Volume 14174

Proceedings of SPIE 0277-786X, V. 14174

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Machine Vision, Intelligent Imaging, and Pattern Recognition (MVIIPR 2025)*, edited by Linlin Shen, Jixin Ma, Chuan Qin, Proc. of SPIE 14174, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

MACHINE VISION, INTELLIGENT IMAGING, AND PATTERN RECOGNITION (MVIIPR 2025)

- 14174 02 **A computational framework to generate manufacturable models from images for heritage restoration** [14174-1]
- 14174 03 **Autonomous takeoff and landing control of a VTOL aircraft on a moving platform based on visual feedback** [14174-2]
- 14174 04 **A PSO-random forest-based cross-domain fault pattern recognition system for high-speed train bearings** [14174-3]
- 14174 05 **Graph neural networks for music structure recognition and harmonic analysis** [14174-4]
- 14174 06 **Survey on research progress of image dehazing algorithms** [14174-5]
- 14174 07 **Analyzing convergence mechanisms in multi-agent vision systems via Q-Learning: a repeated game perspective** [14174-6]
- 14174 08 **Enhancing diagnostic accuracy of dental CT images through AI-driven segmentation algorithms** [14174-7]
- 14174 09 **Lightweight UAV object tracking model based on cross-modal feature fusion** [14174-8]
- 14174 0A **Emotion detection model of Huangmei Opera based on three-modal transformer joint representation learning** [14174-9]
- 14174 0B **Design of an automatic matching method for bill of quantities using graph convolutional networks** [14174-10]
- 14174 0C **AI-driven multimodal emotion recognition: attention-guided face-pose fusion with edge-oriented deployment optimization** [14174-11]
- 14174 0D **Multimodal sentiment analysis of SME reviews: a BERT-BiLSTM-attention hybrid model with visual feature fusion** [14174-12]
- 14174 0E **Adaptive temporal pattern recognition in multi-pathogen biosurveillance** [14174-13]
- 14174 0F **Research on lane line detection algorithms for edge deployment** [14174-14]

14174 0G **Design of a visual detection system for microbial fermentation processes** [14174-15]

14174 0H **Research on optimizing multimodal visual recognition algorithms based on self-supervised learning** [14174-16]
