

PROCEEDINGS OF SPIE

***International Conference on
Computer Vision, Algorithms,
and Communication (CVAC 2026)***

Hong Fu
Editor

27 February – 1 March 2026
Hong Kong, Hong Kong, China

Sponsored by

The Chinese University of Hong Kong (Hong Kong, China)
Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences (China)
Concordia University (Canada)
Michigan State University (United States)

Volume 14187

Proceedings of SPIE 0277-786X, V. 14187

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Vision, Algorithms, and Communication (CVAC 2026)*, edited by Hong Fu, Proc. of SPIE 14187, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

COMPUTER VISION AND IMAGE PROCESSING

- 14187 02 **An autoencoder-convolutional neural network algorithm for wafer defect detection**
[14187-1]
- 14187 03 **Active exploration for MNIST image classification** [14187-3]
- 14187 04 **Simpler is better: rethinking model complexity for resource-constrained visual question answering** [14187-6]
- 14187 05 **Multicomponent structure context learning model for complex scenes in video object tracking** [14187-10]
- 14187 06 **Improvement of tuber target detection algorithm and harvest application based on multi-technology integration** [14187-17]
- 14187 07 **Research on image super-resolution reconstruction methods based on sparse representations** [14187-24]
- 14187 08 **SED-Net: an unsupervised self-enhancing denoising network** [14187-25]
- 14187 09 **Plant disease detection method based on improved YOLOv8n** [14187-27]

ALGORITHMS AND MACHINE LEARNING

- 14187 0A **LLM-generated proxy features for tabular data: a framework for enhancing conventional ML models** [14187-2]
- 14187 0B **Enhancing LightGCN with graph attention for personalized recommendation** [14187-4]
- 14187 0C **A new multimodal collaborative defense framework** [14187-7]
- 14187 0D **Benchmarking automated ensemble systems and tabular models: a multisite neuroimaging study** [14187-8]
- 14187 0E **Fault diagnosis of planetary gearbox based on CNN and BKA-LSSVM under variable working conditions** [14187-9]

- 14187 OF **Ensemble learning for credit risk classification: a large-scale empirical study** [14187-11]
- 14187 OG **Deep learning-based modeling for drug-target interaction prediction** [14187-13]
- 14187 OH **A federated graph neural network approach to financial fraud detection** [14187-14]
- 14187 OI **Path decision-making via deep Monte Carlo tree search integrated with large models**
[14187-16]
- 14187 OJ **Linear transformer: ReLU-based linear attention for $O(n)$ complexity** [14187-18]
- 14187 OK **Research on a genetic-algorithm-based coordination and optimization strategy for resource allocation in embedded multisensor systems** [14187-19]
- 14187 OL **Jet reconstruction in heavy-ion collisions based on boosting models: focusing on XGBoost's performance** [14187-20]
- 14187 OM **Path planning for mobile robots in dynamic environments based on an improved RRT algorithm** [14187-21]
- 14187 ON **Detecting API misuse in deep learning frameworks via graph neural networks** [14187-22]
- 14187 OO **An empirical study of attention and gating mechanisms in graph convolutional networks: mechanism failure analysis and synergy exploration** [14187-23]
- 14187 OP **Analysis and optimization of different generative adversarial networks (GANs) based on limited resources** [14187-28]

COMMUNICATION, NETWORKS, AND AUTONOMOUS SYSTEMS

- 14187 OQ **Collision-avoidance research for stacker-reclaimers based on single-machine automation**
[14187-5]
- 14187 OR **Optimizing intelligent chassis and dynamic control algorithms for autonomous vehicles**
[14187-12]
- 14187 OS **Blockchain-enabled distributed accounting information system design** [14187-15]
- 14187 OT **Priority-weighted truck-drone cooperative delivery with charging constraints** [14187-26]
