

PROCEEDINGS OF SPIE

***International Conference
on Optoelectronic Science
and Intelligent Sensing
(ICOIS 2026)***

**Umapada Pal
Bo Dong**
Editors

**9–11 January 2026
Kunming, China**

Organized by
Changchun College of Electronic Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

SPIE

Volume 14175

Proceedings of SPIE 0277-786X, V. 14175

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optoelectronic Science and Intelligent Sensing (ICOLS 2026)*, edited by Umapada Pal, Bo Dong, Proc. of SPIE 14175, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICAL SENSING AND PRECISION MEASUREMENT

- 14175 02 **Generalized model for near-infrared spectroscopy of corn moisture based on UVE and model transfer** [14175-52]
- 14175 03 **Laser circumferential scanning detection technology for correction of rotary body skew** [14175-38]
- 14175 04 **High-current measurement technology based on NV sensor** [14175-28]
- 14175 05 **Measurement method of nano film thickness standard sample based on spectral ellipsometry** [14175-15]
- 14175 06 **Potentiometric sensor chip with integrated all-solid-state ion-selective electrodes for detection of heavy metal ions** [14175-8]
- 14175 07 **Optimized design of smoke fire detector** [14175-32]
- 14175 08 **UAV-borne integrated LiDAR-photoelectric sensing for precise path detection of smart transportation pipelines in the Oujiang Estuary soft soil area** [14175-17]
- 14175 09 **Design of a frequency-modulated continuous-wave laser detection system** [14175-2]
- 14175 0A **Analysis of the influence of optical dividers on saturated absorption spectroscopy** [14175-43]
- 14175 0B **An intelligent optical sensing methodology based on ATR-FTIR and feature selection for rapid material discrimination** [14175-5]
- 14175 0C **Research on the measurement model and algorithm of silicon carbide epitaxial layer thickness based on infrared double-beam interference** [14175-54]
- 14175 0D **A circular dual-beam cantilever fiber-optic Fabry-Perot acoustic sensor based on MEMS technology** [14175-29]
- 14175 0E **Optical cable external damage detection method based on variational modal decomposition (VMD) of sensor signals** [14175-27]
- 14175 0F **Design of a dual-monochromatic-light alcohol concentration measurement system based on near-infrared absorption** [14175-51]

- 14175 OG **Third-party activity recognition in oil and gas pipelines based on shape features of fiber-optic monitoring data** [14175-10]
- 14175 OH **Fault identification method for vibration monitoring sensor of nuclear emergency diesel engine** [14175-47]
- 14175 OI **Programmable ice-water interface manipulation for universal biomolecule enrichment and sensing** [14175-22]
- 14175 OJ **Evaluation of quality parameters for micro-nano-scale step height samples** [14175-3]
- 14175 OK **Design and implementation of a multi-sensor integrated system for water quality and level detection** [14175-40]

FUNDAMENTAL OPTICS, IMAGING AND INTELLIGENT TECHNOLOGIES

- 14175 OL **Investigation of size effects and thermo-electrical coupling mechanisms in GaAs laser power converters** [14175-53]
- 14175 OM **Enhancing coherent atom-cavity interaction via chiral exceptional points with an auxiliary lossy cavity** [14175-23]
- 14175 ON **Toroidal dipole quasi-BIC with stable resonance wavelength in all-dielectric metasurfaces** [14175-33]
- 14175 OO **Generation of orbital angular momentum modes in chirally-coupled-few-mode fibers** [14175-34]
- 14175 OP **Development of deep ultraviolet high-reflective films** [14175-20]
- 14175 OQ **Research on electromagnetic immunity testing methods for touch functions in automotive infotainment systems** [14175-12]
- 14175 OR **The symmetry selection of optical mode evolution in tapered waveguides** [14175-42]
- 14175 OS **Neutrino oscillations in the gravitational wave background induced by a binary system** [14175-6]
- 14175 OT **Solar active regions and related solar-terrestrial effects** [14175-4]
- 14175 OU **Automatic tracking and ball picking system based on multi-level PID and dynamic visual servo** [14175-31]
- 14175 OV **Near-space high dynamic range short-wave infrared detector imaging circuit design** [14175-25]
- 14175 OW **Defect detection based on hyperspectral imaging** [14175-45]

- 14175 0X **Pose estimation method based on gravity-magnetic dual-mode adaptive Kalman filtering** [14175-26]
- 14175 0Y **Angle-multiplexed nonlocal meta-lens** [14175-48]
- 14175 0Z **Optical and ultraviolet follow-up observations of gravitational wave sources: multi-messenger strategies for kilonovae and gamma-ray burst afterglows** [14175-16]
- 14175 10 **Development and performance of a sealed tube MCP imaging detector based on delay line anode** [14175-9]
- 14175 11 **Learning-based reconstruction of moving transparent objects** [14175-41]
- 14175 12 **An online calibration method for visual-IMU adaptive weight fusion based on multi-dimensional confidence** [14175-37]
- 14175 13 **M³Net: multi-branch Mamba merging network for hyperspectral image classification** [14175-36]
- 14175 14 **Analysis of illumination uniformity and data transmission performance of VLC system based on different LED array structures** [14175-50]
- 14175 15 **Design and implementation of an intelligent baby crib monitoring system based on multi-sensor fusion** [14175-44]
- 14175 16 **Compressed sensing with deep learning applied in ATP** [14175-39]
