Volume 14092

Proceedings of SPIE 0277-786X, V. 14092

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nonlinear Optics and its Applications 2026*, edited by John M. Dudley, Anna C. Peacock, Birgit Stiller, Giovanna Tissoni, Proc. of SPIE 14092, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

NONLINEAR PHOTONICS FOR QUANTUM APPLICATIONS

- 14092 02 **A fibre-integrated SPDC heralded single-photon source using Zn-indiffused LiNbO₃ ridge waveguides at telecom wavelengths** [14092-3]

NOVEL OPTICAL SOURCES, ULTRAFAST, HIGH FIELD, APPLICATIONS

- 14092 03 **High energy 1.53-cycle pulses via homogeneous post-compression in a single thin-plate** [14092-10]
- 14092 04 **EUV harmonic generation in MgO shaped by nonlinear propagation** [14092-12]

NOVEL NONLINEAR DYNAMICS AND APPLICATIONS

- 14092 05 **Cat-and-mouse dynamics in faticons for fine-tuning comb line spacing** [14092-15]
- 14092 06 **Mid-infrared optical bistability in germanium-based ring resonators** [14092-16]
- 14092 07 **Four-wave mixing in an optically injected feedback-controlled Fabry-Perot laser for tunable THz signal generation** [14092-17]

NONLINEAR PHOTONICS AND MACHINE LEARNING

- 14092 08 **Ultrafast nonlinear fiber amplifier in the 1560-1670nm spectral range optimized with machine learning** [14092-21]
- 14092 09 **Diffusion models for robust full-field prediction of soliton propagation (SPIE Best Student Paper Award)** [14092-23]

NONLINEAR EFFECTS IN FIBRE AND/OR MICRORESONATORS

- 14092 0A **Low-noise supercontinuum using a 1.85µm fs pump in elliptical-core and normal-dispersion ZBLAN fibres** [14092-26]
- 14092 0B **Design of an all-normal dispersion photonic crystal fiber for stable and coherent supercontinuum generation** [14092-27]

- 14092 0C **Tuneable far-detuned intramodal four-wave mixing via diameter control of optical microfibres** [14092-28]
- 14092 0D **Phase noise properties of supercontinuum generation in all-normal dispersion fibers** [14092-29]

FREQUENCY COMBS, NOVEL RESONATORS

- 14092 0E **Precision fabrication of a microbubble resonator for mode control** [14092-33]
- 14092 0F **Sub-femtosecond relative timing jitter of a all-fiber, dual-color laser at 1.0 μ m and 1.5 μ m** [14092-34]

NOVEL SOLITON DYNAMICS AND APPLICATIONS

- 14092 0G **The strange map of synchronization: breathing solitons beyond the ordinary Arnold's tongues** [14092-40]

FREQUENCY COMBS, SOLITONS

- 14092 0H **Self-starting 100 GHz broadband Kerr optical frequency comb** [14092-45]
- 14092 0I **Engineered mode coupling in high-Q microresonators enables deterministic low-repetition-rate soliton microcombs** [14092-47]

POSTER SESSION

- 14092 0J **Photonic and nonlinear optical response of lab-grown WTe₂ Weyl semimetal crystal: structure, dielectric properties, and harmonic generation** [14092-51]
- 14092 0K **From solitons to wave-breaking: let the data classify the light** [14092-55]
- 14092 0L **Ultrashort pulses characterization by two-photon absorption signal in thick samples** [14092-57]
- 14092 0M **Fiber-optic communication using Hirota modulation and neural networks** [14092-60]
- 14092 0N **A 2.4GHz axial optical comb from a Fabry-Perot laser self-injection locked to a SNAP microresonator** [14092-64]
- 14092 0O **Assessment of polymer host-guest materials for all-optical photonic applications by COMSOL simulation** [14092-69]

- 14092 0P **Nonlinear dynamics and stability of Kerr degenerate optical parametric oscillators**
[14092-70]
- 14092 0Q **Exceptional points and bifurcations in single Kerr ring and Fabry-Pérot resonators: new insights for integrated photonics** [14092-71]
- 14092 0R **Second hyperpolarizability measurements of organic materials by third harmonic hyper-Rayleigh scattering** [14092-75]
- 14092 0S **Air-hole-assisted ring-core fiber: a new platform for enhanced intermodal spatial overlap and nonlinearity** [14092-79]
- 14092 0T **Temporal compression of picosecond low peak power optical pulses using freeform SiN waveguides** [14092-80]
- 14092 0U **Nonlinear metal-organic framework crystals: from bulk to nanometer scales** [14092-85]
- 14092 0V **Dual-wavelength pumped supercontinuum generation and temporal reflection dynamics in a nonlinear photonic integrated circuit** [14092-86]
- 14092 0W **Resonant second-harmonic generation at 300nm exceeding 4.5W** [14092-94]
- 14092 0X **Single-frequency mid-infrared source based on unidirectional ring-laser exploiting differential parametric gain from tunable, single-frequency pump source** [14092-97]
- 14092 0Y **High-harmonic spectroscopy probes the anisotropic charge-density-wave strengths of TiSe_2** [14092-99]
- 14092 0Z **Transition from narrowband generation to turbulent multimode spectrum in a random fiber laser** [14092-105]
- 14092 10 **High repetition rate pulse train generation in fibers with linear anomalous dispersion decrement: algorithm for refining the longitudinal dispersion profile of the fiber** [14092-107]
- 14092 11 **Enhancement of multipulse generation threshold in SESAM-based PM fiber soliton laser**
[14092-108]
