SPIE

Volume 13952

Proceedings of SPIE 0277-786X, V. 13952

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Digital Twins, AI, and NDE for Industry Applications and Energy Systems 2026*, edited by Christopher Niezrecki, Saman Farhangdoust, Proc. of SPIE 13952, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DIGITAL TWINS: NDE 4.0, MODELING, MONITORING, AND PROGNOSTICS

- 13952 04 **LeakAgent: a multi-agent system for automated water pipe leak detection** [13952-3]
- 13952 05 **Displacement-partitioned reduced-order modeling using substructural modes** [13952-4]
- 13952 06 **Multisource explainable physics-informed neural network for rolling bearing fault diagnosis** [13952-6]

NDE 4.0 INVOLVING IMAGING, AUTOMATION, ROBOTICS/UAV, AND SENSOR INTEGRATION I

- 13952 08 **Combining the spatial thermal derivative with phased-array thermography: a practical approach** [13952-7]
- 13952 09 **The statistical analysis of visual cues on navigation and mental map development in virtual reality** [13952-11]
- 13952 0A **Optimization of planar capacitive sensing for nondestructive evaluation and materials characterization** [13952-27]

NDE 4.0 INVOLVING IMAGING, AUTOMATION, ROBOTICS/UAV, AND SENSOR INTEGRATION II

- 13952 0C **Application of contrast-to-noise ratio sensitivity function in radiography simulation** [13952-12]
- 13952 0D **Considerations for digital radiography crack detection** [13952-13]
- 13952 0E **Subsurface damage detection with graph neural networks and digital image correlation** [13952-14]
- 13952 0F **Computer-vision-based structural damage detection for 3D digital twin bridge construction models** [13952-28]

AI AND MACHINE LEARNING FOR INDUSTRY AND ENERGY APPLICATIONS OF NDE/SHM I

- 13952 0I **Neutral temperature tracking of continuous welded rails via virtual emulator-assisted boundary translation of thermally induced guided wave signals** [13952-18]
- 13952 0J **Microturbine energy harvesting for acoustic-based wind turbine blade structural health monitoring** [13952-19]

AI AND MACHINE LEARNING FOR INDUSTRY AND ENERGY APPLICATIONS OF NDE/SHM II

- 13952 0K **Synthesizing acoustic emission data using a diffusion-based generative artificial intelligence model** [13952-21]
- 13952 0L **Laser-based monitoring of robotic carbon dioxide injection in fresh additively manufactured concrete** [13952-9]
- 13952 0M **An open world learning framework for anomaly event management in oil wells: dual-threshold novelty detection and continuous learning** [13952-17]
- 13952 0N **Leveraging transformer artificial intelligence for bridge damage identification and structural health monitoring** [13952-24]
- 13952 0O **Reproducible SCADA datasets using faster-than-real-time digital twins** [13952-26]

ON-DEMAND POSTERS

- 13952 0R **Graphene-ink-based piezo resistive strain sensors for high-precision structural health monitoring of fiber-reinforced composites** [13952-15]
