

PROCEEDINGS OF SPIE

# ***Third International Symposium on Frontiers of Mechanical and Material Engineering (MME 2025)***

**Feng Gao**  
**Rachid Masrour**  
**Mohd Faizul Mohd Sabri**  
*Editors*

**20–21 December 2025**  
**Chongqing, China**

*Organized by*  
Wuhan Textile University (China)  
Hubei Digital Textile Equipment Key Laboratory (China)  
Chongqing University (China)

*Sponsored by*  
Zhongnan University (China)  
University of Naples Federico II (Italy)  
East-Siberian State University of Technology and Management (Russian Federation)

*Published by*  
SPIE

**Volume 14166**

Proceedings of SPIE 0277-786X, V. 14166

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Symposium on Frontiers of Mechanical and Material Engineering (MME 2025)*, edited by Feng Gao, Rachid Masrouf, Mohd Faizul Mohd Sabri, Proc. of SPIE 14166, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- vii *Conference Committee*
- xi *Introduction*

## **MECHANICAL ENGINEERING AND DESIGN**

---

- 14166 02 **Study on the coupling cavitation flow characteristics of inducer-impeller in low-temperature submerged pump** [14166-25]
- 14166 03 **Design improvement of the hydraulic system for compression garbage trucks** [14166-5]
- 14166 04 **Design of complicated core pulling injection mold for car airtank L/R cover** [14166-2]
- 14166 05 **Optimization of impeller passage structure of straight blade disc pump based on multistage throttling** [14166-22]
- 14166 06 **Experimental design and regression modeling for multifactor optimization in additive manufacturing** [14166-1]
- 14166 07 **Design and experimental analysis of cascaded composite displacement amplification mechanism based on piezoelectric drive** [14166-40]
- 14166 08 **Structural analysis of the lifting device based on sliding rails movement** [14166-3]
- 14166 09 **Design of an automatic feeding mechanical device** [14166-42]
- 14166 0A **Design and analysis of a novel octopod sliding chassis** [14166-4]
- 14166 0B **Design and optimization of elliptical guide vane based on CFD** [14166-28]
- 14166 0C **Study on the manufacturing process of aluminium clamp-type couplings for ship bilge pumps** [14166-44]
- 14166 0D **Design and implementation of an automatic feeding manipulator with a combined clamping-pushing mechanism** [14166-38]
- 14166 0E **Analysis and diagnosis of common faults in mining tunneling machines** [14166-47]
- 14166 0F **Experimental study on vehicle sound insulation based on statistical energy analysis** [14166-49]

---

## MATERIALS SCIENCE AND ENGINEERING

---

- 14166 OG **Failure analysis of chloride-induced stress corrosion cracking in S30403 austenitic stainless steel heat exchanger tube bundle** [14166-12]
- 14166 OH **Performance optimization of PZT-based thin films for piezoelectric vibration energy harvesting via multi-ion doping and heterogeneous film design** [14166-15]
- 14166 OI **Molecular dynamics simulation of the alkali activation process in geopolymers** [14166-16]
- 14166 OJ **Research on the technical performance of foamed asphalt mixture based on micro approaches** [14166-32]
- 14166 OK **Preparation and performance of highly reflective rare earth oxide organic thermal control coating** [14166-17]
- 14166 OL **Study on the rheological properties of AP-based composite modified double-base propellant substitute during molding and plasticizing process** [14166-26]
- 14166 OM **Failure analysis of silane trailer pipeline based on chloride-induced pitting corrosion** [14166-30]
- 14166 ON **Corrosion prediction technology for CO<sub>2</sub>-H<sub>2</sub>S coupled environment based on feature reconstruction** [14166-34]

---

## ELECTRICAL TECHNOLOGY AND NEW ENERGY

---

- 14166 OO **Measuring the wavelength of visible light based on the improved Newton's rings experiment with electronic technology** [14166-45]
- 14166 OP **Research on safety monitoring system for tower erection and hoisting with floor-standing double jib crane** [14166-24]
- 14166 OQ **Research on material properties of recycled power batteries for new energy vehicles based on trusted data space** [14166-46]
- 14166 OR **Research on investment strategies for integrated photovoltaic-storage-charging systems based on particle swarm optimization** [14166-18]
- 14166 OS **Online dynamic parameter estimation of MIMO plants based on particle swarm optimization** [14166-7]
- 14166 OT **Research on circuit board defect detection based on machine vision** [14166-27]
- 14166 OU **Research on mechanism of batteries for NEV recycling and V2G technology with big data and trusted data space** [14166-43]

## SIMULATION, MODELING, AND ENGINEERING TECHNOLOGY

---

- 14166 0V **Numerical simulation of the internal wind field in an accelerated test chamber** [14166-41]
- 14166 0W **Research on pipeline vibration optimization based on fluid-solid coupling harmonic response analysis** [14166-14]
- 14166 0X **Research on the networking method of miter gate structures health monitoring points in ship locks based on vibration response** [14166-29]
- 14166 0Y **Research on the remaining service life prediction and protective measures of shale gas gathering and transportation pipelines** [14166-31]
- 14166 0Z **Vibration reduction performance of multilayer composite plate based on the mechanism of acoustic black hole** [14166-13]
- 14166 10 **Horizontal deformation prediction calculation model for pile-supported foundation pit excavation in soft soil areas** [14166-21]
- 14166 11 **A review of key technologies for digital construction of shield tunnels based on 3D laser scanning and BIM** [14166-10]
- 14166 12 **Construction process monitoring and process optimization of semi-rigid beam string steel structure roof with complex shape: taking Shenzhen Opera House as an example** [14166-23]
- 14166 13 **Force analysis of PLC method combined pile cofferdam structure of Chaoshan Hanjiang special bridge** [14166-19]
- 14166 14 **Research on the method of underwater pipeline corrosion perception based on image processing** [14166-48]
