Volume 14097

Proceedings of SPIE 0277-786X, V. 14097

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Clinical Biophotonics IV*, edited by Daniel S. Elson, Sylvain Gioux, Brian W. Pogue, Proc. of SPIE 14097, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

HEAD AND NECK

- 14097 02 **Label-free Raman imaging of tumor biopsy slice cultures: a versatile model for head and neck cancer research** [14097-3]
- 14097 03 **Near-infrared LED-based otoscope for the diagnosis of tympanic effusions** [14097-4]
- 14097 04 **Preclinical comparison of a video-rate multispectral imaging system with a clinical hyperspectral reference for quantitative tissue oxygenation assessment** [14097-5]

GASTROINTESTINAL TRACK

- 14097 05 **Diffuse reflectance spectroscopy for lymph node assessment in oesophagogastrrectomy: ex vivo characterisation and Monte Carlo modelling** [14097-10]

MUSCULOSKELETAL AND OCT

- 14097 06 **OCT-guided laser bone ablation for spinal surgery: an in-line deep learning approach for residual bone thickness monitoring** [14097-13]

LUNG

- 14097 07 **Light-in-the-lungs: a hyaluronic acid aerosol platform for low-level laser therapy** [14097-16]

NOVEL TECHNIQUES AND DATA PROCESSING

- 14097 08 **Clinical polarimetry: identifying minimal Mueller subsets to increase imaging speed** [14097-21]

BRAIN AND NERVOUS SYSTEM I

- 14097 09 **Intracranial tumor classification with hyperspectral imaging: rapid prediction from tissue parameters versus machine learning** [14097-27]

BRAIN AND NERVOUS SYSTEM II

- 14097 OA **Personalized surgery improved by real-time machine learning classification of low-grade gliomas subtypes using reflectance spectroscopy and 5-ALA-induced fluorescence spectroscopy** [14097-31]
- 14097 OB **Three-dimensional intraoperative light field fluorescence imaging system for PpIX-guided tumour resection** [14097-33]
- 14097 OC **FEM simulation of spatially-modulation-based phosphene stimulation** [14097-34]

NOVEL DEVICES AND TECHNIQUES

- 14097 OD **Multispectral sensor system for miniaturized endoscopic tissue discrimination in oncology** [14097-38]
- 14097 OE **Light focusing through dynamic scattering media via real-valued intensity transmission matrix** [14097-40]

POSTER SESSION

- 14097 OF **Translational fNIRS for real-time monitoring of brain responses to radiotherapy** [14097-41]
- 14097 OG **Application of a two-layer photon diffusion model to three-layered digital phantoms for haemoglobin and oxygen saturation estimation using broadband time-resolved NIR spectroscopy** [14097-45]
- 14097 OH **Concentrations of light-absorbing cytochrome species in yeast-based tissue-mimicking phantoms** [14097-47]
- 14097 OI **Enhanced detection of dental microfractures using Bessel-like beam optical coherence tomography** [14097-50]
- 14097 OJ **Development of brain phantoms using 3D printing for multimodal optical imaging systems** [14097-51]
- 14097 OK **Rapid multispectral Mueller matrix polarimetric imaging for clinical cancer assessment** [14097-52]
- 14097 OL **Assessment of premalignant and benign keratotic dermatological manifestations with combined autofluorescence intensity and photobleaching imaging** [14097-54]
