

PROCEEDINGS OF SPIE

Seventh International Conference on Computer Vision and Computational Intelligence (CVCI 2026)

Andrew Robert Harvey
Editor

9–11 January 2026
Sapporo, Japan

Organized by
Hokkaido University (Japan)
Singapore Institute of Electronics (Singapore)

Sponsored by
Hokkaido University (Japan)
Singapore Institute of Electronics (Singapore)

Published by
SPIE

Volume 14176

Proceedings of SPIE 0277-786X, V. 14176

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventh International Conference on Computer Vision and Computational Intelligence (CVCI 2026)*, edited by Andrew Robert Harvey, Proc. of SPIE 14176, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IMAGE MODELS, INTELLIGENT DETECTION, AND COMPUTER VISION

- 14176 02 **Efficient one-shot attendance on the edge: a hybrid system for classroom biometrics**
[14176-8]
- 14176 03 **Structure-aware motion deblurring and perspective rectification for real-time lightweight UAV license plate recognition** [14176-5]
- 14176 04 **Dynamic weighting diffusion model with multiscale feature fusion for low-light image enhancement** [14176-6]
- 14176 05 **LoRA fine-tuning of Stable Diffusion XL for multi-person image synthesis** [14176-10]
- 14176 06 **Coarse-to-fine 3D face modeling with photometric consistency optimization** [14176-3]
- 14176 07 **SPLite Hand: sparsity-aware lightweight 3D hand pose estimation** [14176-16]

MACHINE LEARNING MODELS AND COMPUTATION IN DIGITAL IMAGE PROCESSING

- 14176 08 **Conv-Former: a lightweight CNN-Transformer for osseous metastasis classification** [14176-2]
- 14176 09 **Application of machine learning to classify vehicle user behavior on expressway: case study of Chalong Rat Expressway** [14176-12]
- 14176 0A **A dual U-Net framework for sparse-view cone-beam CT reconstruction with multiscale projection refinement and overlap-aware training** [14176-4]
- 14176 0B **Two-stage mammographic density classification: unsupervised hierarchical Gabor segmentation with Vision Transformer and ConvNeXt** [14176-17]

APPLICATIONS OF MACHINE LEARNING THEORY AND ALGORITHMS IN MULTIMODAL INFORMATION SYSTEMS

- 14176 0C **Comparative evaluation of ChatGPT, Claude, DeepSeek, and Gemini for text-to-style vector generation using RAG-enhanced BERT pipelines** [14176-11]
- 14176 0D **Predicting delay causes in public construction projects in Thailand using machine learning**
[14176-14]

- 14176 0E **SMOBN and GWO aided bike sharing demand prediction model for smart city** [14176-9]
- 14176 0F **MicroSCOPE: analyzing malware type behaviors in a malware sandbox using hierarchical multiple instance learning** [14176-13]
- 14176 0G **Application of machine learning to predict the behavior of government steel price in Thailand** [14176-15]
