

PROCEEDINGS OF SPIE

***International Conference on
Actual Problems of Physics and
Engineering of the Energy Complex
(APEC 2025)***

**Ramazon Abdullozoda
Gulom Uzakov
Arthur Gibadullin**
Editors

**15–17 December 2025
Dushanbe, Tajikistan**

Organized by
Tajik Technical University named after Academician M. S. Osimi (Tajikistan)
Karshi State Technical University (Uzbekistan)

Volume 14165

Proceedings of SPIE 0277-786X, V. 14165

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Actual Problems of Physics and Engineering of the Energy Complex (APEC 2025)*, edited by Ramazon Abdullozoda, Gulom Uzakov, Arthur Gibadullin, Proc. of SPIE 14165, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ENERGY PROCESSES

- 14165 02 **Increasing the corrosion resistance of metal alloys by affecting dislocations during electrical pulse treatment** [14165-2]
- 14165 03 **Physical and technical principles of production and use of biogas for energy supply of remote oil and gas facilities** [14165-5]
- 14165 04 **Modified strip antenna for energy efficiency in IoT infrastructure devices** [14165-8]
- 14165 05 **Processing data on changes in water quality indicators in water supply systems** [14165-10]
- 14165 06 **Methodology for analyzing the reliability characteristics of lattice supports for overhead power lines based on the failure range** [14165-12]
- 14165 07 **Improving the operation of traction networks through the use of compensating devices** [14165-13]
- 14165 08 **Assessment of the climate effect at coal-fired thermal power plants** [14165-18]
- 14165 09 **The impact of climate variability on hydropower and renewable energy potential in the Kyrgyz Republic** [14165-19]
- 14165 0A **Study of the processes of cooling and humidification of outdoor air in an experimental stand using a hygroscopic material** [14165-26]
- 14165 0B **Calculation of fuel combustion processes in blast furnaces using the iterative method** [14165-27]
- 14165 0C **Research into the influence of ozone concentration on the completeness of fuel combustion and reduction of its consumption** [14165-29]
- 14165 0D **Development and simulation of an installation for the regeneration of used engine oils** [14165-31]
- 14165 0E **Effect of liquid viscosity on droplet entrainment in gas-liquid separator with axial swirl-vane** [14165-6]
- 14165 0F **Theoretical and experimental studies of the stress-strain state of intermediate overhead line supports under emergency loads** [14165-11]
- 14165 0G **Pressure distribution around the perimeter of the pipe and nozzle grid** [14165-14]

- 14165 OH **Energy consumption and energy conservation issues in the Republic of Chad** [14165-17]
- 14165 OI **Oxidative dehydrogenation of n-octane in a fluidized bed reactor** [14165-25]
- 14165 OJ **Measures to reduce carbon footprint at thermal power plants** [14165-30]
- 14165 OK **Analysis of the properties of an electrochemical transducer for the identification of asymmetric dimethylhydrazine** [14165-35]
- 14165 OL **Comparative analysis of the theoretical and experimental characteristics of the steam screw machine-200 in the context of power supply for forest terminals** [14165-36]

MATHEMATICS AND COMPUTER SCIENCE IN ENERGY

- 14165 OM **Energy-efficient task allocation for warehouse robot clusters using Mivar decision-making system** [14165-4]
- 14165 ON **Study of natural gas combustion control using laser spectral methods** [14165-9]
- 14165 OO **Results obtained from mathematical modeling of gas flow in high-pressure pipelines** [14165-20]
- 14165 OP **Investigating the effectiveness of an intelligent adaptive algorithm for suppressing electromagnetic interference in automotive onboard networks** [14165-28]
- 14165 OQ **Graph neural network system for fault localization and retuning recommendations in a distribution network** [14165-1]
- 14165 OR **Mathematical models for effective regulation of ore heating to minimise fuel consumption** [14165-3]
- 14165 OS **Application of artificial intelligence in assessing the prospects of solid mineral deposits** [14165-7]
- 14165 OT **Systematic analysis and modeling for sustainable development using quantum-classical computing technologies** [14165-23]
- 14165 OU **Rational use of land resources based on fuzzy modeling and Z-numbers in soil salinity assessment** [14165-24]
- 14165 OV **Lightweight multireceptive field network for petrographic thin section image segmentation** [14165-37]
