Volume 14090

Proceedings of SPIE 0277-786X, V. 14090

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Semiconductor Lasers and Laser Dynamics XII*, edited by Marc Sciamanna, Fan-Yi Lin, Jesper Mørk, Proc. of SPIE 14090, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MODE-LOCKING DYNAMICS I

- 14090 02 **Chaos generation controlled via modulation frequency of a gain switched laser (SPIE Best Student Paper Award)** [14090-4]

MULTIMODE LASERS AND SPIN LASERS

- 14090 03 **Multimode vertical-cavity surface-emitting lasers under spin-injection** [14090-6]
- 14090 04 **Nanosecond wavelength switching in integrated feedback-controlled multiwavelength lasers** [14090-7]
- 14090 05 **All-optical multiwavelength conversion over THz via laser-assisted cross-gain modulation in a multiwavelength laser** [14090-8]

EXTERNAL CAVITY LASERS AND FEEDBACK

- 14090 06 **Optical feedback-induced quasiperiodic cascade in optically injected semiconductor lasers** [14090-14]

SEMICONDUCTOR LASER DESIGN AND PERFORMANCES

- 14090 07 **Experimental demonstration and theoretical analysis of electrically-driven photonic crystal nanobeam lasers** [14090-19]
- 14090 08 **Silicon nitride PIC-based ECL at 637nm with flip-chip-bonded RSOA** [14090-21]
- 14090 09 **Birefringence characterization of coupled-cavity VCSELs** [14090-23]

LASER-BASED COMPUTING AND NETWORK DYNAMICS

- 14090 0A **Deep photonic reservoir computer for fiber nonlinearity compensation of coherent signals** [14090-29]
- 14090 0B **Experimental and numerical analysis of semiconductor laser network dynamics** [14090-31]

LASER DYNAMICS AND CHAOS

- 14090 0C **Locking-unlocking dynamics of mutually coupled laser diodes for extreme events (Invited Paper)** [14090-33]
- 14090 0D **Polarization and transverse mode dynamics in a broad-area VCSEL** [14090-36]
- 14090 0E **Chaos Raman distributed optical fiber sensing using bandwidth-tailored chaos laser for enhanced SNR and temperature localization** [14090-37]

MODE-LOCKING DYNAMICS II

- 14090 0F **Photonics-assisted radio frequency down conversion with quantum-dot mode-locked lasers** [14090-25]

POSTER SESSION

- 14090 0G **Development of a high-speed, high-spectral-resolution grating spectrometer for a low-cost VCSEL swept-source laser diode for hydrogen gas sensing** [14090-41]
- 14090 0H **Waveguide-pair design co-optimization and tolerance study for hybrid III-V/Si quantum dot DBR lasers** [14090-42]
- 14090 0I **Cavity-enhanced high-speed mid-infrared trace gas measurement system using a narrowband-filtered InAs detector and a quantum interband cascade LED** [14090-44]
- 14090 0J **The description of heat dissipation stages in quantum cascade lasers: experiment and analytics** [14090-45]
- 14090 0K **Beam quality enhancement of broad-area semiconductor lasers achieved through lateral and longitudinal current modulation** [14090-47]
- 14090 0L **Time domain modeling of actively modulated semiconductor lasers** [14090-48]
- 14090 0M **Revisiting optical feedback: dynamic targeting for rapid and precise laser tuning** [14090-51]
- 14090 0N **Recent progress in self-injection-locked DFB semiconductor lasers using optical fiber ring cavities** [14090-52]
