based visualization framework for interactive medical image analysis** [13927-85]

---

**DIGITAL POSTER SESSION**

- 13927 2F **Polyp semantic segmentation with SAM-mixed networks** [13927-51]
