Volume 14108

Proceedings of SPIE 0277-786X, V. 14108

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Fabrication and Testing IX*, edited by Eric Ruch, Reinhard Völkel, Proc. of SPIE 14108, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FREEFORM OPTICS

- 14108 04 **Supersmooth freeform polishing of optical components for high-power laser applications**
[14108-4]
- 14108 05 **Advances towards the automated alignment of freeform optical systems** [14108-5]
- 14108 06 **Manufacturing and testing of complex freeform optics at Safran Reosc: goals and achievements** [14108-6]

ALIGNMENT AND METROLOGY

- 14108 08 **Ritchey-Common test for low uncertainty metrology of ELT pre-focal station M6N mirrors**
[14108-7]
- 14108 09 **A framework for the automation of optical alignment tasks** [14108-8]
- 14108 0A **Laser triangulation for measuring deformable convex surfaces with diffuse reflectivity**
[14108-9]
- 14108 0B **Dynamic polychromatic null-screen deflectometry for concave surface characterization**
[14108-10]

METASURFACES

- 14108 0D **Microlens shape optimization through lithographic photoresist volume control** [14108-13]
- 14108 0E **Recent material innovations based on hybrid polymers for next generation optical elements and photonics** [14108-14]

MANUFACTURING I

- 14108 0G **CSOA0.5: under 500mm optical manufacturing capabilities for advanced astronomical components at the Instituto de Astrofísica de Canarias** [14108-17]
- 14108 0H **Development and fabrication of a lightweighted, metallic telescope for aviation-related quantum communication** [14108-18]

14108 0I **ELT M5 manufacturing and testing status** [14108-19]

14108 0J **Deformable bioplastic gratings with variable curvature based on chitosan from seafood waste** [14108-20]

MANUFACTURING II

14108 0L **Femtosecond laser direct writing of annular binary phase mask in glasses** [14108-22]

14108 0M **Development of radial gradient index (GRIN) optics by ionic exchange to improve the performance of infrared optronic systems** [14108-23]

POSTER SESSION

14108 0O **In-situ particle detection during optical coating process** [14108-25]
