Volume 14075

Proceedings of SPIE 0277-786X, V. 14075

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Metamaterials XV*, edited by Kevin F. MacDonald, Isabelle Staude, Anatoly V. Zayats, Proc. of SPIE 14075, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

METAMATERIALS FOR IMAGING

14075 02 **Seeing in thermal colour: wavelength-sensitive imaging in the LWIR** [14075-2]

CONTROLLING EMISSION AND LIGHT-MATTER INTERACTIONS

14075 03 **Air-defined Mie voids for photoluminescence control** [14075-10]

QUANTUM, TOPOLOGICAL AND SPACE-TIME PHENOMENA

14075 04 **Reconfigurable dual-wavelength quantum skyrmions via liquid-crystal topological defects** [14075-12]

METASURFACES II

14075 05 **Bound states in the continuum in nanophotonic metasurfaces for next-generation biomedical sensors and advanced light-matter interaction control (Invited Paper)** [14075-9]

14075 06 **Simulations of Brownian thermal noise for arbitrarily shaped metasurfaces** [14075-22]

14075 07 **OAM-multiplexed holography via cascaded metasurfaces without post sampling and position multiplexing (Invited Paper)** [14075-24]

METADEVICES

14075 08 **Exploring metalenses as compact solar concentrators with improved wide-angle performance for integrated systems** [14075-26]

TIME-VARYING MEDIA AND TIME CRYSTALS

14075 09 **Discontinuous Galerkin time domain framework coupled with advanced Bayesian optimization for realistic near infrared space-time modulated metasurfaces** [14075-36]

14075 0A **Broadband dipole absorption in dispersive photonic time crystals** [14075-38]

14075 OB **Drude model for time-varying dispersive and lossy media** [14075-39]

CHIRAL, BIANISOTROPIC AND HYPERBOLIC METAMATERIALS

14075 OC **Experimental demonstration of an optical magnetoelectric nonreciprocal metasurface** [14075-57]

14075 OD **Inverse-designed superchiral cavity for enantioselective detection** [14075-58]

14075 OE **Self-assembled hyperbolic metasurfaces for spontaneous emission control** [14075-59]

14075 OF **Mid-infrared anisotropic plasmonics with geometrically diluted ultrathin gold films** [14075-60]

METAMATERIALS FOR METROLOGY AND SENSING

14075 OG **An experimental comparison of rectangular vs elliptical meta-atoms for polarimetry in the telecom waveband** [14075-52]

14075 OH **Combinatorial optical tweezers using grating couplers and metalenses** [14075-54]

METAMATERIALS FOR MANIPULATING COMPLEX BEAMS AND POLARIZATION

14075 OI **Reversal asymmetry of reciprocal metasurface enables ultra-compact varifocal reflective lens** [14075-48]

POSTER SESSION

14075 OJ **Semi-periodic numerical modeling of the optical response of disordered plasmonic metasurfaces on dielectric substrates (SPIE Best Student Paper Award)** [14075-66]

14075 OK **Metasurface-based polarization sensitive Dammann vortex grating** [14075-67]

14075 OL **Blazed pillars metasurface design for optical wireless communications** [14075-68]

14075 OM **Infrared up-conversion via sum-frequency generation enhanced by lattice resonance in vertically stacked AlGaAs disk metasurfaces** [14075-69]

- 14075 0N **Multipolar decomposition framework for the spatial distribution of radiation intensity in spherical resonators [14075-70]**
- 14075 0O **Optofluidic sensors based on surface-enhanced Raman spectroscopy for sensitive detection of pesticides in the field [14075-78]**
