

PROCEEDINGS OF SPIE

International Conference on Computer Application and Information Security (ICCAIS 2025)

**Hari Mohan Pandey
Farid Boussaid**
Editors

**19–20 December 2025
Wuhan, China**

Organized by
Hubei Zhongke Institute of Geology and Environment Technology (China)

Published by
SPIE

Volume 14170
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14170

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Application and Information Security (ICCAIS 2025)*, edited by Hari Mohan Pandey, Boussaid Farid, Proc. of SPIE 14170, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xv *Conference Committee*

Part One

ARTIFICIAL INTELLIGENCE

- 14170 02 **Bridging the reality gap in text-to-SQL: a multiparadigm empirical study on synthetic data efficacy across model scales** [14170-10]
- 14170 03 **Innovating CAT course through AI technology** [14170-15]
- 14170 04 **A question-answering model for college students' mental health based on attention-mechanism-enhanced LoRA** [14170-18]
- 14170 05 **Cloud-native architecture-based adaptive intelligent multisource data transmission model for exploration and development** [14170-21]
- 14170 06 **Does environmental tax levy improve China's corporate performance?** [14170-26]
- 14170 07 **AI-driven financial control model for power grid enterprises based on data middle platform** [14170-30]
- 14170 08 **BCACHEAICONF: an intelligent adaptive configuration method for bcache acceleration based on eBPF and artificial intelligence** [14170-31]
- 14170 09 **Research on the discovery model of special collection resources in libraries based on multimodal fusion retrieval** [14170-34]
- 14170 0A **M2IEF: a method for extracting semantics of power maintenance method driven by multimodal information** [14170-37]
- 14170 0B **Blockchain and artificial intelligence-driven traceability and financial integration for renewable energy subsidy management** [14170-50]
- 14170 0C **Study on heat transfer of pneumatic pipeline valve based on computer simulation technology** [14170-53]
- 14170 0D **Research on the improvement of random forest model based on multifactor feature fusion and its innovative algorithmic application in stock prediction** [14170-59]
- 14170 0E **Evaluation of supply chain competitiveness from the perspective of corporate social responsibility: a framework incorporating expert credibility** [14170-60]
- 14170 0F **Design of automatic detection device for the horizontal tail of a certain type aircraft** [14170-64]

- 14170 OG **Distributed intelligent monitoring network system for ship engine room automation based on FCS** [14170-72]
- 14170 OH **Research on the construction of an analysis model for the transformation of industrial workers in the context of digitalization** [14170-74]
- 14170 OI **rFedKD-LSR: reverse federated knowledge distillation with low-rank server reconstruction** [14170-77]
- 14170 OJ **GR: a fixed-frequency time series data timestamp compression algorithm based on RLE** [14170-81]
- 14170 OK **Modeling fine-grained interest with deep and cross network for rating prediction** [14170-85]
- 14170 OL **Attention-enhanced lightweight drone small object detection algorithm** [14170-86]
- 14170 OM **Cognitive-aware dual-state fusion network for knowledge tracing** [14170-90]
- 14170 ON **Uncertainty-aware trajectory prediction under complex traffic scenarios** [14170-93]
- 14170 OO **Seepage prediction model for underground powerhouses based on GJO-XGBoost** [14170-101]
- 14170 OP **Study on optimization of prefabricated component production scheduling based on hybrid multiobjective whale optimization algorithm** [14170-102]
- 14170 OQ **Aircraft center of gravity dynamic cooperative trim methodology based on multiagent reinforcement learning** [14170-122]
- 14170 OR **Construction and practice for graduate innovation teams in the perspective of smart education: taking artificial intelligence and interdisciplinary design as an example** [14170-127]
- 14170 OS **Work overload prediction analysis of neural network algorithm based on fusion attention mechanism and dynamic weight adjustment** [14170-130]
- 14170 OT **Research on the asset evaluation method of automobile enterprises based on the PCOA model** [14170-131]
- 14170 OU **A dynamic prediction model for Olympic medal counts using IPHA feature selection and machine learning techniques** [14170-132]
- 14170 OV **Machine-learning-driven multidimensional optimization and mechanism analysis of key challenges in lithium-sulfur batteries** [14170-134]
- 14170 OW **A dual-mode Q-learning framework for adaptive radio resource control in satellite communication terminals** [14170-135]

- 14170 0X **Prediction and analysis of workability and compressive strength of concrete based on machine learning** [14170-138]
- 14170 0Y **HV-BES-FNN: a novel horizontal-vertical bald eagle search optimized fuzzy neural network for eco-positioning evaluation** [14170-143]
- 14170 0Z **Research on firepower deployment demand model in terminal air defense combat** [14170-144]
- 14170 10 **Cost prediction of green buildings based on machine learning** [14170-154]
- 14170 11 **A function-decomposition-based interpretability method for black-box power grid time-series models** [14170-157]
- 14170 12 **Intelligent back analysis of wetting deformation parameters for rockfill materials in high core rockfill dams overburden** [14170-161]
- 14170 13 **Fire risk analysis of high rise public buildings based on fuzzy Bayesian network** [14170-168]
- 14170 14 **Genetic-algorithm-based optimization of robot task allocation strategy** [14170-170]
- 14170 15 **On the use of multiple machine learning algorithms for pig price prediction and their performance comparison** [14170-173]
- 14170 16 **Research on multirole allocation problems in role-dependent teams based on the E-CARGO model** [14170-179]
- 14170 17 **Combining random forest algorithm with geostatistics to achieve high-precision inversion of reservoir permeability** [14170-196]
- 14170 18 **Artificial intelligence financial decision support system for intelligent manufacturing enterprises** [14170-199]
- 14170 19 **A machine learning approach for personalized tourist experience optimization in smart scenic areas** [14170-201]
- 14170 1A **Distributed fault diagnosis method for electrical automation based on multiagent deep deterministic policy gradient** [14170-205]

BIG DATA ANALYSIS

- 14170 1B **Research on a multilevel structured modeling method for standards data** [14170-8]
- 14170 1C **FSIR: a fungal sequence classification model based on sequence alignment and HNSW** [14170-12]
- 14170 1D **A novel adaptive weighting approach for multimodal biomedical data fusion in prediction model** [14170-63]

- 14170 1E **Research on data quality management system for high quality dataset** [14170-65]
- 14170 1F **Research on data-driven software intelligent evolution model** [14170-66]
- 14170 1G **Construction of a knowledge graph of heat-clearing agent Chinese patent medicine based on Neo4j graph data management system** [14170-69]
- 14170 1H **Research on visual data analysis application platform for power marketing business based on the middle-platform service components** [14170-87]
- 14170 1I **A data-driven approach to predicting burnout: application of random forest** [14170-129]
- 14170 1J **Research on ironmaking process parameter identification and reactor performance prediction methods based on industrial big data** [14170-146]
- 14170 1K **Research on the application of cloud-based data fusion and visualization in line monitoring** [14170-182]
- 14170 1L **Research on decision support algorithms for intelligent manufacturing resource optimization driven by big data** [14170-183]
- 14170 1M **Big-data-based decision support system for smart manufacturing enterprises** [14170-187]
- 14170 1N **Research on social media big data sentiment mining and emotion analysis** [14170-208]

COMPUTER TECHNOLOGY AND APPLICATIONS

- 14170 1O **Prediction of slope instability and analysis of displacement uncertainty during flood season based on Kalman filtering algorithm** [14170-2]
- 14170 1P **Multi-language support algorithm and its implementation in German translation software** [14170-3]
- 14170 1Q **Research on a realtime detection scheme for trusted computing architecture of ARM-Linux-based localization-oriented devices** [14170-9]
- 14170 1R **Optimization of task offloading decision for smart home systems based on terminal-edge-cloud collaborative architecture** [14170-14]
- 14170 1S **The development and application of a dynamic calculation system for housing demolition compensation** [14170-17]
- 14170 1T **A forward energy consumption model of electric vehicles based on the hardware-in-the-loop system** [14170-24]
- 14170 1U **Development of an intelligent vehicle system for precision detection and pesticide application against crop diseases and pests in plateau regions** [14170-25]

- 14170 1V **Semantics-constrained dynamic visual-inertial SLAM for high-precision localization in large-scale parking lots** [14170-28]
- 14170 1W **PID control strategy and performance analysis of active suspension integrated with Kalman filter** [14170-35]
- 14170 1X **Optimization of intelligent substation UAV inspection system** [14170-38]
- 14170 1Y **Improved algorithm for UAV target detection fusing dual attention mechanisms** [14170-46]
- 14170 1Z **A novel outlier detection method using priority k-nearest neighbor graph** [14170-62]
- 14170 20 **DOAMixNet: an efficient DOA estimation model under small snapshot conditions** [14170-88]
- 14170 21 **Intelligent recognition and classification system for sensitive information based on multiscale feature fusion** [14170-94]
- 14170 22 **Study on water level differences across barrages in plain regions under high flooding conditions based on three-dimensional numerical simulation** [14170-100]
- 14170 23 **Stability analysis of the deep headrace shaft at Songyang Pumped Storage Power Station** [14170-103]
- 14170 24 **Evaluation of parameter influences and sensitivity analysis for a new composite ecological slope protection** [14170-211]
- 14170 25 **Application of curvature modal sensitivity in model updating damage identification** [14170-119]
- 14170 26 **Particle flow numerical simulation of static mechanical characteristics of filled jointed rock after impact disturbance** [14170-126]
- 14170 27 **An exterior wall restoration robot based on binocular vision detection** [14170-133]
- 14170 28 **Design and implementation of a link-level hardware-in-the-loop simulation platform for weak signal satellite reception** [14170-137]
- 14170 29 **Research on adaptive search and pruning algorithm (ASPA) using computer-assisted solutions** [14170-140]
- 14170 2A **Research on evolutionary path of SMEs based on adaptive evolutionary algorithm model and complex system theory** [14170-141]
- 14170 2B **Research on aerodynamic performance of unmanned aerial vehicles based on fluent sliding mesh method** [14170-142]
- 14170 2C **Experimental study on cement-GGBS/volcanic ash composite solidification of silted soft soil** [14170-147]

- 14170 2D **A soil temperature calculation model for solar greenhouses based on unsteady heat transfer theory** [14170-149]
- 14170 2E **Strength evolution and microstructural response of fiber-reinforced loess subjected to cyclic wetting-drying** [14170-150]
- 14170 2F **Study on performance degradation modelling and bearing capacity design methods for concrete members of bridges with a design life of 200 years** [14170-151]
- 14170 2G **Analysis of wind load characteristics on the roof structure of low-rise buildings** [14170-152]
- 14170 2H **Research on monitoring of temperature changes and numerical simulation of temperature fields of permafrost subgrade treated with foamed lightweight soil** [14170-159]

Part Two

- 14170 2I **Research on the composition characteristics and local development of contemporary horse racing sports space based on man-land relationship** [14170-160]
- 14170 2J **A comprehensive review of geosynthetic-reinforced soil bridge abutments: current status and future trends** [14170-162]
- 14170 2K **Analysis and research on design of a hyperbolic saddle-shaped steel roof structure** [14170-163]
- 14170 2L **Study on factors influencing the diffusion range of grout in soil during post-grouting of non-squeeze out soil pipe piles** [14170-164]
- 14170 2M **Design strategies for the regeneration of idle spaces in Daqitou Village driven by digital nomads** [14170-165]
- 14170 2N **The financial market spillover effects of embedding blockchain technology in tax collection and administration: a policy evaluation based on the synthetic control method** [14170-166]
- 14170 2O **Real-time correction and decision support method for large-scale venue irregular structure construction based on digital twins** [14170-167]
- 14170 2P **Study on digitalization of engineering management based on computer vision and digital systems** [14170-171]
- 14170 2Q **Freeze-thaw resistant cement paste performance enabled by CNT-modified phase-change microcapsules** [14170-172]
- 14170 2R **Optimization of oil groove configuration for low-speed heavy duty wet clutches through thermal-stress field analysis based on multiobjective genetic algorithm** [14170-175]
- 14170 2S **Research on product quality control of company based on ARIMA-BP-SPC** [14170-178]

- 14170 2T **Research on animation character sequence generation and style transfer technology based on diffusion model** [14170-181]
- 14170 2U **Research on the intelligent operations path of rural sewage treatment under EOD mode** [14170-186]
- 14170 2V **Research on intelligent online exam proctoring system based on face identification and multimodal behavior** [14170-188]
- 14170 2W **Fluid flow field analysis in pipes during leakage based on ANSYS Fluent simulation** [14170-191]
- 14170 2X **Research on innovative technology for seismic reinforcement of buildings using composite hollow slab grid system** [14170-192]
- 14170 2Y **Applications and challenges of digital twin technology in smart manufacturing** [14170-200]
- 14170 2Z **Research on the stress analysis and applicability of flexible support steel strip in soft ground highway tunnels** [14170-203]
- 14170 30 **Design and application of an intelligent bridge launching system based on PLC cluster control and a digital integrated platform** [14170-204]
- 14170 31 **Distributed rotating formation control for multiple wheeled robot vehicles** [14170-206]
- 14170 32 **Digital twin-based management platform for soil and water conservation in power grid projects** [14170-210]
- 14170 33 **Research progress on the combined method of metro jet system and artificial ground freezing** [14170-106]

DEEP LEARNING

- 14170 34 **Semantic segmentation via Chan-Vese and dynamic convolution** [14170-11]
- 14170 35 **Text-based detection of pornographic websites with deep learning** [14170-29]
- 14170 36 **LMA-GRU: a lightweight spatiotemporal framework for encrypted traffic classification in IoT networks** [14170-32]
- 14170 37 **New energy vehicle sales forecasting based on CEEMDAN-PSO-BiLSTM** [14170-33]
- 14170 38 **LACNN-based FMCW radar real-time fall detection** [14170-39]
- 14170 39 **A data-driven framework for stock return prediction and market risk identification using rolling machine learning models** [14170-41]

- 14170 3A **Disease prediction model based on 1D-VGG net neural network** [14170-48]
- 14170 3B **Research on fault diagnosis method for mechanical equipment based on heterogeneous intelligence and multisource data fusion** [14170-52]
- 14170 3C **DDoS detection technology based on deep learning** [14170-70]
- 14170 3D **Design of common insect recognition system based on deep learning** [14170-73]
- 14170 3E **HierFuse-Net: learned multiscale fusion for medical image segmentation** [14170-89]
- 14170 3F **Underdetermined DOA estimation of wideband LFM signals in sparse arrays based on WGAN-GP covariance matrix reconstruction** [14170-91]
- 14170 3G **Establishment of gas concentration prediction model based on CEEMDAN-TCN-GRU** [14170-95]
- 14170 3H **HiCo-GAACE: a contrastive learning-based attributed graph autoencoder integrating histological images for spatial transcriptomics clustering** [14170-96]
- 14170 3I **A parallel hybrid architecture integrating transformer and convolutional neural network for tabular classification** [14170-107]
- 14170 3J **Fast prediction of unsteady aerodynamic fields based on physics-informed neural networks** [14170-123]
- 14170 3K **Optimization of interactive aviation speech generation model based on reinforcement learning** [14170-124]
- 14170 3L **A comparative study of DeepSeek and ChatGPT for character relationship analysis in natural language** [14170-136]
- 14170 3M **The technology of financial fraud detection in listed companies through the synergy of deep learning and textual sentiment analysis** [14170-153]
- 14170 3N **Integrated design of compliance control and intelligent interaction for bionic manipulator based on deep learning** [14170-155]
- 14170 3O **A dynamic demand forecasting model for entrepreneurial markets based on improved transformer algorithm** [14170-156]
- 14170 3P **Research on ultrasound probe sound field simulation and rail defect detection based on deep learning** [14170-176]
- 14170 3Q **Smart contract vulnerability detection based on improved GraphCodeBERT** [14170-177]
- 14170 3R **Application of DenseNet model integrated with Riemannian manifold optimization in potato blight classification** [14170-180]

- 14170 3S **Research on real-time monitoring and fault prediction model for microelectronic chip operation status** [14170-195]
- 14170 3T **Real-time construction progress monitoring based on BIM-GIS integration via deep learning object detection** [14170-202]
- 14170 3U **Multimodal deep learning for defect detection in stainless steel pipe manufacturing** [14170-209]

HUMAN-COMPUTER INTERACTION SYSTEM

- 14170 3V **Vehicle simulation testing based on a virtual test bench** [14170-22]
- 14170 3W **Research on natural language driven intelligent visualization generation based on deep integration of LLM and BIM** [14170-23]
- 14170 3X **A framework for automating standard operating procedures in government services based on large language models** [14170-40]
- 14170 3Y **Cost-sensitive adaptive XGBoost algorithm for imbalanced data stream** [14170-43]
- 14170 3Z **A multimodal situational information extraction and management system based on large language models** [14170-45]
- 14170 40 **Study on multiscale algorithm modeling of rock breaking mechanism and its influencing factors of shield machine tool** [14170-47]
- 14170 41 **The application of CAE simulation technology in the noise analysis of air conditioning duct** [14170-49]
- 14170 42 **Research on delivery route optimization for unmanned aerial vehicle logistics (UAL) based on wireless networks** [14170-54]
- 14170 43 **Learning to switch safely: terrain-adaptive humanoid locomotion acquisition via hard-routed mixture-of-expert motion imitation** [14170-75]
- 14170 44 **Lightweight human-computer interaction-based rural service platform: design, implementation and application in Hunan's rural industry** [14170-80]
- 14170 45 **The KL-VPRS medical image segmentation method optimized by the Grey Wolf algorithm** [14170-97]
- 14170 46 **A SystemVerilog and DPI-C co-simulation verification platform for USB TT&C system** [14170-109]
- 14170 47 **A mobile-based traffic accident data collection system with integrated web visual analytics** [14170-184]

- 14170 48 **Interactive virtual laboratory based on augmented reality** [14170-193]
- 14170 49 **Application of virtual reality technology in virtual experience design** [14170-198]

INFORMATION SECURITY AND APPLICATIONS

- 14170 4A **Research on information security and privacy protection model of international students' education based on blockchain technology** [14170-1]
- 14170 4B **Federated deep Q-Networks: an optimization approach and its application to distributed scheduling** [14170-16]
- 14170 4C **Research on GNSS anti-jamming technology based on an improved Riemannian optimization DOA estimation algorithm** [14170-27]
- 14170 4D **A novel reversible data hiding in shared JPEG images based on robust Chinese remainder theorem** [14170-42]
- 14170 4E **A superpixel and concave point-based framework for precise segmentation of touching grain kernels** [14170-61]
- 14170 4F **Traceable and anomaly-aware QoS for single-stack IPv6 in power grids via HMM-GNN fusion** [14170-82]
- 14170 4G **Conformal geometric algebra graph learning theory for non-Euclidean data** [14170-158]
- 14170 4H **A malware detection framework utilizing multidimensional feature fusion and hierarchical mixture of experts** [14170-174]

WIRELESS COMMUNICATION AND NETWORK TECHNOLOGIES

- 14170 4I **Integrated application of 5G slice and TSN for industrial Internet of Things** [14170-4]
- 14170 4J **Practice of timing synchronization techniques for 5G slicing in deterministic networks** [14170-5]
- 14170 4K **Optimization study of 5G slicing network architecture based on TSNs** [14170-6]
- 14170 4L **Application of 5G slicing technology in deterministic network design** [14170-7]
- 14170 4M **A cloud-based service model approach for combat resources based on Link 16** [14170-13]
- 14170 4N **The application of intelligent monitoring systems in the elderly care industry** [14170-44]

- 14170 4O **The optimization and development of logistics distribution network system in low-altitude environment** [14170-51]
- 14170 4P **Design and research of an elderly care information management system based on a web platform** [14170-57]
- 14170 4Q **Research on the four-dimensional structure model of data value added network based on data system** [14170-68]
- 14170 4R **Enhancing IQ imbalance mitigation at low SNR regions using attention-augmented contrastive networks** [14170-128]
