

PROCEEDINGS OF SPIE

International Conference on Power Electronics Technology and Grid Systems (PETGS 2026)

**Chaolong Zhang
Wei Lai**
Editors

**9–11 January 2026
Bengbu, China**

Organized by
Anhui Science and Technology University (China)

Published by
SPIE

Volume 14189

Proceedings of SPIE 0277-786X, V. 14189

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Power Electronics Technology and Grid Systems (PETGS 2026)*, edited by Chaolong Zhang, Wei Lai, Proc. of SPIE 14189, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Conference Committee*
- ix *Introduction*

INTELLIGENT MONITORING AND RELIABILITY MANAGEMENT

- 14189 02 **Design of a low-voltage power supply reliability management and control platform based on Bayesian networks and periodicity** [14189-9]
- 14189 03 **A review of current detection technology for high-voltage cables based on magnetic sensing** [14189-1]
- 14189 04 **Development of telescopic optical fiber wiring device based on detachable sealing structure** [14189-10]
- 14189 05 **Research on reliability and communication performance of emergency protection channels based on wireless sensor networks** [14189-34]
- 14189 06 **Sealing condition monitoring method for power communication fiber optic cable joint boxes based on Fiber Bragg Grating** [14189-2]
- 14189 07 **Research on the temperature rise of standard long circular dry-type transformers based on magnet-thermal coupling** [14189-61]
- 14189 08 **Development of a low-energy, fast installation wireless monitoring device for partial discharge of high-voltage switchgear** [14189-64]
- 14189 09 **A fault detection method for power waste material dismantling production line based on SimCLR algorithm** [14189-24]
- 14189 0A **Study on optimization method of substation video monitoring based on 3D video fusion** [14189-25]
- 14189 0B **Analysis of leakage magnetic field characteristics for transformer turn-to-turn short circuits and winding deformation** [14189-57]
- 14189 0C **Research and development of secondary cable insulation test system based on multichannel parallel high-voltage generation** [14189-21]
- 14189 0D **Machine learning-driven proactive risk identification in power grid project proposals** [14189-52]
- 14189 0E **Traveling-wave-based fault location for wind-connected transmission systems with entropy and energy corrections** [14189-59]
- 14189 0F **Interface thermal resistance experimental measurement and temperature field simulation analysis of IPM modules under complex operating conditions** [14189-41]

- 14189 OG **Design and implementation of an automated detection platform for non-current brakes based on PLC and HMI** [14189-36]
- 14189 OH **Research and application of high voltage cable defect detection technology based on multienergy x-ray image fusion** [14189-58]
- 14189 OI **Anomaly detection method for electrical equipment rooms based on generative adversarial networks** [14189-70]
- 14189 OJ **Research on structured information extraction and integration of power grid primary equipment acceptance documents for intelligent management and control** [14189-4]
- 14189 OK **An improved analytical model for power grid fault diagnosis considering uncertainties in protective relay and circuit breaker operations** [14189-50]
- 14189 OL **Evaluation method for the supporting capability of independent energy storage for renewable energy accommodation based on time-series operation simulation** [14189-38]
- 14189 OM **Unified electromechanical transient modeling framework of distributed resources for emergency control and PV verification** [14189-5]
- 14189 ON **Short-circuit capacity calculation method considering power fluctuation correction and adaptive weight optimization** [14189-44]

POWER SYSTEM OPTIMIZATION AND INTELLIGENT CONTROL

- 14189 OO **Research on energy management in intelligent lighting system in building decoration** [14189-30]
- 14189 OP **Research on optimization of spot trading strategy for virtual power plant load aggregator based on multiagent reinforcement learning** [14189-11]
- 14189 OQ **Research on energy scheduling strategy of virtual power plant based on deep reinforcement learning** [14189-12]
- 14189 OR **Research on power demand forecasting and time series data processing technology based on hybrid models** [14189-26]
- 14189 OS **Research on temporal prediction models and optimization algorithms for power production and consumption** [14189-28]
- 14189 OT **Research on time series forecasting algorithms and multilevel model architecture for power grid load** [14189-29]
- 14189 OU **Deterministic feature decoupling method of power load based on core set of Bayesian logistic regression** [14189-22]
- 14189 OV **Load forecasting technology with high renewable energy penetration based on deep learning algorithms** [14189-37]

- 14189 0W **Load forecasting characterization study** [14189-39]
- 14189 0X **Research on the online dynamic update mechanism and incremental learning of power multimodal knowledge base** [14189-31]
- 14189 0Y **Optimal design of dry-type transformer based on MIPS0** [14189-62]
- 14189 0Z **Understanding the impact of polarization charge on edge electric field crowding suppression in GaN PN junctions with bevel edge termination** [14189-56]
- 14189 10 **R&D method of advanced micro-nuclear energy device based on Arcadia/Capella** [14189-19]
- 14189 11 **Reconfigurable frequency selective surface with independent tunability** [14189-3]
- 14189 12 **Research on the development path of power electronics technology in grid enterprises under the background of new power system** [14189-51]
- 14189 13 **Applications of control strategies for smoothing power fluctuations of hydrogen production from renewable energy** [14189-45]
- 14189 14 **Physics-informed deep reinforcement learning framework for residential demand response at the grid edge** [14189-8]
- 14189 15 **Advancing oxygen-containing solid-state polymer electrolytes for high-performance lithium batteries** [14189-18]
- 14189 16 **Exploration of pumped storage pricing mechanism and research on transmission paths** [14189-17]
- 14189 17 **Automatic control method for 10kV power grid load frequency deviation under nonlinear feedforward compensation** [14189-33]
- 14189 18 **Research on Anji demonstration flexible load forecasting method based on multitask balanced learning** [14189-16]
- 14189 19 **Knowledge graph-enhanced LLM review method for electric power documents** [14189-53]
- 14189 1A **A coordinated optimization control method for reactive power and voltage in new energy power grids based on MFO algorithm** [14189-23]
- 14189 1B **AC-AC power electronic transformers: architectures, key technologies and challenges** [14189-32]
- 14189 1C **A power grid power flow regulation method based on the reinforcement learning** [14189-43]

- 14189 1D **An active power control strategy for distribution network service restoration considering parameter optimization** [14189-74]
- 14189 1E **Research on efficiency optimization of four-switch buck-boost converters** [14189-73]
