Volume 13932

Proceedings of SPIE, 1605-7422, V. 13932

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2026: Digital and Computational Pathology*, edited by John E. Tomaszewski, Scott Doyle, Proc. of SPIE 13932, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTERPRETABILITY

- 13932 02 **Explainable HER2 scoring based on multidomain stained images in breast cancer** [13932-1]
- 13932 03 **How close are we? Limitations and progress of AI models in Banff lesion scoring** [13932-2]
- 13932 04 **Glomerular image-based explainable prognostic modeling for IgA nephropathy using a large-scale pathology foundation model** [13932-3]
- 13932 05 **Instance scoring via distillation of multiple instance classifiers for interpretable digital pathology (Robert F. Wagner All-Conference Best Student Paper Award - 1st Place)** [13932-4]

FOUNDATION MODELS I

- 13932 06 **Investigating scanner-bias in histopathology image retrieval using foundation models** [13932-5]
- 13932 07 **Intelligent fusion of pathology foundation embeddings applied to histological grading of renal cell carcinomas (Robert F. Wagner All-Conference Best Student Paper Award - Finalist)** [13932-6]
- 13932 08 **Glo-VLMs: leveraging vision-language models for fine-grained diseased glomerulus classification** [13932-7]
- 13932 09 **Foundation-model-based prostate cancer segmentation on digitized H&E prostate pathology** [13932-8]

FOUNDATION MODELS II

- 13932 0A **Evaluating new AI cell foundation models on challenging kidney pathology cases unaddressed by previous foundation models** [13932-9]
- 13932 0B **Foundation-model-assisted characterization of mixed rejection of renal allograft** [13932-10]
- 13932 0C **Quantitative evaluation of pathology foundation model performance for tumor detection in renal cancers: a multi-institutional study** [13932-11]

- 13932 OD **Unsupervised feature extraction with modern deep learning approaches determines tissue specific clustering performance** [13932-12]
- 13932 OE **Self-supervised large-scale kidney abnormality detection in drug safety assessment studies** [13932-13]

DIGITAL PATHOLOGY TOOLS

- 13932 OG **QuadMorph: quadrant morphological stitching for whole slide imaging quadrants** [13932-14]
- 13932 OH **Evaluating GPT-5 for zero-shot multimodal reasoning in digital pathology** [13932-15]
- 13932 OI **Fusion Annotator: a platform for accelerating consensus-driven ground truth generation with AI assistance** [13932-16]
- 13932 OJ **Histopathology whole slide image artifact detection and reporting** [13932-17]
- 13932 OK **Texture feature analysis of stain-separated histopathology images** [13932-18]

CLASSIFICATION AND DATA FUSION

- 13932 OL **Deep learning-based cell type prediction in lung tissue from brightfield histology using CODEX-derived labels** [13932-20]
- 13932 OM **When normalization hallucinates: unseen risks in AI-powered whole slide image processing** [13932-21]
- 13932 ON **Deep learning-based CMS classification from whole slide images in colorectal cancer** [13932-22]

INNOVATIVE METHODS

- 13932 OO **Assessment of conditional image-to-image diffusion model for synthetic histopathology image generation** [13932-23]
- 13932 OP **Exploring fixational eye movements for mitotic figure differentiation in digital pathology** [13932-24]
- 13932 OR **A structure-preserving and semantics-controllable diffusion tool for histopathology image synthesis and resolution enhancement** [13932-26]
- 13932 OS **Federated learning for computational pathology: a pilot study across four institutions** [13932-27]

SEGMENTATION

- 13932 OT **Automatic anatomic segmentation for human hippocampal histology sections** [13932-28]
- 13932 OU **DyMorph-B2I: dynamic and morphology-guided binary-to-instance segmentation for renal pathology** [13932-29]
- 13932 OV **CoFi: a fast coarse-to-fine few-shot pipeline for glomerular basement membrane segmentation** [13932-30]
- 13932 OW **Assessment of AI segmentation models in histopathology whole slide images: the effect of the unit of analysis** [13932-31]

POSTER SESSION

- 13932 OY **MERA tensor network extracted pseudo-labels and Grassmann manifolds for unsupervised intraoperative semantic segmentation of hyperspectral images of adenocarcinoma of the colon in the liver** [13932-33]
- 13932 OZ **LCP1.0: a computational pathomics dictionary as a translational tool between AI researchers and clinicians in liver cancer care** [13932-34]
- 13932 10 **M³-GloDets: multiregion and multiscale analysis of fine-grained diseased glomerular detection** [13932-35]
- 13932 11 **HistoPAG-Net: a multiscale position-aware GNN for weakly supervised histopathology analysis** [13932-36]
- 13932 13 **A pathomics-integrated approach toward improved prediction of kidney survivability up to five years post-biopsy in IgA nephropathy patients** [13932-38]
- 13932 14 **A pathomic-ensemble strategy for exploring histological signatures of eGFR decline in IgAN (Digital and Computational Pathology Honorable Mention Poster Award)** [13932-39]
- 13932 15 **Integrating hand-crafted and foundation model representations for tumor regression grading on digitized post-treatment rectal cancer pathology images (Digital and Computational Pathology Cum Laude Poster Award)** [13932-40]
- 13932 16 **Enhancing histopathological image classification via integrated HOG and deep features with robust noise performance** [13932-41]
