Volume 13946

Proceedings of SPIE 0277-786X, V. 13946

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Active and Passive Smart Structures and Integrated Systems XX*, edited by Xiaopeng Li, Hui Chen, Yangyang Chen, Guoliang Huang, Mostafa A. Nough, Christopher Sugino, Jinkyu Yang, Proc. of SPIE 13946, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

METAMATERIALS AND METASTRUCTURES I

13946 04 **Parametric modeling of folding-wall tension-activated kirigami** [13946-3]

PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS

13946 05 **Compliant structures for shock mitigation in wearable exosuits** [13946-5]

13946 06 **Robust control of stick-slip instability in automotive clutches using next-generation reservoir computing** [13946-6]

13946 08 **The role of time-delayed displacement feedback on the response of a harmonically forced galloping oscillator** [13946-8]

AIRCRAFT, MAV/UAV, AND MORPHING SYSTEMS

13946 09 **3D printing of smart materials for reconfigurable drones** [13946-12]

13946 0A **Multiphysics thermo-mechanical constitutive modeling of elastomeric polymers: toward the 4D printing of shape memory metastructures** [13946-43]

METAMATERIALS AND METASTRUCTURES II

13946 0C **Broad frequency-band wide physical-width acoustic topological waveguides based upon intermittent coupling** [13946-15]

ENERGY HARVESTING AND SCAVENGING I

13946 0F **Beyond identical excitations: multifrequency power response in piezoelectric energy harvester array** [13946-19]

13946 0G **Modeling and analysis of piezoelectric energy harvesters of piezoelectric and geometric nonlinearities** [13946-20]

13946 0H **Supercapacitor charging with multiconnected piezoelectric vibration energy harvesters for wireless sensor nodes and industrial machinery fault classification** [13946-22]

MODELING, OPTIMIZATION, SIGNAL PROCESSING, CONTROL, AND DESIGN OF INTEGRATED SYSTEM

13946 OK **Design and development of a dual-plate actuator for linear motorizations** [13946-26]

SMA- AND PIEZO-BASED MATERIALS AND SYSTEMS

13946 ON **3D printed SMA-driven soft actuators** [13946-27]

13946 OO **Design of a fast-switching SMA-based proportional actuator** [13946-28]

13946 OP **Analysis and design of a two-mode piezoelectric actuator for precision positioning**
[13946-29]

13946 OQ **Excitation of a nonmetallic plate with two integrated external piezoelectric structures**
[13946-30]

13946 OR **Multimodal LGS-based surface acoustic wave sensor for pressure and temperature monitoring of spent fuel canisters** [13946-31]

ENERGY HARVESTING AND SCAVENGING II

13946 OS **An electromagnetic energy harvester with synchronous magnet arrangement for enhanced performance under ultra-low-frequency excitation** [13946-32]

13946 OT **Magnetic energy harvester with dual arrays for multimodal monitoring** [13946-33]

13946 OU **An energy harvesting floor tile with displacement amplification and mechanical energy storage mechanisms** [13946-35]

13946 OV **Electromechanical coupling optimization for the wrist-worn energy harvester with variable transmission ratio mechanism** [13946-36]

SMART SENSING

13946 OW **PINN approach for detecting anomalous base excitations using merged signals from multifunction piezoelectric harvesters** [13946-37]

13946 OX **Deep learning-based environmental compensation for ultrasonic damage localization in wireless ultrasonic devices** [13946-38]

POSTER SESSION

- 13946 0Z **Analysis of correlation characteristics of randomized lattice metamaterial model** [13946-41]
- 13946 10 **Experimental verification of a softening resonator for nonlinear vibration energy harvesting with flat power characteristics** [13946-42]
