Volume 14111

Proceedings of SPIE 0277-786X, V. 14111

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Instrument Science, Technology, and Applications IV*, edited by Holger Münz, Breann N. Sitarski, Nandini Bhattacharya, Proc. of SPIE 14111, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LIFE SCIENCES AND MINIATURIZED OPTICS

- 14111 02 **Exploiting nonresonant background signal of multiplex-CARS as an intrinsic contrast mechanism for mapping muscle proteins with M-CARS spectroscopy** [14111-1]
- 14111 03 **Contactless vital sign parameter measurement using compact snapshot multispectral multiaperture camera: design, realization, application, evaluation** [14111-2]
- 14111 04 **Endolaser photocoagulation dual-clad fiber probe with integrated optical coherence tomography using 3D printed micro-optics** [14111-4]
- 14111 05 **NIRA 3D: a 3D NIR microscope with Raman analysis for astrogeological exploration** [14111-5]

ASTRONOMICAL INSTRUMENTATION

- 14111 06 **Design of a three-lens wide field corrector with aspherical surfaces for the 2.34-m VBT** [14111-9]

METROLOGY AND RADIOMETRY

- 14111 07 **A data fusion approach for multiscale and hybrid surface topography metrology of porous materials** [14111-12]
- 14111 08 **Laser-driven plasma sources as transfer standards for spectral irradiance** [14111-14]
- 14111 09 **From incandescent lamps to array spectroradiometers: enabling detector-based traceability for spectral irradiance measurements** [14111-15]

POSTER SESSION

- 14111 0A **Gamified optical prototype for adaptive binocular vision enhancement [14111-17]**
- 14111 0B **A wideband microscope for detecting and analyzing extraterrestrial life in the solar system [14111-18]**
- 14111 0C **Pioneering x-ray images selected for UNESCO's Memory of the World Register [14111-19]**
- 14111 0D **Inline measuring system for the identification of oil contaminants on metal surfaces using infrared spectroscopy [14111-21]**
- 14111 0E **Optical IoT for smart cities: integrating visible light communication and deep reinforcement learning in intelligent traffic systems [14111-23]**
