Volume 14051

Proceedings of SPIE 0277-786X, V. 14051

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ocean Sensing and Monitoring XVIII*, edited by Weilin Hou, Linda J. Mullen, Proc. of SPIE 14051, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ACTIVE SENSING AND COMMUNICATIONS

- 14051 02 **Development of an LED-based, RGB underwater gated SPAD imaging system** [14051-1]
- 14051 03 **A novel phase discrimination approach to improve hybrid Lidar performance** [14051-3]
- 14051 04 **Design and characterization of a low-cost 635nm underwater optical wireless communication link using commercial off-the-shelf components** [14051-4]

NOVEL SENSING TECHNIQUES

- 14051 06 **Spatiotemporal urban creek water-quality monitoring using an open-source buoy style sensor** [14051-6]
- 14051 07 **Distributed optical fiber sensing technology development and deployment for marine infrastructure and mobile marine platforms** [14051-7]
- 14051 08 **The exploitation of sunglint: polarization and event-based sensing** [14051-8]

APPLICATIONS OF MACHINE LEARNING IN OCEAN SENSING

- 14051 09 **Object recognition in underwater Lidar imagery via transfer learning** [14051-9]
- 14051 0B **CycleGAN-3D for underwater Lidar signal restoration in degraded environments** [14051-11]
- 14051 0C **Impact of underwater image enhancement on object detection in nadir AUV imagery of goby fish** [14051-13]
- 14051 0D **Machine learning forecasts of laser intensity evolution through maritime turbulence** [14051-14]

CHARACTERIZATION OF THE OCEAN ENVIRONMENT

- 14051 0E **Generalized schlieren imaging via angular-domain filtering under non-collimated illumination** [14051-15]

- 14051 OF **Dynamic mode decomposition of boundary layer and mid-stream particle-laden oscillatory flow** [14051-16]
- 14051 OG **Manifold learning analysis of mid-stream and boundary layer structure of a particle laden oscillatory flow** [14051-24]
- 14051 OH **Brillouin asymmetric spatial heterodyne (BASH) oceanographic Lidar receiver for profiling temperature, salinity, and sound velocity** [14051-18]

POSTER SESSION

- 14051 OI **On the application of a fuzzy logic/Dempster-Shafer-based formulism to land-marine decision analysis** [14051-19]
- 14051 OJ **Development of an integrated marine debris monitoring system using satellite and UAV hyperspectral remote sensing with AI-based analysis** [14051-20]
- 14051 OK **Topological signal analysis of velocity field evolution near a shallow water breaking wave** [14051-17]

DIGITAL POSTER SESSION

- 14051 OM **Deep OC-sort algorithm for large-scale underwater multifish tracking** [14051-12]
