Volume 14098

Proceedings of SPIE 0277-786X, V. 14098

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Tissue Optics and Photonics IV*, edited by Walter C. Blondel, Zeev Zalevsky, Valery V. Tuchin, Proc. of SPIE 14098, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

BRAIN SENSING AND IMAGING

- 14098 02 **Light-tissue interaction and pathways for noninvasive neurostimulation (Invited Paper)** [14098-1]
- 14098 03 **Sensing brain motions by combining ultrasound and optics (Invited Paper)** [14098-2]
- 14098 04 **Dual-excitation 5-ALA fluorescence spectroscopy and machine learning for optical guidance in glioma surgery (SPIE Best Student Paper Award)** [14098-3]
- 14098 05 **Physics-informed neural networks for quantitative tissue chromophore and fluorophore estimation from reflectance and fluorescence spectra** [14098-4]

SKIN IMAGING

- 14098 06 **Illumination normalization in Monte Carlo-simulated skin colour modelling** [14098-5]
- 14098 07 **Oxygen saturation evaluation using hyperspectral imaging and optical spectroscopy: a study on optical phantoms** [14098-6]
- 14098 08 **The role of reference skin in melanoma and non-melanoma skin cancer classification with hyperspectral imaging** [14098-7]
- 14098 09 **Rotation-based specular reflection removal for enhanced medical hyperspectral imaging** [14098-8]
- 14098 0A **Quantification of skin tone using a miniature spectrometer for biomedical optical measurements** [14098-9]
- 14098 0B **Multilayer silicone phantom for skin tissue optical representation in hyperspectral applications** [14098-10]

LIGHT-TISSUE INTERACTION MODELLING AND AI/ML-BASED DATA ANALYSIS I

- 14098 0C **Hamiltonian optics-based Monte Carlo ray tracing in scattering media with ultrasound induced refractive index profiles (Invited Paper)** [14098-11]
- 14098 0E **Modelling optical beam spread in the transition to the diffusion regime in scattering media** [14098-13]

LIGHT-TISSUE INTERACTION MODELLING AND AI/ML-BASED DATA ANALYSIS II

- 14098 OF **Monte Carlo analysis of diffuse reflectance spectroscopy using integrating spheres with an internal light source (Invited Paper)** [14098-14]
- 14098 OG **Symbolic Monte Carlo for quantifying 5-ALA-induced PpIX concentration using fluorescence spectroscopy in neurosurgical intraoperative imaging** [14098-15]
- 14098 OH **Monte Carlo modeling of age-dependent skin appearance with subsurface inclusions** [14098-16]

LIGHT-TISSUE INTERACTION MODELLING AND AI/ML-BASED DATA ANALYSIS I

- 14098 OI **Influence of the scattering phase function on absorption coefficient reconstruction in inverse Monte Carlo simulation at high absorption levels** [14098-18]
- 14098 OJ **Machine learning-enhanced hyperspectral imaging for intraoperative assessment of intestinal viability** [14098-19]
- 14098 OK **Optical estimation of applied pressure on vascularized tissue using machine learning** [14098-20]
- 14098 OL **Mapping of gas gradients in porous multilayer phantoms with CT-GASMAS** [14098-21]

MICROSCOPY METHODS AND APPLICATIONS I

- 14098 ON **Numerical aperture gating induced improvements in penetration depth: simulation study (Invited Paper)** [14098-23]
- 14098 OO **Microscopy methods for measuring the uptake and location of inorganic-organic hybrid nanoparticles within cancer cells (Invited Paper)** [14098-24]
- 14098 OQ **Trimodal WAR microscope for cancer diagnostics** [14098-26]
- 14098 OR **Terahertz assisted optical constant-based classification of urinary stones** [14098-27]

PHOTOTHERMAL INTERACTIONS AND LASER THERAPIES

- 14098 OV **Optical and thermal characterization of ex vivo porcine pancreatic tissue under controlled temperature variation** [14098-32]
- 14098 OX **Protocol to reproduce thermal damage in ex-vivo tissue enabling optical and thermal characterization of ablation zones** [14098-34]
- 14098 OZ **OCT morphology assessment of 3D-printed skin melanoma and its direct laser treatment** [14098-36]

SOURCES AND SENSOR TECHNOLOGIES AND APPLICATIONS I

- 14098 10 **Random laser-based sensing: recent progress and future directions for biomedical optics (Invited Paper)** [14098-37]
- 14098 11 **Characterization and evaluation of a compact laser diode stack for full-aperture line illumination towards a handheld photoacoustic probe** [14098-38]
- 14098 12 **Harnessing the potential of conical refraction-based structured light for the next-generation cancer diagnosis** [14098-39]
- 14098 13 **Modelling and performance assessment of wavefront shaping in time-varying media** [14098-40]
- 14098 14 **Wavefront engineering and polarization dynamics in biological glass fibers** [14098-41]

SOURCES AND SENSOR TECHNOLOGIES AND APPLICATIONS I

- 14098 15 **Mid-infrared quantum-cascade lasers for gas detection (Invited Paper)** [14098-42]
- 14098 16 **Photon transport and sampling regimes in NIR interaction spectroscopy of layered, structurally evolving samples** [14098-43]
- 14098 17 **Epicuticular wax as a natural photonic crystal: implications for modeling light transport in biological tissues** [14098-44]
- 14098 18 **Angular and positional filtering of WGMs in deformed droplet microcavities for 3D stress and strain sensing** [14098-45]

SPECKLE IMAGING AND OCT APPLICATIONS I

- 14098 1B **Comparison of OCT and LDV for surface vibration measurements and implications for surface wave elastography in multilayered tissues such as skin** [14098-48]

POLARIZATION TECHNIQUES II

- 14098 1G **Fibrillar collagen organization mapping from imaging Mueller polarimetry data using SHG-guided machine learning (SPIE Best Student Paper Award)** [14098-53]
- 14098 1I **Development of a backscattering Mueller polarimetric scanning system for subsurface structural characterization** [14098-55]

SPECKLE IMAGING AND OCT APPLICATIONS II

- 14098 1J **SPAD gated tissue perfusion sensing (Invited Paper)** [14098-56]
- 14098 1K **Real-time monitoring of gastropod mucus deposition with optical coherence tomography (Invited Paper)** [14098-57]
- 14098 1L **Optimized speckle size calibration approach for laser speckle contrast imaging for intraoperative vascular monitoring** [14098-58]
- 14098 1M **Bimodal skin phantoms for calibration of terahertz systems** [14098-95]

HEALTH MONITORING

- 14098 1O **Evaluation of the benefits of a multipoint, multiwavelength PPG sensor for the estimation of physiological parameters on healthy volunteers** [14098-60]
- 14098 1P **Active pressure-controlled microvascular hyperspectral imaging** [14098-61]
- 14098 1Q **Development of a sensor array system for measurement of arterial oxygen and tissue oxygen for local perfusion monitoring** [14098-62]
- 14098 1R **Laser-induced breakdown spectroscopy (LIBS): detecting unexpected elements in human fingernails** [14098-63]

POSTER SESSION

- 14098 1T **Optimization of experimental parameters for confocal Raman microspectroscopy of formalin-fixed and paraffin-embedded human skin cancer tissue sections** [14098-30]
- 14098 1U **Metrological characterization of a double integrating-sphere optical bench for the measurement of optical properties of scattering and absorbing media** [14098-65]
- 14098 1V **Optimized illumination for wide field laser speckle contrast imaging** [14098-66]
- 14098 1W **Quantifying the impact of chromophore variation on simulated skin color** [14098-67]
- 14098 1X **A photobiomodulation approach at 660nm for ischemic stroke: in silico and in vitro analysis** [14098-68]
- 14098 1Y **Dual-optical imaging of lymphatic dysfunction and superficial blood perfusion in a rat hindlimb lymphedema model** [14098-69]
- 14098 1Z **Photobiomodulation with 660nm Improves in lymphedema animal models** [14098-71]

- 14098 20 **Colorimetric differences between ICU patients and healthy subjects explained by chromophore variation via simulated skin reflectance** [14098-72]
- 14098 22 **Correlation between fluorescence spectroscopy and mass spectrometry results on porphyrins phantoms and yeast models** [14098-74]
- 14098 23 **Tumor thermal damage assessment in nanoparticle-mediated photothermal therapy with hyperspectral imaging: preliminary in vivo results in a syngeneic 4T1 mouse model** [14098-75]
- 14098 25 **Simulating light-tissue interaction with phantom-based validation** [14098-77]
- 14098 27 **Wearable photoacoustic LED array based on frequency-modulated excitation and 3D-printed microlenses** [14098-79]
- 14098 28 **Improved therapeutic outcomes of sono-photodynamic therapy via IR-783 sensitization in papillary thyroid carcinoma** [14098-80]
- 14098 29 **Efficacy of IR783-mediated photodynamic therapy in 3D ovarian cancer microtissues** [14098-81]
- 14098 2A **Toward numerical skin twin** [14098-82]
- 14098 2B **Unsupervised analysis of in vivo skin spectra using optimal transport-based distances** [14098-83]
- 14098 2C **Trolox-loaded liposomal formulation enhances photodynamic therapeutic performance of protoporphyrin IX in PC3 prostate cancer cells** [14098-84]
- 14098 2D **Refractive index and thickness decoupling using hyperspectral quantitative phase microscopy** [14098-85]
- 14098 2E **Photothermal-driven anticancer efficiency of indocyanine green J-aggregates and nanocarrier in 3D cocultures of head and neck cancer** [14098-86]
- 14098 2F **Analytical model of light radiance in a scattering slab with inner plane-wave source in the P3 approximation** [14098-87]
- 14098 2G **Effect of spatial coherence on needle beams generated from conically refracted light** [14098-88]
- 14098 2J **Pressure-induced alterations in PPG pulse morphology demonstrated with a dynamic tissue-mimicking phantom** [14098-91]
- 14098 2K **Acousto-optic signal detection methodology during focused ultrasound induced blood-brain barrier opening in mice** [14098-92]
- 14098 2L **Apoptosis development induced by 1265nm laser irradiation in melanoma cell cultures** [14098-93]
