Volume 13930

Proceedings of SPIE, 1605-7422, V. 13930

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2026: Imaging Informatics*, edited by Xiaofeng Yang, William Hsu, Proc. of SPIE 13930, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

SEGMENTATION

- 13930 02 **Semantic segmentation of medical images in radiotherapy through large-language-model-augmented learning (Imaging Informatics Best Paper Award - 1st Place)** [13930-1]
- 13930 03 **A probabilistic segment anything model for ambiguity-aware medical image segmentation** [13930-2]
- 13930 04 **MRI potato head: feature-guided latent diffusion for anatomically consistent 3D brain MRI editing** [13930-3]
- 13930 05 **Self-supervised CBCT segmentation using CBCT-based joint-embedding predictive learning with vision transformers** [13930-4]
- 13930 06 **Brain metastasis detection and segmentation on MRI using a 3D deformable convolution-enhanced nnU-Net** [13930-5]

FOUNDATION MODELS I

- 13930 08 **DINOv3 with test-time training for medical image registration** [13930-6]
- 13930 09 **Structured clinical interpretation of lung computed tomography: a post-detection application of vision language models** [13930-7]
- 13930 0A **Organoid tracker: a SAM2-powered platform for zero-shot cyst analysis in human kidney organoid videos** [13930-8]
- 13930 0B **Medical vision-language models for multimodal breast cancer diagnosis on contrast-enhanced mammography** [13930-9]

IMAGE-GUIDED PROCEDURES AND IMAGING INFORMATICS: JOINT SESSION WITH CONFERENCES 13927 AND 13930

- 13930 0C **DICOM structured reporting templates to support the documentation of surgical operations** [13930-10]
- 13930 0D **Contactless interface for DICOM-viewer platform** [13930-11]

GENERATIVE AI

- 13930 OE **Capabilities of GPT-5 on multimodal medical reasoning** [13930-12]
- 13930 OF **Evaluating generative AI for medical image captioning: a benchmark study on radiology images** [13930-69]
- 13930 OG **LoRA fine-tuning of a small 3B LLM for clinical information extraction and five-year survival prediction in bladder cancer** [13930-14]
- 13930 OH **A proof of concept study on key-slice retrieval task from 3D medical images using a multimodal large language model (MLLM)** [13930-16]

INVITED SESSION II

- 13930 OI **Fairness and AI generalizability in medical image analysis (Invited Paper)** [13930-73]

GENERALIZABILITY AND BIAS

- 13930 OJ **A quantitative pipeline for bias detection and mitigation in medical imaging AI models: a prototype using chest radiography** [13930-17]
- 13930 OK **Performance disparity analysis of a generative classifier for multiclass fundus image classification** [13930-19]
- 13930 OL **Uncertainty-weighted learning to reduce diagnostic uncertainty, evaluate AI models, and augment precise clinical decisions (Imaging Informatics Best Paper Award - Runner Up, Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13930-20]

MODEL-GUIDED MEDICINE

- 13930 OM **Offline deployment of visual language models for automated prioritization of chest x-ray exams in a hospital environment** [13930-21]
- 13930 ON **Impact of site-specific batch effects on deep learning for prostate cancer segmentation on MRI** [13930-27]
- 13930 OO **AI-driven multimodal data integration for neurodegenerative disease therapeutics: a pathway to imaging informatics in Alzheimer's research** [13930-23]
- 13930 OP **Forecasting pediatric emergency department traffic** [13930-24]
- 13930 OQ **A feasibility study on the use of synthetic CT in pelvic radiotherapy: automated pipeline for multilevel AI workflows in CT-CBCT deformable registration** [13930-25]

THURSDAY MORNING KEYNOTES

13930 OR **Making secondary use of clinical imaging work at scale (Keynote Paper)** [13930-507]

DATA MANAGEMENT

13930 OS **Large-scale data harmonization of radiology studies via multigranular vision-language alignment (Imaging Informatics Best Paper Award - Runner Up)** [13930-26]

13930 OT **Modeling workflow, operational, and financial implications of AI-enabled same-day diagnostic follow-up for screening mammograms (Imaging Informatics Best Paper Award - Runner Up)** [13930-22]

13930 OU **Automated and annotation-free localization of lesions in mammography using clinical descriptors** [13930-28]

13930 OV **DermlDS: dermatology imaging data structure for scalable and interoperable AI systems** [13930-29]

13930 OW **Metadata distribution evaluation through hyperdimensional encoding** [13930-30]

FOUNDATION MODELS II

13930 OY **Risk stratification in HER2 breast cancer using multimodal transformer** [13930-31]

13930 OZ **Augmenting deformable 4D lung CT registration with a foundation model** [13930-32]

13930 10 **Human-centered contrastive explanations for medical imaging using VAE-AC-WGAN** [13930-33]

13930 11 **Cross-modal diffusion for region-aligned vocal tract MRI synthesis** [13930-34]

IMAGE-BASED DISEASE CHARACTERIZATION

13930 12 **Anatomy-based similarity algorithm evaluation framework using digital phantoms and machine learning for decision support in head and neck radiation therapy** [13930-56]

13930 13 **Boosting retinal disease diagnosis via LoRA distillation of foundation model** [13930-36]

13930 14 **TinyScope: lightweight hyperspectral tissue classification using TinyML inference on a single-board computer** [13930-37]

13930 15 **Analytic bounds on GAMLSS model variability of normative white matter brain charts** [13930-38]

13930 16 **Image registration for integrated physics-enhanced glioblastoma growth modeling with implicit neural representations** [13930-39]

POSTER SESSION

13930 17 **3D radiotherapy dose prediction using a vision-language flow-matching stable diffusion model** [13930-15]

13930 18 **Radiomic analysis of perivascular adipose tissue entropy predicts lung cancer malignancy: a multicompart ment CT imaging study** [13930-35]

13930 19 **Prostate cancer classification using quantum machine-learning on multiparametric MRI** [13930-40]

13930 1A **Efficient Mamba network for prostate MRI super-resolution (Imaging Informatics Best Paper Award - 1st Place, Imaging Informatics Cum Laude Poster Award)** [13930-41]

13930 1B **Hybrid inverse reinforcement learning for mimicking clinicians' decision-making in sepsis treatment** [13930-42]

13930 1C **Radiomics-based differentiation of renal tumor subtypes using [⁸⁹Zr]Zr-girentuximab PET and MRI** [13930-43]

13930 1D **3D medical image registration based on vision foundation model** [13930-44]

13930 1E **Zero-shot large vision-language model prompting for automated bone identification in paleoradiology x-ray archives** [13930-45]

13930 1F **Evaluating ChatGPT-5 for visual question answering in mammography** [13930-46]

13930 1G **Multistage learning framework powered by foundation models for clinical target and organ delineation in gynecologic radiotherapy** [13930-47]

13930 1H **MRI prostate and lesion localization and segmentation via reinforcement learning and SAM** [13930-48]

13930 1I **Geometry-integrated diffusion models for limited-angle CBCT reconstruction (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13930-49]

13930 1J **Unsupervised transformer-based electronic cleansing trained on unpaired data for laxative-free CT colonography (Imaging Informatics Honorable Mention Poster Award)** [13930-50]

13930 1K **Coupling maps for visualizing chest wall-diaphragm coordination in pediatric thoracic insufficiency syndrome from 4D dynamic MRI** [13930-51]

13930 1L **3D CBCT reconstruction from two orthogonal x-ray projections via a geometry-constrained diffusion model for image-guided head-and-neck radiotherapy** [13930-53]

- 13930 1M **Effect of coarse versus fine nonpolyp annotation granularity on the performance of 3D AI in reducing false-positive polyp detections in laxative-free CT colonography** [13930-55]
- 13930 1N **DermaFormer: an efficient foundation model for dermoscopic lesion segmentation with mixed training strategies** [13930-58]
- 13930 1P **A pilot study of multimodal dosiomics and longitudinal delta-radiomics for predicting radiation-induced xerostomia in head-and-neck cancer** [13930-60]
- 13930 1Q **Predicting treatment outcomes of multiple myeloma via structure-aware temporal modeling** [13930-61]
- 13930 1R **NeuroXAI: lightweight explainable early Alzheimer's detection for resource-constrained clinical settings** [13930-62]
- 13930 1S **Radiomics and deep learning for stratification of uterine fibroid growth risk from baseline ultrasound** [13930-63]
- 13930 1T **AI-assisted identification of small bowel obstruction from point-of-care ultrasound** [13930-64]
- 13930 1U **Beyond radiomics: Bayesian networks and Markov blankets for interpretable survival prediction** [13930-65]
- 13930 1V **Deep learning for automated detection of aortic dissection in noncontrast CT: a large-scale multicenter study** [13930-66]
- 13930 1W **An interpretable vision transformer as a fingerprint-based diagnostic aid for Kabuki and Wiedemann-Steiner syndromes** [13930-68]
- 13930 1X **Enhancing classification of indeterminate pulmonary nodules at multiple scans in NLST dataset through integrated spectral CT radiomics** [13930-70]
- 13930 1Y **Predicting post-treatment stroke infarcts using pretreatment 4D computed tomography perfusion** [13930-71]

DIGITAL POSTER SESSION

- 13930 1Z **Toward generalizable brain age prediction: bias reduction through correlation loss** [13930-18]
- 13930 20 **Predicting cognitive decline scores from neuroimaging and confounder-resistant multitask learning** [13930-67]
