

PROCEEDINGS OF SPIE

***Second International Conference  
on Remote Sensing Technology  
and Image Processing  
(RSTIP 2025)***

**Amin Beiranvand Pour  
Mohamed Elhag  
Dimitrios A. Karras**  
*Editors*

**26–28 December 2025  
Harbin, China**

*Organized by*  
Xi'an University of Technology (China)

*Sponsored by*  
AEIC Academic Exchange Information Centre (China)

*Published by*  
SPIE

**Volume 14171**

Proceedings of SPIE 0277-786X, V. 14171

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing Technology and Image Processing (RSTIP 2025)*, edited by Amin Beiranvand Pour, Mohamed Elhag, Dimitrios A. Karras, Proc. of SPIE 14171, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## REMOTE SENSING IMAGE AND DATA PROCESSING

---

- 14171 02 **PPVO: real-time image/video restoration via jointly patch propagating and a ViT-based optimization** [14171-6]
- 14171 03 **Diamond composite refractive lens image segmentation algorithm based on improved U-Net** [14171-34]
- 14171 04 **Step-wise fast sparse unmixing based on adaptive spectra selection** [14171-55]
- 14171 05 **Research on semantic segmentation of remote sensing images based on multiscale frequency enhancement** [14171-41]
- 14171 06 **Multiscale feature extraction and spectral spatial enhancement transformer for remote sensing image captioning** [14171-35]
- 14171 07 **Small-object-aware network for referring remote sensing image segmentation** [14171-60]
- 14171 08 **A lightweight remote sensing change detection method based on dual-path feature interaction network** [14171-36]
- 14171 09 **A color transfer method for urban construction site remote sensing images based on improved CycleGAN** [14171-27]
- 14171 0A **WTB-TFNet: a novel framework for high-resolution semantic segmentation with weak target detection and optimization** [14171-59]
- 14171 0B **Surface defect detection in silicon rod using machine vision** [14171-54]
- 14171 0C **Synthetic aperture radar (SAR) imaging study** [14171-13]
- 14171 0D **Geometric structure-aware remote sensing image change detection method** [14171-26]
- 14171 0E **Deep learning in image recognition: a comprehensive review** [14171-17]
- 14171 0F **Research on infrared system and radar information association technology** [14171-37]
- 14171 0G **Life-SRNet: a lightweight enhanced U-Net for remote sensing image super-resolution** [14171-5]

- 14171 OH **A global-local feature refinement network for road extraction from high-resolution remote sensing images** [14171-30]
- 14171 OI **CB-TransUNet: context-aware embedding and boundary-guided fusion for high-resolution remote sensing image segmentation** [14171-20]
- 14171 OJ **PPS-YOLO11: an improved road object detection algorithm for complex traffic environments** [14171-53]
- 14171 OK **Integrated foundation models for surface water segmentation from optical and SAR remote sensing data** [14171-2]
- 14171 OL **CMCS-YOLO: steel wire rope surface defect detection via multicognitive visual adaptation and context-spatial feature calibration** [14171-29]
- 14171 OM **High-resolution remote sensing satellite image restoration method combining constrained least squares filtering and guided filtering** [14171-9]
- 14171 ON **Integrating low-pass filter and adaptive upsample in infrared small-target detection** [14171-11]
- 14171 OO **Physical prior-guided SAM adaptation for underwater scene segmentation** [14171-21]
- 14171 OP **Surface defect detection of photovoltaic panel based on improved YOLOv11 algorithm** [14171-44]
- 14171 OQ **EMS-Net: a lightweight multiscale-aware building extraction network based on feature analysis fusion** [14171-39]
- 14171 OR **WGGA-Net: a wavelet-guided and gated aggregation collaborative network for ship detection in remote sensing imagery** [14171-8]

---

#### INTELLIGENT REMOTE SENSING APPLICATIONS

---

- 14171 OS **Sonar survey technology of limited space based on ROV** [14171-58]
- 14171 OT **Modelling study of tidal responses to land reclamation: a case study of Dongshan Bay, Fujian Province, China** [14171-4]
- 14171 OU **River morphology, sediment dynamics, and bank protection in the Hawkesbury-Nepean River system** [14171-42]
- 14171 OV **Data-mining-based refined analysis of summer and winter resort resource quality** [14171-19]
- 14171 OW **Exploring the application of GIS technology in the study of temperature and precipitation changes in South China** [14171-28]

- 14171 0X **Exploring the application of GIS technology in studying changes in water evaporation and water surplus in South China** [14171-23]
- 14171 0Y **Research on intelligent interpretation of multisource remote sensing images and automatic thematic mapping powered by artificial intelligence** [14171-56]
- 14171 0Z **Wall verticality measurement based on 3D point cloud processing** [14171-12]
- 14171 11 **Analysis of land use types in Jiulongpo District, Chongqing City using remote sensing images** [14171-51]
- 14171 12 **Research on compensation for ecosystem service value in small watersheds of Southwest Karst mountainous regions: a case study of the Liuchong River Basin in Bijie City, Guizhou Province** [14171-65]
- 14171 13 **Intelligent anomaly detection for dam safety monitoring integrating BeiDou positioning data and spectrum-CNN** [14171-18]
- 14171 14 **Research on dam displacement detection and early warning based on BeiDou positioning data and LSTM-AR** [14171-22]
- 14171 15 **Tackling the remote sensing data deluge: a study on the critical role of space data centers in large-scale heterogeneous constellations** [14171-63]
- 14171 16 **Research on machine vision-based quality inspection technology for cigarette packaging inner frame paper of the FOCKE FX-2 machine** [14171-47]
- 14171 17 **Characterization of urban green space tree root systems using ground-penetrating radar** [14171-31]
- 14171 18 **Multimodal deep learning framework for remote sensing disaster recognition** [14171-7]
- 14171 19 **Comparative study on ground penetrating radar detection performance for submerged oil pipelines in coastal and inland regions** [14171-61]
- 14171 1A **UAV-based tri-spatial monitoring of environmental resources in southwestern China's complex terrain** [14171-38]
- 14171 1B **Closure phase as a novel parameter for deadwood moisture monitoring** [14171-33]
- 14171 1C **Research on the crowdsourcing visualization interface of ground-based remote sensing data based on CMA big data and cloud platform** [14171-43]
- 14171 1D **Improving the accuracy of spaceborne GNSS-R sea surface height retrieval based on a novel regional differentiated intelligent altimetry method** [14171-48]
- 14171 1E **Reconstructing the surface humidity situation in Shapingba District of Chongqing City over the past 20 years using remote sensing images** [14171-62]

- 14171 1F **Space-based GNSS receiver assessments based on telemetry data set from an SSO spacecraft [14171-32]**
- 14171 1G **Co-seismic deformation field retrieval and time-series deformation monitoring of the 2024 Ushi, Xinjiang Mw 7.1 earthquake based on InSAR [14171-10]**
- 14171 1H **Research on metal item identification equipment based on the ultrasonic pulse reflection method [14171-45]**
