SPIE

**Volume 14074**

Proceedings of SPIE 0277-786X, V. 14074

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Ablation IX*, edited by Claude R. Phipps, Vitaly E. Gruzdev, Proc. of SPIE 14074, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9798902321071

ISBN: 9798902321088 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## LASER-INDUCED MATERIAL MICROSTRUCTURE AND SURFACE

---

- 14074 02 **Scalable advanced surface engineering: addressing challenges with scaling up self-organized laser functionalization (Invited Paper)** [14074-10]

---

## LASER-MATTER INTERACTIONS AND APPLICATIONS

---

- 14074 03 **Surface cleaning with atmospheric pressure plasma jet: process monitoring by laser-induced breakdown spectroscopy and optical emission spectroscopy (Invited Paper)** [14074-14]
- 14074 04 **Elemental mapping with ultrafast laser-induced breakdown spectroscopy (Invited Paper)** [14074-15]

---

## HIGH-POWER LASERS FOR RESEARCH AND APPLICATIONS

---

- 14074 05 **Laser-driven fusion and accelerator facility to generate kHz-rate mixed radiation (Invited Paper)** [14074-19]
- 14074 06 **High power in laser optics: a laser-induced damage threshold (LIDT) based perspective on coating design (Invited Paper)** [14074-51]

---

## EMERGING LASER-ENABLED APPLICATIONS

---

- 14074 07 **Optimization of pulsed laser ablation parameters for fabrication of glass-based microfluidic systems (Invited Paper)** [14074-36]
- 14074 08 **Empirical suppression of line broadening and self-reversal for isotopic analysis of lithium samples using surface-enhanced LIBS** [14074-50]

#### BEAMED ENERGY PROPULSION

---

- 14074 09 **Impulse generation by confined laser ablation: polymers and thin films (Invited Paper)**  
[14074-39]
- 14074 0A **Temporal pulse shaping for optimized laser-driven flyer generation under polymer confinement** [14074-40]
- 14074 0B **Review of laser ablation propulsion** [14074-53]

#### POSTER SESSION

---

- 14074 0C **A flexible finite-difference simulation framework for thermal modeling of burn-through in high-power laser applications** [14074-42]
