SPIE

**Volume 14185**

Proceedings of SPIE 0277-786X, V. 14185

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optical Communication, Signal Processing, and Optical Engineering (OCSPOE 2026)*, edited by Liang Yang, Xianpeng Wang, Proc. of SPIE 14185, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICAL DEVICES AND COMMUNICATION SYSTEMS

---

- 14185 02 **Performance optimization of 400G DR4 optical modules by impedance matching and crosstalk mitigation** [14185-30]
- 14185 03 **Online gain optimization of multistage EDFAs in long-haul optical fiber links based on improved grey wolf optimization** [14185-38]
- 14185 04 **Research on mechanical comparison of different special lenses** [14185-47]
- 14185 05 **Structural design of a primary reflective mirror component for optical observation** [14185-9]
- 14185 06 **Research of different black coatings on stray light suppression in optical baffle** [14185-16]
- 14185 07 **Research and application of single-fiber WDM equipment based on CWDM in electric power communication network** [14185-6]
- 14185 08 **Energy transfer mechanism at the Au-perovskite interface revealed by combined time-resolved photoluminescence and femtosecond transient absorption spectroscopy** [14185-21]
- 14185 09 **Scalable-bandwidth ultra-compact bending waveguides: inverse design and performance optimization** [14185-32]
- 14185 0A **End-pumped amplifier laser with high beam quality** [14185-5]
- 14185 0B **Femtosecond-laser direct writing of fork gratings and their control of high topological charge OAM beams** [14185-13]
- 14185 0C **Mode coupling and synergistic regulation of graphene/hBN heterostructures for mid-infrared applications** [14185-58]
- 14185 0D **Investigation the detectivity of vertical incident in quantum dot infrared photodetectors** [14185-48]
- 14185 0E **Design of a holographic sight based on volume Bragg gratings** [14185-33]
- 14185 0F **Temperature-controlled noise reduction for balanced photodetectors in swept-source optical coherence tomography** [14185-53]

- 14185 OG **Dynamic range compression via frequency gain attenuation in balanced photodetectors for SS-OCT** [14185-60]
- 14185 OH **Research on quantum key encrypted computing ghost imaging** [14185-18]
- 14185 OI **Modeling and exploitation of physical vulnerabilities of optoelectronic devices in the industrial internet** [14185-39]
- 14185 OJ **Design of long focal length compound aberration collimating optical system** [14185-31]
- 14185 OK **Research on low additional phase noise weak-light phase-locking technology** [14185-20]
- 14185 OL **A high-isolation dual-band MIMO antenna for 5G and WLAN applications** [14185-42]
- 14185 OM **Inverse-designed silicon nitride grating antenna** [14185-3]
- 14185 ON **All-optical hybrid multiplexed wavelength conversion based on cascaded SHG/DFG in segmented TFPLN waveguides** [14185-10]
- 14185 OO **Research on construction planning of digital learning space in academic libraries based on optical communication and IoT integration** [14185-25]
- 14185 OP **High-entropy oxides for efficient near-infrared photodetection** [14185-28]
- 14185 OQ **Polarization tailored photonic nanojet generated by curved surface truncated microsphere** [14185-2]
- 14185 OR **Performance enhanced digital-analog radio-over-fiber mobile fronthaul system using clipping techniques** [14185-15]
- 14185 OS **Design of narrow-linewidth laser-based on volume Bragg grating external cavity frequency locking** [14185-36]
- 14185 OT **Topological bound states in continuum within photonic crystal cavities** [14185-8]
- 14185 OU **Construction of cryptographic functions based on Ge-on-SOI photodetector** [14185-22]

---

#### OPTICAL SENSING AND SIGNAL PROCESSING ALGORITHMS

- 14185 OV **Design and investigation of a multispectral suspended sediment concentration detector based on fiber-optic backscattering** [14185-14]
- 14185 OW **Multidimensional information full process estimation technology for targets based on active sonar** [14185-51]
- 14185 OX **Measurement of infrared radiation characteristic for engine exhaust plume based on hyperspectral imaging system** [14185-54]

- 14185 0Y **A random forest-based model for the assessment of photoelectric telescope detection capability** [14185-46]
- 14185 0Z **Research on a lightweight terahertz frequency calibration method based on zero-crossing statistics** [14185-37]
- 14185 10 **A unified geometric error modeling and compensation method for laser radar based on screw theory** [14185-49]
- 14185 11 **Evaluating the efficacy of row frequency matching for motion artifact reduction** [14185-43]
- 14185 12 **All-fibre cladding waveguide phase-shifted FBG for measuring human pulse waves** [14185-4]
- 14185 13 **Utilizing standard deviation to find optimal wavelength of sampling pulse in PPLN based all optical sampling** [14185-41]
- 14185 14 **Real-time hyperspectral snapshot imaging via SwinIR-based hierarchical cross-modal reconstruction network** [14185-56]
- 14185 15 **UV-DOAS-based measurement of monoethanolamine (MEA) absorption cross-section and validation of its concentration inversion** [14185-11]
- 14185 16 **Self-calibrating structured light three-dimensional imaging method with fringe projection** [14185-55]
- 14185 17 **A phase retrieval algorithm combining transport of intensity equation and extended Nijboer-Zernike approach** [14185-17]
- 14185 18 **Research on deep-learning multiexposure image fusion algorithms for high dynamic range imaging** [14185-59]
- 14185 19 **BOTDR-based intelligent condition identification and engineering verification for transmission lines** [14185-12]
- 14185 1A **Research on an improved weighted centroid localization algorithm based on analytical compensation** [14185-45]
- 14185 1B **SDS fiber optic refractive index sensor based on corrosion diameter regulation** [14185-34]
- 14185 1C **Auxiliary-branch-constrained self-supervised deconvolution for 3D fluorescence microscopy** [14185-50]
- 14185 1D **Long-range single-pixel LiDAR 3D imaging technology research** [14185-52]
- 14185 1E **Edge AI-driven real-time emotion recognition and adaptive pale-colored light control system** [14185-40]
