Volume 14096

Proceedings of SPIE 0277-786X, V. 14096

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics in Point-of-Care IV*, edited by Michael T. Canva, Ambra Giannetti, Hatice Altug, Julien Moreau, Proc. of SPIE 14096, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MOBILE BIOSENSING FOR DIAGNOSTIC

- 14096 02 **Next-generation diagnostics: biospectroscopic fingerprinting of exhaled breath, liquid biopsies, and extracellular vesicles (Invited Paper)** [14096-1]
- 14096 03 **Bioinspired bioluminescent biosensors for portable and wearable diagnostics (Invited Paper)** [14096-2]
- 14096 04 **Polymer-waveguide-based low-cost photonic biosensors for quantitative tear fluid diagnostics at the point of care** [14096-3]

MOBILE BIOSENSING SYSTEMS

- 14096 05 **Power spectral density of fNIRS signals to separate stroke patients and controls** [14096-7]

CELL CHARACTERIZATION-BASED SYSTEMS

- 14096 06 **High-throughput multispectral skin sensing for non-invasive detection of psychological stress** [14096-9]

INTEGRATED PHOTONICS

- 14096 07 **SiN integrated MZI for high sensitivity biosensing** [14096-12]
- 14096 08 **End-of-fiber optomechanical cantilevers for label-free biomimetic mass sensing** [14096-13]

LABEL-FREE SPR SENSING INSTRUMENTATION

- 14096 09 **Integration of multilayer QLED source on portable prism-based SPR sensors for water pollutant detection** [14096-18]
- 14096 0A **SPR imaging in microfluidic flow for individual microplastic particle analysis (SPIE Best Student Paper Award)** [14096-19]

POSTER SESSION

- 14096 0B **Fiber-integrated dual-gene detection platform based on enzymatic recombinase amplification and tapered microfiber sensing** [14096-20]
- 14096 0C **Unveiling dialysis effects on carbon dots via FTIR spectroscopy** [14096-21]
- 14096 0D **Visual detection of total viral RNA with catalytic DNA-nanomachine** [14096-22]
- 14096 0E **Surface-enhanced Raman spectroscopy for selective exosome detection using plasmonic circular nanostructure biosensors** [14096-26]
- 14096 0F **High-span multichannel biosensor based on SU-8 PIC technology** [14096-27]
- 14096 0G **Gold nanoflowers for colorimetric detection of NGAL antibodies** [14096-28]
- 14096 0H **Quantum-dot-enhanced SPR for real-time detection of two lung cancer biomarkers in spiked saliva samples** [14096-31]
