Volume 14109

Proceedings of SPIE 0277-786X, V. 14109

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Illumination Optics VIII*, edited by Tina E. Kidger, Stuart David, Thorsten Schupp, Rengmao Wu, Proc. of SPIE 14109, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL SYSTEMS DESIGN TUESDAY PLENARY SESSION

- 14109 02 **Multi-LED illumination: from freeform optics design to spectroscopic sensing (Plenary Paper)**
[14109-600]

THEORY AND MORE

- 14109 03 **The case for angular extent X (Invited Paper)** [14109-1]
14109 04 **Enabling freeform optics design for extended light source** [14109-2]
14109 05 **Solving inverse freeform illumination problems via deep learning** [14109-3]
14109 06 **Design and fabrication of a high-power, LED-based artificial light source for green methanol production** [14109-4]

DESIGN ASPECTS

- 14109 07 **A fiber light engine design with pocus adjustment (Invited Paper)** [14109-5]
14109 08 **Design of side-lit lightguides with inkjet-printed color-conversion structures (SPIE Best Student Paper Award)** [14109-6]
14109 0A **Micro-element design for uniform and decorative lighting** [14109-8]

SIMULATION ASPECTS

- 14109 0B **Combining sequential and non-sequential ray tracing in illumination design (Invited Paper)**
[14109-9]
14109 0C **Rapid lighting map prediction with Ansys Optics and SimAI** [14109-10]
14109 0D **Automated solar-focus risk assessment for automotive lighting** [14109-11]
14109 0E **Optical and thermal simulations for infrared powder coating processes** [14109-12]

POSTER SESSION

14109 01 **Prototype facility for an industrial infrared powder coating process** [14109-16]
