Volume 14106

Proceedings of SPIE 0277-786X, V. 14106

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Design and Engineering X*, edited by James Babington, Ulrike Fuchs, Thierry Lépine, Proc. of SPIE 14106, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPTICAL SYSTEMS DESIGN TUESDAY PLENARY SESSION

14106 02 **An optical design journey through the computer age (Plenary Paper)** [14106-601]

MODELLING, SIMULATION, SOFTWARE I

14106 03 **Eye modeling for human perception analysis in complex scenes (Invited Paper)** [14106-1]

14106 04 **Multispectral thermal imager STOP analysis for the Harmony mission** [14106-2]

14106 05 **A systematic design study on telecentric large aperture lenses** [14106-3]

14106 06 **Ray-tracing simulation of metalens elements for polarization imaging** [14106-4]

LENS DESIGN, NEW METHODS, AI I

14106 07 **The modular principle in lens design: extreme color aberration correction study case (Invited Paper)** [14106-5]

14106 08 **Toward a rigorous nomenclature for three mirrors anastigmat** [14106-6]

14106 0B **Using structural aberration coefficients to filter first order starting points for reflective freeform zoom ophthalmoscopes (SPIE Best Student Paper Award)** [14106-9]

FREEFORM OPTICS, META-COMPONENTS

14106 0C **Experimental characterization of spiral lens performance at high field angles** [14106-10]

14106 0D **Freeform EDOF IOL design for eyes that have undergone LASEK** [14106-11]

14106 0E **Optical design of freeform volume holographic and computational holographic display systems** [14106-14]

JOINT SESSION: COMPUTATIONAL OPTICS FOR OPTICAL DESIGN

14106 OF **End-to-end optimization environment built from a differentiable ray tracer** [14106-15]

MODELLING, SIMULATION, SOFTWARE II

14106 OG **Automated multiphysics approach from mission planning to thermally induced performance degradation of an optical system (Invited Paper)** [14106-17]

14106 OH **Novel integrated metalens: grating coupler input/output workflow for photonic integrated circuits** [14106-18]

14106 OI **Wide field-of-view thermal imaging optimization: towards a distortion-minimum design via image projection** [14106-19]

OPTICAL INSTRUMENTATION, SYSTEMS I

14106 OK **Optical design and development of a multichannel corrector for the 80cm Mezzocielo wide-field demonstrator** [14106-22]

14106 OL **IFS spectrograph designs for the wide-field spectroscopic telescope: architecture and performance gains from curved sensors** [14106-24]

14106 OM **Optical concept model of the future cosmology project BISOU** [14106-25]

14106 ON **Development of a four-band SWIR optical payload for an Earth remote sensing nanosatellite** [14106-57]

14106 OO **Design and simulation of diffractive wavefront sensors for ground-based optical communication links (Invited Paper)** [14106-26]

LENS DESIGN, NEW METHODS, AI II

14106 OP **Design-for-assembly of optical systems built from off-the-shelf components** [14106-28]

14106 OQ **Project-driven and AI-based platform-empowered: teaching reform of optical system design course** [14106-29]

14106 OR **Using Fermat's principle for closed-form, real-time tolerancing** [14106-30]

14106 OS **Aberration principles behind an AI-based design method of zoom lens groups (Invited Paper, SPIE Best Student Paper Award)** [14106-31]

OPTICAL INSTRUMENTATION, SYSTEMS II

- 14106 OT **Design and manufacturing of a laser light-sheet fluorescence add-on module for upright optical microscopes (Invited Paper)** [14106-32]
- 14106 OU **Exploring the XUV projection lithography design space** [14106-33]
- 14106 OV **The optical design of PRIMAgger, the hyperspectral and polarimetric imager of the PRIMA space mission** [14106-35]
- 14106 OW **Design and simulation of a tunable fresnel lens with initial experimental validation** [14106-36]

STRAY LIGHT

- 14106 OX **Stray light analysis of the K-DRIFT G1 enabling low surface brightness astronomical observations (Invited Paper)** [14106-37]
- 14106 OY **A systematic approach to quantifying the impact of stray diffractive orders in zoom systems with multiple diffractive surfaces** [14106-40]

POSTER SESSION

- 14106 10 **Geometry and performance comparison of three optical concentrators for optical wireless communication applications** [14106-12]
- 14106 11 **Integrated multiphysics simulation framework for non-sequential STOP analysis** [14106-41]
- 14106 12 **An integrated workflow for the optimization of microLED transmitters in visible light communication systems** [14106-45]
- 14106 17 **Design and testing of a concave surface with changes in curvature using null-screens** [14106-50]
- 14106 19 **A data-driven approach to secondary color analysis** [14106-52]
- 14106 1A **Exploring optomechanical metamaterials for stray-light control** [14106-53]
- 14106 1B **Pupil-dependent performances of EDOF lenses in eyes with post-LASIK spherical aberration** [14106-54]
- 14106 1C **Bridging optical and thermoelastic simulations with surrogate models for system-level design** [14106-55]

- 14106 1D **Optical design of a Ritchey–Chrétien telescope with a decentered square aperture for 3U CubeSat** [14106-56]
- 14106 1E **Quantum computing for optical system design** [14106-59]
