## **Hydraulic Structures and Dams**

Selected Papers from the 11th International Conference on  
Hydraulic and Civil Engineering and Engineering Safety and  
Intelligence Forum

Nanjing, China  
13-15 June 2025

ISBN: 979-8-3313-3689-9

# Contents

|                                                                                                                             |           |
|-----------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Study on the Application of Composite Pile Foundation in Heightening Embankment Dam .....</b>                            | <b>1</b>  |
| Daoping Lai, Yilin Cheng, Jianrong Xu, and Lai Sun                                                                          |           |
| <b>Optimization of Assignment Model with Maximal Satisfaction in Hydraulic Engineering.....</b>                             | <b>11</b> |
| Na Luo and Yongqing Yang                                                                                                    |           |
| <b>Underground Powerhouse Axis Optimization and Selection System for Pumped Storage Plants.....</b>                         | <b>17</b> |
| Minggang Song, Guanghong Ju, Zhengzheng Li, and Zhang Wang                                                                  |           |
| <b>Analysis of the Effect of Loosening of Some Bolts of Hydraulic Turbine Main Shaft on the Remaining Bolts .....</b>       | <b>33</b> |
| Jianguo Xie, Houzhuo Wu, Junge Chen, Xinfeng Ge, and Guangming Yang                                                         |           |
| <b>Discussion on Intelligent Construction Technologies for Penstocks in Hydropower and Hydraulic Engineering .....</b>      | <b>43</b> |
| Weiming Zhang, Shuman Wei, Zeyu Wang, Zhihua Cheng, Qi Sun, Yunfeng Nie, and Yuanyuan Li                                    |           |
| <b>Simulation Study of Hydraulic Characteristics of Fishway Structures Adapted to Changes in Upstream Water Level .....</b> | <b>51</b> |
| Wenchuan Zhang, Wei Jiang, Yan Liang, Xiang Wang, Wenjing Li, and Lingquan Dai                                              |           |
| <b>Study on Temperature Gradient Distribution in a Novel Box-Shaped Rigid-Frame Aqueduct.....</b>                           | <b>62</b> |
| Xiuping Liu, Ruiqian Li, and Zigui Wang                                                                                     |           |
| <b>Experimental Study on Wave Dissipation Effect of a Floating Bed on Sea Surface.....</b>                                  | <b>72</b> |
| Jiali Qin and Chao Li                                                                                                       |           |
| <b>Transverse Seismic Performance of Continuous Rigid-Frame Box Aqueduct Considering Water Influence .....</b>              | <b>83</b> |
| Yibin Liu, Wei Ren, Yuanyuan Wang, and Yang Zhang                                                                           |           |
| <b>Morphological Evolution of Different Types of Braid Bars in the Lower Yangtze River Based on Remote Sensing .....</b>    | <b>95</b> |
| Hualong Luan, Xiaolong Yu, Weidong Huang, Guozhong Li, Yiming Chen, and Jian Xu                                             |           |

|                                                                                                                                                                                                                |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Technology and Research Progress of Plastic Steel Sheet Pile for Urban<br/>Emergency Flood Control .....</b>                                                                                                | <b>106</b> |
| Han Yu and Jiming Yan                                                                                                                                                                                          |            |
| <b>Experimental Investigation of Sand Mattress Protection for a Jacket<br/>Foundation under Hydrodynamic Actions .....</b>                                                                                     | <b>118</b> |
| Hao Chen, Weiming Sun, Jisheng Zhang, and Yiming Ji                                                                                                                                                            |            |
| <b>Research on the Local Hydrodynamic Effects of Artificial Reefs on Monopile<br/>Foundations for Offshore Wind Power .....</b>                                                                                | <b>130</b> |
| Hui Li, Xu Qiu, Xin Liu, Wenguan Ma, and Hao Zhao                                                                                                                                                              |            |
| <b>Evaluation of Flood Control Effectiveness of Mountain-Encompassing<br/>Diversion Systems in Mountainous Cities under Extreme Rainfall:<br/>A Case Study of the “23·7” Flood in Mentougou, Beijing .....</b> | <b>141</b> |
| Shu Zhu, Hewei Zhang, Yanming Shi, and Fei Sun                                                                                                                                                                 |            |
| <b>Effects of Ground Motion and Seawater on Seismic Response of Island-Reef Sites .....</b>                                                                                                                    | <b>154</b> |
| Rentao Peng and Jinjun Hu                                                                                                                                                                                      |            |
| <b>Analysis and Research on the Extreme Value Phenomenon of Secondary<br/>Amplitude Pressure under the Condition of Simultaneous Load<br/>Shedding of Pump-Turbine.....</b>                                    | <b>162</b> |
| Chunjian Cao, Jie Fang, Haozhen Wang, and Yuanjie Zhang                                                                                                                                                        |            |
| <b>Seismic Resistance Capacity Analysis for Concrete Wall Type Composite<br/>Structure: Concrete Face Rockfill Dam .....</b>                                                                                   | <b>172</b> |
| Yushan Zhu, Chengjin Deng, Zhu Yang, Kecheng Wan, Li Shi, Qingchao Lv,<br>Xiaojiang Zhang, and Hai Jiang                                                                                                       |            |
| <b>Finite Element Simulation of Sluice Deep Foundation Excavation with<br/>Combined Support Systems .....</b>                                                                                                  | <b>180</b> |
| Wei Zhang, Guochun Xia, Zhaoren Yao, Yujin Wang, Changsheng Zhang,<br>and Jianchun Qiu                                                                                                                         |            |
| <b>Research on the Design of Flood Control Facilities and Flood Disaster<br/>Simulation in Mountainous Areas Based on Digital Technology .....</b>                                                             | <b>188</b> |
| Fen Zhou, Xu Li, Lili Zhang, Liyuan Peng, and Hui Li                                                                                                                                                           |            |
| <b>Simulation Research on Dam-Break Flood of a Pumped Storage Power<br/>Station Based on HEC-RAS.....</b>                                                                                                      | <b>197</b> |
| Long Zhao, Yanan Cheng, Yisong Li, Jue Wang, Yu Wang, and Li Min                                                                                                                                               |            |
| <b>Innovative Design of Three Span Asymmetric Arch for the Huaxie Aqueduct.....</b>                                                                                                                            | <b>211</b> |
| Na Zhang, Fan Yang, and Mao Yu                                                                                                                                                                                 |            |

|                                                                                                                                                                |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Temperature and Stress Characteristics during the Construction Period of Large Hole Gate Piers under Climatic Conditions in Jiangxi Province .....</b>      | <b>221</b> |
| Haonan Zhan, Fagen Weng, Jian Li, and Sheng Qiang                                                                                                              |            |
| <b>Analysis of the Impact of Rainfall Pattern Restructuring on Watershed Flood Control in the Pearl River Delta Region under Global Warming.....</b>           | <b>231</b> |
| Jing Zhang, Fan Wu, Jialong Sun, Yang Ping, Zhenzhou Zhang, and Jingwen Yu                                                                                     |            |
| <b>High-Fidelity Modeling of 300MAV Doubly Fed Induction Motor for Pumped Storage Applications.....</b>                                                        | <b>244</b> |
| Sa Zhu, Runqing Ni, Chengxin Zhong, Chang Xu, Weifu Lu, Xueyang Zeng, Linning Cao, Chen Feng, Lei Guo, and An Yu                                               |            |
| <b>Optimizing and Enhancing Seismic Performance of High Concrete-Faced Rockfill Dams under Strong Earthquake Actions .....</b>                                 | <b>255</b> |
| Yafei Zhai, Tao Han, Zhiyu Song, and Zhengxiong Bai                                                                                                            |            |
| <b>GRU-Based Model of Stage-Discharge Relationship in the Xingji River.....</b>                                                                                | <b>267</b> |
| Jiangtao Xu, Wenju Zhao, Dongshan Qiu, Jinrong Chen, and Ke Kong                                                                                               |            |
| <b>Simulation and Analysis of Transverse Joint Opening in an Arch-Gravity Dam .....</b>                                                                        | <b>280</b> |
| Nan Wang, Yang Han, Chaoyue Wu, Junmin Lu, Ke Li, Xiaojun Peng, and Yu Hu                                                                                      |            |
| <b>Impact of Reinforcement Parameters on Monopile Stiffness of Offshore Wind Turbine Monopile Foundations under Scour Effects .....</b>                        | <b>286</b> |
| Jianjian Zhao, Yuliang Miao, Xiao Ji, Rui He, and Yanhong Wang                                                                                                 |            |
| <b>Analysis of the Effect of Different Bolt Preload on the Main Shaft and Bolts of Hydraulic Turbine .....</b>                                                 | <b>296</b> |
| Wanqing Ding, Bin Liu, Houzuo Wu, Junge Chen, and Xinfeng Ge                                                                                                   |            |
| <b>Impact Analysis of Different Operating Conditions of Hydropower Station Units on the Vibration of Ship Lift Structure .....</b>                             | <b>308</b> |
| Minmin Jiang, Jinhui Ouyang, Bo Wang, Jun Qian, Guoqing Liu, and Lianghua Xu                                                                                   |            |
| <b>Parameter Sensitivity Analysis of Hydraulic Characteristics in a High-Dam Negative-Stepped Stilling Basin Using the Orthogonal Experimental Design.....</b> | <b>318</b> |
| Lei Jiang, Yao Deng, Guibing Huang, and Xiafei Guan                                                                                                            |            |
| <b>Hybrid Simulation Flow at the Approach Channel Entrance Area in Braided River Reach.....</b>                                                                | <b>332</b> |
| Min Fan, Qian Jiang, and Chen Yang                                                                                                                             |            |
