Volume 14080

Proceedings of SPIE 0277-786X, V. 14080

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Functional Materials: Advances and Applications*, edited by Alistair Kean, Nikhil Bhalla, Riccardo Funari, Proc. of SPIE 14080, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

METAMATERIALS AND FUNCTIONAL NANOPHOTONICS

- 14080 02 **Metamaterials for medical applications: semiconductor nanowire metamaterials driven tunable surface waves** [14080-1]
- 14080 03 **Nanostructured sol-gel TiO₂ layers fabricated by nanoimprint lithography for enhanced light absorption in photocatalysis** [14080-2]
- 14080 04 **Bayesian optimization of bio-inspired motheye antireflective surfaces across the mid-infrared on silicon** [14080-3]

PEROVSKITES AND METAL HALIDES

- 14080 05 **landscape of excited states in 0D metal halide (Invited Paper)** [14080-6]
- 14080 06 **An ultrasensitive biosensor based on graphene and perovskite heterostructures** [14080-13]

DYNAMICS, IR, AND ELECTRICALLY ACTIVE MATERIALS

- 14080 07 **Tuning phonon properties in isotopically enriched hexagonal boron nitride** [14080-8]

FIBER/RI SENSING AND BIOSENSING DEVICES

- 14080 08 **Reflection-mode fiber optic biosensor integrating FBG and short period-LPG for real-time detection of fPSA (Invited Paper)** [14080-12]
- 14080 09 **Temperature-compensated refractive index sensing using a cascaded FBG/short-period-LPG fiber configuration** [14080-14]

SURFACES, MORPHOLOGY AND HYBRID PLATFORMS

- 14080 0A **Mechanically reconfigurable hybrid interferometers from copper coordination polymer single crystals** [14080-16]
- 14080 0B **Biocompatible metal-organic frameworks for light-driven chemosensing and thermometry** [14080-17]

RAMAN/SERS FOR CHEMICAL- AND BIO-DETECTION

14080 0C **Detection of nanoplastics using SERS with silver nanoflowers** [14080-19]

POSTER SESSION

14080 0D **Construction of ZnO/V₂O₅ heterostructured photoelectrodes with a staggered band alignment for improved photoelectrochemical performance** [14080-26]

14080 0E **Real-time optical sensing technique using a nanophotonic cavity based on microellipsometry** [14080-27]

14080 0F **Laser cleaning of contaminated silica optical components for high-power laser facilities** [14080-29]

14080 0G **Solution-process high-brightness white light colloidal quantum dots light-emitting diodes (SPIE Best Student Paper Award)** [14080-32]

14080 0H **Ultraflat silver films for photonic applications** [14080-33]

14080 0I **Hydrothermal synthesis of multifunctional seaweed-derived biomass carbon for energy storage** [14080-37]

14080 0K **Ultrathin flexible glass with Au nanoparticles for SERS substrates enhanced by bending treatments** [14080-41]

14080 0M **LIBT-fabricated metallic patterns for guided cell spheroid growth** [14080-46]
