

# **ICHCE & ESI 2025**

## **Safety Monitoring and Risk Assessment**

Selected Papers from the 11th International Conference on  
Hydraulic and Civil Engineering and Engineering Safety and  
Intelligence Forum

Nanjing, China  
13-15 June 2025

ISBN: 979-8-3313-3690-5

|                                                                                                                                                  |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Research on Dam Deformation Prediction Based on Intelligent Combination of Mathematical Models and Deep Learning Models .....</b>             | <b>1</b>  |
| Weiyan Cheng, Hongbo Luo, Zuqiang Liu, Chenyu Yang, and Kaihua Wang                                                                              |           |
| <b>Application and Analysis of Magnetic Particle Testing of Welds in Pumped Storage Power Stations.....</b>                                      | <b>12</b> |
| Lingchuang Li, Wenbo He, and Shichao Liu                                                                                                         |           |
| <b>A VMD-TCN-BILSTM-WOA-Attention-Based Model for Bridge Deflection Prediction .....</b>                                                         | <b>22</b> |
| Guolong Wang and Kai Gong                                                                                                                        |           |
| <b>Anomaly Monitoring Data Diagnosis Model Based on Shapley-Explainable XGBoost Algorithm .....</b>                                              | <b>34</b> |
| Pengtao Chen, Gan Yang, Yang Jin, and Wanshui Han                                                                                                |           |
| <b>Research on the Monitoring and Management Strategies for World Heritage Irrigation Structures in China .....</b>                              | <b>44</b> |
| Zihan Zhou, Dan Chen, Xiaoping Dai, Jing Chen, and Jingang Li                                                                                    |           |
| <b>Study on Acoustic Emissions Technology of Hydraulic Steel Bifurcation Pipe's Hydraulic Test.....</b>                                          | <b>56</b> |
| Peng Ding, Guangfei Ma, and Jiatang Lin                                                                                                          |           |
| <b>Inverse Analysis of Deformation Modulus of a Gravity Dam Based on Statistical Model and Finite Element Method.....</b>                        | <b>68</b> |
| Weiyu Wu and Weiran Lu                                                                                                                           |           |
| <b>Investigating Factors Influencing Digital Twin-Enabled Smart Water Conservancy under the TOE Framework: A Fuzzy-DEMATEL-ISM Approach.....</b> | <b>76</b> |
| Qian Yang, Jie Jin, Jianwen Yan, Jie Ren, and Xiangnan Wu                                                                                        |           |
| <b>Numerical Simulation and Insights into Navigation Safety in Mountain Waterways: A Case Study of the Lancang River.....</b>                    | <b>88</b> |
| Chuanai Wang, Mingjun Diao, Sichen Tong, and Lei Jiang                                                                                           |           |
| <b>Initial In Situ Stress Field Inversion Based on ETO-SVM Intelligent Algorithm.....</b>                                                        | <b>99</b> |
| Xiao Yue, Jiaqi Xu, Lei Gan, Zhenzhong Shen, and Weixiong Chen                                                                                   |           |

|                                                                                                                                                     |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Smart Anti-Wind Deviation Control for Cable Cranes in Concrete Transportation .....</b>                                                          | <b>112</b> |
| Jianping Yu, Yarui Zhu, Rui Qi, Zihong Wang, Zehui Zhou, and Xiao Sun                                                                               |            |
| <b>Identification of Amplitude-Dependent Aerodynamic Damping Based on a Physics-Informed Convolutional Neural Network .....</b>                     | <b>121</b> |
| Jinbiao Lai, Yanchi Wu, and Yangfan Lv                                                                                                              |            |
| <b>Refined Boundary Conditions for Multi-Modal Strand Tension Identification.....</b>                                                               | <b>131</b> |
| Yangfan Lv, Zili Xia, and Jinbiao Lai                                                                                                               |            |
| <b>Aerial Attitude Description and Control Study of the Combined Section of Arch Ribs of a Y-Shaped Arch Bridge.....</b>                            | <b>140</b> |
| Shuhan Lei                                                                                                                                          |            |
| <b>State Evaluation of Cable-Stayed Force Based on Probability Statistics .....</b>                                                                 | <b>154</b> |
| Yuhao Pan and Rui Zhang                                                                                                                             |            |
| <b>Numerical Simulation Research Concerning the Ultrasonic Parameter Characteristics of Concrete under Load.....</b>                                | <b>164</b> |
| Xinge Yang and Yaxun Yang                                                                                                                           |            |
| <b>Multi-Scale Spatial-Temporal Correlation between Stress and Temperature of Tunnel Supporting Structure Based on Wavelet Coherence.....</b>       | <b>177</b> |
| Yuhang Hu, Pengkun Wang, and Yifan Wang                                                                                                             |            |
| <b>Multi-Modal Spectral Analysis of DZT Radar Data for Tunnel Defect Detection.....</b>                                                             | <b>194</b> |
| Xichen Liu, Yajie Li, and Muquan Zou                                                                                                                |            |
| <b>Damage Analysis of High-Pile Wharf Subjected to Ship Collision Impacts .....</b>                                                                 | <b>207</b> |
| Zihao Liang, Linwang Su, Meimei Liu, and Jiamin Li                                                                                                  |            |
| <b>Prediction for the Equilibrium Scour Characteristics around a Jacket Foundation under Flow Actions .....</b>                                     | <b>219</b> |
| Ran Pang, Hao Chen, Xiao Ji, Jisheng Zhang, Yiming Ji, and Yanhong Wang                                                                             |            |
| <b>Development and Application of an Intelligent Monitoring System for the Alignment of Miter Gate in Ship Lock Based on Image Recognition.....</b> | <b>231</b> |
| Huakun Wang, Xinmao Li, Wenli Huang, Qiu Zhai, Yujie Feng, and Kaiwen Jiang                                                                         |            |
| <b>Risk Assessment of Large-Diameter Pressure Steel Pipe Construction Process Using Bayesian Networks .....</b>                                     | <b>241</b> |
| Bin Dai, Yanhang Chao, Yanke Shi, Duoxin Zhang, Yingjie Bai, and Pengtuan Zhao                                                                      |            |

|                                                                                                                                                           |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>A Study of Grouting Defects in Prestressed Ducts Based on Complete Ensemble Empirical Mode Decomposition with Adaptive Noise .....</b>                 | <b>252</b> |
| Yaxun Yang, Xinge Yang, and Wenhao Chai                                                                                                                   |            |
| <b>Optimization of Road Network Bridge Maintenance Strategy Based on NSGA-III .....</b>                                                                   | <b>272</b> |
| Shiyu Liu                                                                                                                                                 |            |
| <b>The Practical Path of Intelligent Safety Management of Water Conservancy Projects from the Perspective of Management Synergy .....</b>                 | <b>285</b> |
| Yuanyuan Dai                                                                                                                                              |            |
| <b>Sensor Optimization Layout Based on the Improved Salp Swarm Algorithm.....</b>                                                                         | <b>295</b> |
| Kaining Song, Yaxun Yang, and Yang Yu                                                                                                                     |            |
| <b>A Comprehensive Weighting Approach for Cable-Stayed Bridge Component Health Degree Assessment Using SHM Data .....</b>                                 | <b>308</b> |
| Rui Zhang and Yuhao Pan                                                                                                                                   |            |
| <b>Extracting Concrete Structural Components from Scanning Data in Complex Construction Sites.....</b>                                                    | <b>321</b> |
| Yafei Qi, Yongfeng Peng, Yaofeng Liang, Shishun Zhang, and Wenli Liu                                                                                      |            |
| <b>Research on Real-Time Response of Cloud Visualization Technology for Digital Twin of Sluice Gate Project System Driven by Pre-Calculated Data.....</b> | <b>335</b> |
| Hui Cai and Qiyao Chen                                                                                                                                    |            |
| <b>Ground Advance Grouting Treatment Technology for Inclined Shaft Crossing Water-Rich Fault Fracture Zone .....</b>                                      | <b>345</b> |
| Zhenhua Wu, Bo Liu, Qinghua Yin, Pei Qi, and Wei He                                                                                                       |            |
| <b>Comprehensive Evaluation Method for Health Risks of Workers in Complex and Hazardous Tunnel Environments.....</b>                                      | <b>357</b> |
| Yanghao Xie, Chaojun Jia, Chenghua Shi, Mingfeng Lei, and Yanni Zheng                                                                                     |            |
| <b>Flood Risk Zone Diagnosis and Evaluation of Urban Waterlogging and Simulation Analysis of Control Measures in a City of Anhui Province.....</b>        | <b>371</b> |
| Kangkang Liu and Fan Wang                                                                                                                                 |            |
| <b>Research on Urban Pavement Collapse Detection Technology Based on Rayleigh Surface Wave Method .....</b>                                               | <b>383</b> |
| Weili Chen, Di Wu, Wenzhe Fan, Shuizhi Ye, and Hongyue Liu                                                                                                |            |
| <b>Case-Based Safety Risk Prediction for Dams via Hybrid Similarity Modeling and Large Language Models .....</b>                                          | <b>396</b> |
| Jingyu Xin, Wei Huang, Hengnian Yan, Feng Wang, and Xiao Liu                                                                                              |            |

|                                                                                                                                                          |            |
