Volume 14052

Proceedings of SPIE 0277-786X, V. 14052

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors and Systems for Space Applications XIX*, edited by Genshe Chen, Khanh D. Pham, Proc. of SPIE 14052, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SPACEBORNE IMAGING AND OPTICAL PAYLOADS

- 14052 02 **Shadow imaging system GEO satellite occultation detection limits** [14052-1]
- 14052 03 **Enhanced image resolution to sub-pixel levels with the nearest neighbor pixel deconvolution (NNPD) method** [14052-2]
- 14052 04 **Hemispherical camera for space application** [14052-3]
- 14052 05 **Development, calibration, and validation of a multispectral camera suitable for observation of the re-entry spectral signatures from orbit** [14052-4]

ADVANCED DETECTORS AND SENSOR TECHNOLOGIES

- 14052 06 **Monolithic and hybrid integrated on chip optical filters for compact multi- and hyperspectral imaging payloads (Invited Paper)** [14052-5]
- 14052 08 **Rethinking space-grade rotary encoders: performance, cost, and COTS potential** [14052-7]

AI-DRIVEN SENSING, DETECTION, AND AUTONOMY

- 14052 0A **Echo chamber index: a GNN-based metric for detecting echo chambers in multiagent AI networks** [14052-28]
- 14052 0B **VQUJD: an unsupervised jamming detection method for mmWave radar via vector quantized variational autoencoder** [14052-10]
- 14052 0C **CerVaLens: on-device multimodal AI-generated content detection for mobile authentication** [14052-11]
- 14052 0D **SwarmTrust: spatial trust infrastructure for secure UAV swarm coordination** [14052-12]

SECURE AND RESILIENT SPACE COMMUNICATIONS

- 14052 0F **Space communications with distributed ledger technology** [14052-13]

- 14052 0G **A blockchain-enabled named data networking framework for secure access control in distributed communication systems** [14052-14]
- 14052 0H **Estimating TDOA/FDOA from non-cooperative frequency-hopping emitters with I/Q-free pulse descriptor words** [14052-15]
- 14052 0I **Integrating power beaming and modulation with laser diodes and multijunction photovoltaic cells to achieve power transfer and communication** [14052-16]
- 14052 0J **RAIDER: resilient AI-driven interference detection and experimental radar platform** [14052-17]
- 14052 0K **Hopped common data link on chirped synthetic aperture radar for integrated sensing and communication** [14052-18]

MULTI-SENSOR PLATFORMS AND PLANETARY/EARTH APPLICATIONS

- 14052 0L **Characterizing water isotopes in lunar regolith simulants for ISRU applications** [14052-19]
- 14052 0M **NuSCIS: a multisensor imager platform for situational awareness, science, and planetary applications** [14052-20]
- 14052 0O **Multiscale 3D network visualization for large-scale coordinated operations with organizational hierarchy** [14052-22]
- 14052 0Q **Fuzzy rule-based explainable framework for reinforcement learning with neural networks** [14052-29]
