Volume 14099

Proceedings of SPIE 0277-786X, V. 14099

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Data Science for Photonics and Biophotonics II*, edited by Thomas Bocklitz, Proc. of SPIE 14099, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TAILORING ANALYSIS TO VARIOUS DATA TYPES

- 14099 02 **How high dimensionality enables perfect accuracy in machine learning applied to spectroscopy** [14099-9]

DEEP NEURAL NETWORKS IN BIOPHOTONIC DATA

- 14099 03 **Label-free to fluorescence image translation using Pix2PixHD with SwinIR-based refinement** [14099-10]

BIOPHOTONIC DATA PREPROCESSING AND STANDARDIZATION

- 14099 04 **Hybrid modeling and data-driven approaches for addressing scattering challenges in mid-infrared spectroscopy (Invited Paper)** [14099-14]
- 14099 05 **Multivariate Gaussian modeling of blood-based FTIR spectroscopy: framework and applications** [14099-16]
- 14099 06 **Generalized predictive pipeline for low-cost multispectral adulteration detection** [14099-3]

COMBINING VARIOUS DATA SOURCES

- 14099 07 **UMDSF: unified medical dataset format for interoperable, scalable, and privacy-aware medical imaging** [14099-18]
- 14099 08 **Variational autoencoder approach for solving the optical inverse scattering problem** [14099-19]
- 14099 09 **Domain-adversarial neural networks for cross-instrument harmonization in blood-based infrared spectroscopy** [14099-21]
- 14099 0A **Comparative evaluation of chemometric and machine learning approaches for Raman-based wine analysis** [14099-22]

POSTER SESSION

- 14099 0B **A cloud computing system for real-time measurements in long-range DAS using Apache Flink** [14099-24]
- 14099 0C **USDA UV-B monitoring and research program** [14099-27]
