Volume 14100

Proceedings of SPIE 0277-786X, V. 14100

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Integrated Photonics Platforms IV*, edited by Peter O'Brien, Delphine Maris-Morini, Dries Van Thourhout, Proc. of SPIE 14100, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

PACKAGING AND HETEROGENEOUS INTEGRATION

- 14100 02 **Photonic wire bonds and facet-attached microlenses: enabling scalable integration of lasers and PICs (Invited Paper)** [14100-1]
- 14100 03 **Modular expanded beam interface for cross-platform optical integration enabled by 3D-printed micro-optics** [14100-2]
- 14100 04 **Hybrid integration of blue laser diodes on SiN photonic integrated circuits by flip-chip bonding (SPIE Best Student Paper Award)** [14100-4]

HETEROGENEOUS INTEGRATION

- 14100 05 **Multiwavelength heterogeneously integrated lithium niobate on silicon nitride tunable filters and switches** [14100-7]
- 14100 06 **Low-defect InAs/InGaAs quantum dot lasers directly grown on silicon: scalable fabrication and high-temperature laser characterization** [14100-8]

PHOTONICS PLATFORMS I

- 14100 07 **Al₂O₃ as a multifunctional platform for rare-earth ion doped integrated waveguide amplifiers (Invited Paper)** [14100-9]
- 14100 08 **Electrically tunable optical filters based on barium strontium titanate for the telecom range** [14100-10]
- 14100 09 **Advancing lithium niobate on silicon nitride platform in the visible and the near infrared (NIR): LOLIPOP project** [14100-11]
- 14100 0A **Low-loss, low-background aluminium oxide waveguide platform for UV-visible applications** [14100-12]

THZ AND MID-IR PHOTONICS

- 14100 0B **Regenerative amplification in feedback-controlled multiwavelength lasers for a photonic-based THz filter** [14100-21]
- 14100 0C **High-efficiency suspended silicon waveguide edge coupler operating at 3.3 μ m for methane detection** [14100-23]
- 14100 0D **Hybrid integration of rare earth-doped chalcogenides with silicon photonics for mid-IR emission** [14100-24]
- 14100 0E **Anti-reflective subwavelength gratings for waveguide facets in the mid-infrared** [14100-25]
- 14100 0F **Low-loss amorphous silicon (α -Si) cladded germanium-on-silicon waveguides for on-chip mid-infrared spectroscopy** [14100-27]

NONLINEAR OPTICS

- 14100 0G **Waveguide loss model and geometry optimization for linear applications** [14100-31]
- 14100 0H **Stimulated four-wave mixing in a low-footprint Q-InP channel waveguide** [14100-32]

PILOT LINES

- 14100 0I **Monolithic PIC platforms developed in the PIXEurope pilot line for open access services (Invited Paper)** [14100-33]
- 14100 0J **From lab to fab: design essentials for photonics manufacturing facilities** [14100-34]

PACKAGING

- 14100 0K **Optimization of a metalens-based fiber-to-chip coupler for efficient and broadband coupling** [14100-37]
- 14100 0L **Solder-reflow compatible, injection-molded thermoplastic microlens arrays for co-packaged optics** [14100-38]

APPLICATIONS BEYOND TELECOMMUNICATIONS I

- 14100 0M **TFLN platform for QKD and telecom applications** [14100-42]

APPLICATIONS BEYOND TELECOMMUNICATIONS II

- 14100 ON **Quantum correlations in integrated photonic frequency combs (Invited Paper)** [14100-43]
- 14100 OO **Mitigating atmospheric turbulence in chaos-based free-space optical links using a programmable optical processor** [14100-44]
- 14100 OP **Characterization of an integrated multipath interferometer on a CubeSat in space** [14100-45]
- 14100 OQ **RF beam steering using a 5-bit, 4-channel reconfigurable optical true time delay chip on a 3 μm SOI platform** [14100-46]

PIC TRAINING FOR CAREER DEVELOPMENT

- 14100 OR **Skilling up within an integrated photonics ecosystem: just-in-time workforce training for More Moore (Invited Paper)** [14100-47]

DEVICES

- 14100 OS **Resonator detuning monitoring using frequency-swept phase modulation** [14100-52]

TESTING AND DEVICES

- 14100 OT **Ultra broadband polarization splitter for advanced photonics applications** [14100-57]
- 14100 OU **Narrow bandwidth thermally tunable optical filters with higher order coupled resonator optical waveguides (CROWs) in a post-CMOS compatible silicon nitride platform** [14100-58]

POSTER SESSION

- 14100 OV **AIML-based process design for cavity etch in silicon photonics** [14100-60]
- 14100 OW **Ceramic fiber combiner platform for single-mode coupling of multiple high-power lasers of different wavelengths into a polarization-maintaining endlessly single-mode large-mode-area fiber** [14100-62]
- 14100 OX **Epitaxial design trade-offs and lateral mode profiles in hybrid III-V/Si quantum dot DBR lasers without III-V tapering** [14100-65]
- 14100 OY **Efficient on-chip Brillouin scattering on a tellurite-based photonic platform** [14100-69]

- 14100 0Z **Passive directional couplers in Si and α -Si:H: a comparative study of conventional and shallow-rib strip configurations for $0.5 \times 0.22 \mu\text{m}$ waveguides** [14100-76]
- 14100 10 **Applying atomic layer etching for enhanced SiC-based photonic devices** [14100-79]
- 14100 11 **Optimization techniques for probe card alignment in wafer-level photonic integrated circuit testing** [14100-82]
