Volume 14102

Proceedings of SPIE 0277-786X, V. 14102

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photosensitive Materials and their Applications IV*, edited by Robert R. McLeod, Inmaculada Pascual Villalobos, Yasuo Tomita, Proc. of SPIE 14102, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTOPOLYMER MATERIALS AND APPLICATIONS

- 14102 02 **Photochromic–photopolymer films for reconfigurable DOEs (Invited Paper)** [14102-1]
- 14102 03 **Development of MPC-functionalized photohydrogels as advanced holographic biosensors (SPIE Best Student Paper Award)** [14102-2]
- 14102 04 **Designing spectrally tuned holograms via photoresponsive material modelling** [14102-3]
- 14102 05 **Simultaneous RGB multiplexing in Bayfol HX200 photopolymer for augmented reality eyewear** [14102-4]

PHOTOPOLYMERIZABLE NANOCOMPOSITE/GLASS MATERIALS AND APPLICATIONS

- 14102 07 **Commissioning measurements for a very cold neutron interferometer based on nanodiamond-polymer composite gratings** [14102-7]
- 14102 09 **Dielectric hollow nanospheres dispersed photopolymer for holographic applications** [14102-9]
- 14102 0A **Platinum nanoparticles effects in hologram's formation processes in a low-toxicity photopolymer material** [14102-10]

MATERIAL CHARACTERIZATION AND MODELING

- 14102 0B **Wavefront-based optical power model in holographic lenses stored in a green photopolymer (Invited Paper)** [14102-11]
- 14102 0C **Comparative study of continuous and pulsed exposure in transmission hologram gratings** [14102-12]
- 14102 0D **Optimization of optical diffuser using Bayfol HX photopolymer** [14102-13]
- 14102 0E **Optimization of inhomogeneous beam distribution for self-written holographic mode converter in photopolymer material** [14102-14]

- 14102 OF **Machine learning-assisted calibration of a perovskite-silicon tandem solar cell 2D-model via TRPL analysis** [14102-15]
- 14102 OG **High-efficiency holographic sensors for water detection in organic media** [14102-16]

PHOTOSENSITIVE LIQUID CRYSTAL AND POLYMERIC MATERIALS

- 14102 OH **Geometric phase elements fabricated via polarization holography on photoalignable liquid crystal polymers and their applications (Invited Paper)** [14102-17]

MATERIALS FOR NANOLITHOGRAPHIC AND MEDICAL APPLICATIONS

- 14102 OK **Metasurface-based high resolution confocal fluorescence microscopy (Invited Paper)** [14102-21]
- 14102 OM **Photodynamic potential of rosemary-derived carbon quantum dots combined with ruta chalepensis in prostate cancer cells** [14102-23]
- 14102 ON **Docetaxel and *Taxus baccata* extract: comparative toxicity analysis and extract-mediated photodynamic therapy in breast cancer** [14102-24]

POSTER SESSION

- 14102 OO **Development of a tailored cellulose-derived binder for sustainable hydrogel photopolymers** [14102-5]
- 14102 OP **Side-chain engineered photocurable polyimides for high-resolution DLP 3D printing of optical components** [14102-20]
- 14102 OQ **Tracking solar optimization by using multiplexed holograms in Bayfol photopolymers** [14102-26]
- 14102 OR **Metal-organic frameworks as a crystalline optical media for data storage and encryption** [14102-27]
- 14102 OS **Broadband, high-efficiency transmissive phase-change optical modulator** [14102-28]
- 14102 OT **Holographic optical elements for spectroscopic applications** [14102-30]
