

PROCEEDINGS OF SPIE

***International Conference
on Electronic Technology
and Energy Systems
(ETES 2026)***

Guoqiang Zhang
Editor

9–11 January 2026
Chongqing, China

Organized by
State Grid Chongqing Electric Power Company (China)

Sponsored by
Intelligent Energy Storage Research Institute, Inner Mongolia University of Technology (China)

Published by
SPIE

Volume 14239

Proceedings of SPIE 0277-786X, V. 14239

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Electronic Technology and Energy Systems (ETES 2026)*, edited by Guoqiang Zhang, Proc. of SPIE 14239, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTERNATIONAL CONFERENCE ON ELECTRONIC TECHNOLOGY AND ENERGY SYSTEMS (ETES 2026)

- 14239 02 **Optimized dispatching method for peak shaving and frequency modulation of DC interconnected power grids considering reserve mutual aid** [14239-14]
- 14239 03 **Application of hybrid attention graph neural network in resilient routing of cascading failures in large-scale power emergency communication networks** [14239-24]
- 14239 04 **Design and implementation of AI-driven embedded voice interaction systems** [14239-26]
- 14239 05 **Optimal scheduling of power system with wind farm based on improved multi-objective particle swarm optimization** [14239-28]
- 14239 06 **Research on coal flotation machinery based on intelligent mechanical automatic coal preparation technology** [14239-29]
- 14239 07 **Research on key technologies and processes for rapid dual detection of oil and gas acetylene in transformers** [14239-30]
- 14239 08 **Research on slime water treatment monitoring system of coal preparation plant based on 3D full-process image visualization** [14239-32]
- 14239 09 **Research on the improvement of new qualitative productivity driven by computer algorithms in industrial digital transformation** [14239-33]
- 14239 0A **Translational algorithms for interactive automatic nesting in garment CAD** [14239-34]
- 14239 0B **Lightweight and practical design of deep-sea imaging systems** [14239-13]
- 14239 0C **Research on partial discharge fault intelligent identification method based on AI models** [14239-22]
- 14239 0D **Design and shipboard test research on methanol fuel system** [14239-23]
- 14239 0E **Research on the architecture design and key technologies of the virtual agent system for power grid automation on duty** [14239-35]
- 14239 0F **Research on the technology of virtual agent system for power grid automation on duty based on model** [14239-36]

- 14239 OG **Multimodal intent recognition based on gated attention** [14239-47]
- 14239 OH **Research on order reduction algorithm of C5-PFK mixed ultra-high voltage valve-side bushing considering C5F10O high temperature decomposition characteristics** [14239-55]
- 14239 OI **Improvement of valve-side ultra-high DC voltage converter bushing equal margin design and digital-twin model system integration** [14239-57]
- 14239 OJ **Construction and fast calculation method of multifield coupling model for valve-side bushing with withstanding voltage tests** [14239-59]
- 14239 OK **A new sufficient descent dai-duan type conjugate gradient algorithm for large-scale unconstrained optimization problems** [14239-62]
- 14239 OL **New energy acceptance capacity evaluation model and calculation method considering frequency regulation capability constraints** [14239-65]
- 14239 OM **Pressure prediction of water supply network based on LSTM** [14239-66]
- 14239 ON **Research on adjustable user-side energy storage load identification based on cloud model and improved evidence theory** [14239-67]
- 14239 OO **Machine vision selection of attention region object detection based on significant graph** [14239-53]
- 14239 OP **Wind-resistant structural design of high-rise buildings based on numerical simulation and liquid viscous dampers** [14239-70]
- 14239 OQ **The role of media attention in shaping corporate carbon emission disclosure quality** [14239-68]
- 14239 OR **Research on the interactive evolution trend of China's carbon emissions and economic growth** [14239-69]
- 14239 OS **Analysis of economic benefits and optimization of operation strategies for small and medium-sized pumped storage power plants** [14239-64]
- 14239 OT **Energy prices and regional economic fluctuations in China: a computable general equilibrium-based (CGE) analysis** [14239-63]
- 14239 OU **Risk assessment and empirical research on China's new energy vehicle securities market based on CAPM and sentiment classification** [14239-61]
- 14239 OV **Research on demand side response optimization strategies for distributed new energy consumption in distribution networks based on information gap decision theory** [14239-60]
- 14239 OW **RGB-X segmentation method based on parallel feature correction and fusion** [14239-58]
- 14239 OX **Exploration for security risk management of cybersecurity supply chain** [14239-56]

- 14239 0Y **Recognition of the cognitive focus of learners by fusing multidimensional EEG features**
[14239-54]
- 14239 0Z **Condition prediction of tobacco motors in big data platform based on time series and BP neural network model** [14239-52]
- 14239 10 **Continuous reverse k-nearest neighbor query based on security zone** [14239-51]
- 14239 11 **A ResNet-BiLSTM model fusion strategy based on time series imaging for aeroengine hazard identification** [14239-50]
- 14239 12 **Target-predictions constraint for unsupervised fault diagnosis under cross-condition scenarios** [14239-49]
- 14239 13 **Single-sideband modulation discrimination for hydroacoustic communications based on improved MFCC and adaptive random forests** [14239-6]
- 14239 14 **Precise fault diagnosis of tobacco rotary machinery via dynamic threshold time-frequency fusion** [14239-7]
- 14239 15 **Bearing fault diagnosis method for industrial robots based on EMD and BOA-CNN** [14239-4]
- 14239 16 **Based on linear CCD detection of adjustable focus laser line spot position changes for settlement detection in incrementally launched bridges** [14239-10]
- 14239 17 **An intelligent object detection method for satellite image based on improved YOLOv11**
[14239-5]
- 14239 18 **A method for soil moisture prediction based on neural networks and deep learning models**
[14239-12]
- 14239 19 **Principle, hardware implementation, and data acquisition mechanism analysis of four flexible adjustable distributed photo-voltaics based on IGDT and edge computing**
[14239-17]
- 14239 1A **Research on dynamic collaborative control of wind solar storage charging based on real-time operation data fusion of time-varying copula scene generation and deep reinforcement learning (DRL)** [14239-16]
- 14239 1B **Research on a deep learning-based multimodal data extraction algorithm for engineering survey semantic models** [14239-27]
- 14239 1C **Design and research of intelligent algorithm for laboratory resource scheduling** [14239-37]
- 14239 1D **Monitoring and optimization system based on machine learning** [14239-39]
- 14239 1E **Heteroepitaxial growth of (110) β -SiC on (110) Si substrate by laser-based chemical vapor deposition** [14239-1]

- 14239 1F **Cold-vibration coupling life test and analysis of cold chain vehicle temperature sensors** [14239-40]
- 14239 1G **Evaluation of groundwater quality at dispersed water source points in Kunming Yangzonghai tourism resort** [14239-42]
- 14239 1H **Screening, compound and evaluation of demulsifiers in chemical modulation-centrifugation separation process for oil sludge** [14239-44]
- 14239 1I **Study on the properties and mechanism of Ia doped g-C₃N₄ photodegradation of MB** [14239-45]
- 14239 1J **Analysis of the destructive effect of an intrusive warhead on light fortifications** [14239-46]
- 14239 1K **Intelligent management and control model of material inventory of power grid enterprises based on machine learning** [14239-41]
- 14239 1L **Research and design on communication optimization for a DCS system gateway** [14239-43]
- 14239 1M **Analysis and prediction of typical daily load curve fitting for wind and solar energy storage and charging, and research on operation strategy for maximizing revenue** [14239-15]
- 14239 1N **Multidimensional time-series photovoltaic and energy storage power prediction based on VMD-SSA-LSTM using user-side energy storage station digital twin model** [14239-18]
- 14239 1O **Research on flexible regulation of centralized photovoltaic/energy storage power stations based on S-GAN scenario simulation of robust scheduling method for AC/DC hybrid micro-grid** [14239-19]
- 14239 1P **Scheme design of constant temperature and humidity seeds breeding system** [14239-38]
- 14239 1Q **Typical curve analysis and time series prediction evaluation of wind solar storage new energy output based on K-means artificial intelligence clustering algorithm** [14239-20]
- 14239 1R **Optimization matching algorithm for integrated wind solar energy storage based on wavelet decomposition and particle swarm optimization algorithm** [14239-21]
- 14239 1S **Integrated machine for simultaneous stripping and sorting of mulberry shoots** [14239-3]
- 14239 1T **Research on flywheel energy storage-assisted frequency regulation technology for wind farms** [14239-2]
