Volume 14077

Proceedings of SPIE 0277-786X, V. 14077

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Ultrafast Condensed Phase Physics V*, edited by Stefan Haacke, Markus Ossiander, Proc. of SPIE 14077, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ULTRAFAST MAGNETISM

- 14077 02 **Ultrafast high-harmonic spectroscopy of photoinduced dynamics and long-lived coherences in ferroelectric BaTiO₃** [14077-3]

CONDENSED PHASE PHYSICS: MIXED TOPICS

- 14077 03 **Direct subcycle momentum-resolved observation of Landau-Zener-Majorana transitions in lightwave-driven graphene** [14077-12]

NOVEL TOOLS

- 14077 04 **Theoretical description of the energy flow mechanisms in photoexcited semiconductors** [14077-21]

MOLECULAR DYNAMICS II

- 14077 05 **Electron thermalization in TDDFT and Ehrenfest molecular dynamics** [14077-25]

STRONG FIELD PROCESSES

- 14077 06 **Ultrafast soft x-ray absorption study of strong-field-induced dynamics in pyridine across gas and neat-liquid phases (Invited Paper)** [14077-29]
- 14077 07 **Tracking bandgap dynamics in solids with extreme ultraviolet high harmonic interferometry** [14077-31]
- 14077 08 **Single photon high harmonic spectroscopy of strongly correlated materials (SPIE Best Student Paper Award)** [14077-32]

POSTER SESSION

- 14077 09 **Investigating photonic response, structure, and harmonic generation in a lab grown TaAs Weyl semimetal crystal** [14077-33]
