Volume 14162

Proceedings of SPIE 0277-786X, V. 14162

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *6th International Conference on Materials Chemistry and Environmental Engineering (CONF-MCEE 2026)*, edited by Harun Çelik, Ömer Burak İstanbullu, Proc. of SPIE 14162, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

6TH INTERNATIONAL CONFERENCE ON MATERIALS CHEMISTRY AND ENVIRONMENTAL ENGINEERING (CONF-MCEE 2026)

- 14162 02 **Effect of reinforced fibers on the vibration characteristics of CFRP boring bar for deep hole machining** [14162-2]
- 14162 03 **Landslide susceptibility prediction based on machine learning ensemble modelling** [14162-3]
- 14162 04 **High-order quarter-wave plate optimization for linear birefringence suppression in reflective FOCS** [14162-4]
- 14162 05 **Artificial nociceptors using Ag/TaO_x/Pt threshold switching memristors** [14162-5]
- 14162 06 **Design of a metamaterial broadband reflector based on hexagonal stacking** [14162-6]
- 14162 07 **Research on optimal scheduling of wind power and pumped storage integrated energy system** [14162-7]
- 14162 08 **Neural network-based predictive modeling of point-defect microcavity dimensions in 2D GaAs photonic crystals** [14162-8]
- 14162 09 **Research on the optimization of building sunlight and daylighting based on BIM** [14162-9]
