SPIE

Volume 14050

Proceedings of SPIE 0277-786X, V. 14050

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Smart Biomedical and Physiological Sensor Technology XXIII*, edited by Brian M. Cullum, Eric S. McLamore, Pietro Strobbia, Proc. of SPIE 14050, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ADVANCED MATERIALS FOR SMART SENSING

- 14050 02 **Processing of multifunctional bio ceramics in selenium flux at low temperature** [14050-1]
- 14050 04 **Performance of bone materials for chemical sensing** [14050-3]
- 14050 05 **Optical sensing of point and line defects in Fe-doped bulk ZnSe crystals** [14050-4]
- 14050 06 **Optical characteristics of heavy metal-based crystal sensors: Thallium lead iodide**
[14050-5]

WEARABLES SENSORS AND BIOSENSORS

- 14050 0A **Adaptive foot-ankle brace for real-time monitoring of high-velocity ankle inversion in high-risk performance activities** [14050-10]
- 14050 0B **Optical approach for testosterone sensing using photonic crystal** [14050-29]

ADVANCED ANALYTICS FOR SMART SENSING

- 14050 0C **Continuous and contactless blood pressure monitoring using a hybrid neural network model based on facial video analysis** [14050-11]
- 14050 0D **A novel multiset differential pulse voltammetry sampling technique with machine-learned calibration in electrochemical sensing** [14050-12]
- 14050 0E **Temporal dynamics and energy landscape analysis of the cortical-basal ganglia-thalamocortical loop across multiple fMRI datasets** [14050-13]
- 14050 0F **Applying machine learning to identify and mitigate opioid addiction liability** [14050-14]
- 14050 0G **A multiplexed SERS bio-sensing approach to discriminating diseases with overlapping symptoms by leveraging machine learning** [14050-15]
- 14050 0H **Comparative analysis of transfer learning CNN models for automated bone fracture classification in x-ray imaging** [14050-16]

SMART SENSING PLATFORMS

- 14050 OI **Adaptive shear thickening fluid-enhanced foam structures for next-generation wearable defense protection systems** [14050-17]
- 14050 OJ **Dual-camera coherent-light diffraction biosensor for multipathogen screening and strain-level recognition of bacterial colonies** [14050-18]
- 14050 OK **Retinal OCT image analysis using EFF-FC: EfficientNet and FFT-based feature fusion with fusion classifier** [14050-19]
- 14050 OL **Compatibility of lysing agents with SERS biosensors in virus detection** [14050-20]
- 14050 OM **V-TMS: a compact coil design for multisite transcranial magnetic stimulation** [14050-21]

POSTER SESSION

- 14050 ON **Satellite remote sensing data for dengue prediction: improving global health** [14050-22]
- 14050 OO **Portable sensory-gating effect monitoring systems based on vibrational stimulations** [14050-23]
- 14050 OP **Mapping functional units: comparing the brain's CBGTC loop to transformer architectures in large language models** [14050-27]
